### Introduction

This statement provides guidance for the private sector when doing business with Blayney Shire Council.

It outlines Council's ethical standards and our expectation that goods and service providers and contractors will comply with these standards in their dealings with Council. This Statement also outlines what goods and services external providers and contractors can expect of the Council.

Council aims to promote integrity and ethical conduct, consistent with the positions of trust they hold and we expect no less of the service providers and contractors that undertake work for us.

This statement is designed to ensure that business relationships between this Council and external private sector service providers and contractors are fair and productive for all.

### **Our Key Business Principles**

The principle of best value for money is at the core of Council's business relationships with private sector suppliers of goods and services.

Best value for money does not automatically mean the lowest price. Rather, Council will balance all relevant factors including initial cost, whole-of-life costs, quality, reliability, and timeliness in determining true value for money.

Part of obtaining best value for money also includes ensuring all of our business relationships are honest, ethical, fair and consistent.

Our business dealings will be transparent and open to public scrutiny wherever possible. Given the nature of some of Council's work, there will be times when the details of some business relationships will not be made publicly available.

We are committed to the purchase of all goods, equipment and services through established NSW Government contracts systems, where possible and reasonably practical. Where Council does not use this established system, Council will define the reasons for this action.

### What you can expect of us

Blayney Shire Council will ensure that all its policies, procedures and practices relating to tendering, contracting and the purchase of goods and services are consistent will best practice and the highest standards of ethical conduct.

Our staff are bound by Council's Code of Conduct. When doing business with the private sector, Blayney Shire Council staff are accountable for their actions and are expected to:

- Use public resources effectively and efficiently
- Deal fairly, honestly and ethically with all individuals and organisations
- Avoid any conflicts of interest (whether real or perceived).

In addition, all Council procurement activities are guided by the following core business principles:

- All potential suppliers will be treated with impartiality and fairness and given equal access to information and opportunities to submit bids
- All procurement activities and decisions will be fully and clearly documented to provide an audit trail and to allow for an efficient performance review of contracts
- Energy efficient equipment, products containing recycled materials and environmentally friendly products will be purchased wherever reasonably possible.
- Tenders will not be called unless Council has firm intention to proceed to contract
- This Council will not disclose confidential or proprietary information.

### What we ask of you

We require all private sector providers of goods and services to observe the following principles when doing business with Council:

- Comply with Council's procurement policies and procedures
- Provide accurate and reliable advice and information when required
- Declare actual or perceived conflicts of interests as soon as you become aware of the conflict
- Act ethically, fairly and honestly in all dealings with Council
- Take all reasonable measures to prevent the disclosure of confidential Council information
- Refrain from engaging in any form of collusive practice, including offering Council employees inducements or incentives designed to improperly influence the conduct of their duties
- Refrain from discussing Council business or information with the media
- Assist Council to prevent unethical practices in our business relationships.
- To ensure the integrity and confidentiality of Council information and commercial in confidence information received from other contractors and suppliers you will not offer to employ or engage in any capacity Council staff while they are employed by Council or within 12 months of ceasing employment.

### Why is compliance important?

By complying with our statement of business ethics, you will be able to advance your business objectives and interests in a fair and ethical manner. As all Blayney Shire Council suppliers of goods and services are required to comply with this statement, compliance will not disadvantage you in any way.

Complying with this Council's stated principles will also prepare your business for dealing with the ethical requirements of other public sector agencies, should you choose to do business with them.

You should also be aware of the consequences of not complying with the Council's ethical requirements when doing business with Council. Demonstrated corrupt or unethical conduct could lead to:

- Termination of contracts
- Loss of future work
- Loss of reputation
- Matters being referred for criminal investigation.

### **Guidance Notes**

### Incentives, gifts, benefits

In general, this Council expects its staff to decline gifts, benefits, travel or hospitality offered during the course of their work. You should refrain from offering any such 'Incentives' to Council staff.

If a gift is accepted, Council requires the staff member to record the gift in the Gifts and Benefits register. (See Gifts and Benefits Policy for procedures)

### **Conflict of Interest**

Council staff are required to disclose any potential conflicts of interest. Council extends this requirement to all of our business partners, contractors and suppliers.

### Confidentiality

All Council information should be treated as confidential unless otherwise indicated.

### **Communication between parties**

All communication should be clear, direct and accountable to minimise the risk of perception of inappropriate influence being brought to bear on the business relationship.

### Use of Blayney Shire Council equipment, resources and information

All Council equipment, resources and information should only be used for its proper official purpose.

Should you have any questions regarding this statement or to provide information about suspect behaviour please contact us:

### **Quarterly Budget Review Statement**

for the period ending 31/12/14

### Report by Responsible Accounting Officer

The following statement is made in accordance with Clause 203(2) of the Local Government (General) Regulations 2005:

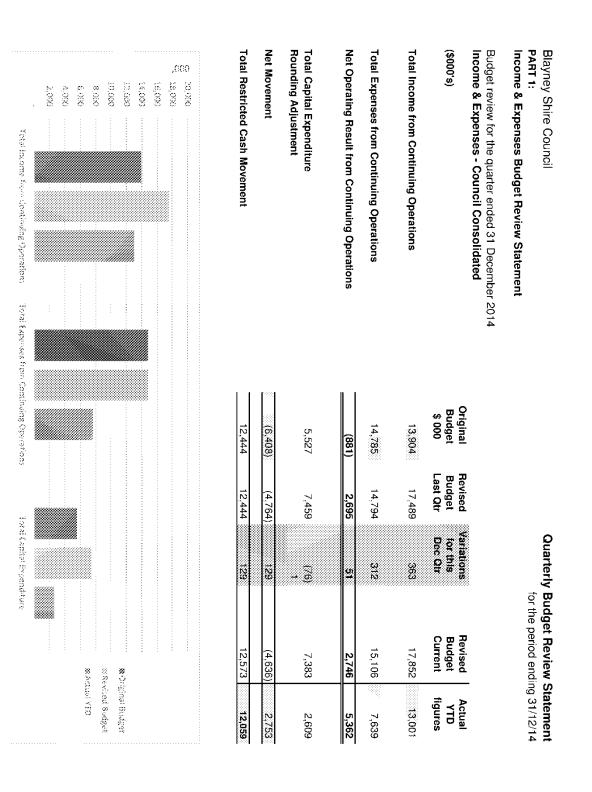

It is my opinion that the Quarterly Budget Review Statement for Blayney Shire Council for the quarter ended 31/12/14 indicates that Council's projected financial position at 30/6/15 will be satisfactory at year end, having regard to the projected estimates of income and expenditure and the original budgeted income and expenditure.

Signed

date: 30/01/2015

Tiffaney Irlam Responsible Accounting Officer

## Acknowledgements

This Strategic Business Plan was prepared by Blayney Shire Council with the assistance of the Strategic Water Planning Unit of NSW Public Works.

The Plan is based on a workshop held on the 11<sup>th</sup> and 12<sup>th</sup> of September 2013, in which Councillors, senior Council staff and external stakeholder agencies were represented.

## **Executive Summary**

This Strategic Business Plan covers the development and operation of Blayney Shire Council's Sewerage Scheme. It provides supporting information for Council's Integrated Planning and Reporting (IP&R) as well as satisfying compliance requirements for the NSW Office of Water.

## **Operating Environment Review**

A review of operating environment explores the internal and external conditions under which Council delivers services now, and those, which will be likely to prevail in the future. Details are given in Section 5 of this Business Plan.

Council provides services to the communities listed in the Table below. Reticulated water is provided to the towns and villages in the shire by Central Tablelands Water (CTW). Rural properties and industries outside of the communities listed below generally source their water from rainwater tanks.

Council currently provides Blayney and Millthorpe with sewerage services. The remaining Shire communities use on-site sewage management systems, the inspection which is the responsibility of Council's Planning and Environmental Services section.

| Name  | Estimated<br>Population | Potable Water<br>Supply             | Sewerage Scheme      |
|---|-------------------------|-------------------------------------|----------------------|
| Blayney   | 2810                    | Provided by CTW                     | Reticulated sewerage |
| Millthorpe  | 737                     | Provided by CTW                     | Reticulated sewerage |
| Carcoar   | 215                     | Pravided by CTW                     | Septic tanks         |
| Lyndhurst (including<br>Somers and Garland)                           | 219                     | Pravided by CTW<br>(Lyndhurst only) | Septic tanks         |
| Mandurama<br>(including Errowanbang,<br>Burnt Yards and<br>Gailymont) | 496                     | Provided by CTW                     | Septic tanks         |
| Barry, Neville and<br>Newbridge villages                              | 305                     | Rainwater Tanks                     | Septic tanks         |

#### **Current Service Areas**

A more detailed description, including a service area map of Council's sewerage schemes, is presented in Section 3 of this Business Plan.

Blayney Shire Council SBP for Sewerage

Page vii

### Mission

Council has adopted the following objective for its sewerage services:

To provide sewerage services in an efficient manner to the agreed and currently recognised health, environmental and other community standards and needs with flexibility to promote and meet development demands within the Region

Council's corporate policies and objectives also place specific requirements on the sewerage scheme. These are detailed in Section 2 of this Business Plan.

### Levels of Service

Council's primary objective for its sewerage services is to meet its adopted Levels of Service.

Sewerage

- Proportion of sewage treated to various standards
- Number of overflow events
- Greenhouse gas emissions

Service interruptions

- Frequency and duration of planned and unplanned service interruptions
- Response times to service interruptions

Customer care

- Frequency of customer complaints
- Response times for customer queries and/or complaints

Levels of Service with predicted improvements are summarised on the following page. Note the Levels of Service are the targets which Council aims to meet; they are not intended as a formal customer contract.

@ - NWI Performance Indicators

\* - Times apply for 95% of incidents

## **Principal Issues**

The current services are generally regarded as satisfactory by customers. Following are the major issues which will need to be addressed in the short term:

- Service extension to village areas (there are a number of properties within the Blayney Council that do not have access to the sewerage service);
- Equitable service pricing including developer charges; and
- Systematic rehabilitation and renewal of ageing assets (i.e. treatment plant and reticulation system, including manholes);

Page x

## **Objectives and Performance Targets**

Council has recognised five Key Result Areas that must be managed well to achieve success in the long-term provision of sewerage services to its customers. These are:

- Customer service;
- Environmental protection and sustainable development;
- Total asset management;
- Work force; and
- Finance.

Objectives and Performance Targets have been set in these Key Result Areas. These are summarised in Table below and detailed in Sections 8 through 12.

Notable capital work outcomes Council plans to achieve over the next 10 years include:

- Lining/ replacement of sewer mains
- Manhole rehabilitation program
- Telemetry upgrade
- Millthorpe transfer main augmentation
- Sewerage schemes for the villages of Carcoar, Mandurama and Lyndhurst

#### **Objectives and Performance Targets**

| Key Result Area       | Objective   | Performance Target  |
|-----------------------|---|---|
| Customer Service      |   |   |
| Levels of Service     | Levels of services are in accordance with<br>community expectations.  | 100% compliance with the agreed<br>Levels of Service.                               |
| Areas Serviced        | Maintain existing designated service areas<br>and provide service to selected un-serviced<br>areas where economically feasible                  | Achieve 100% service connections in<br>the designated service area by June<br>2015. |
|                       |   | Complete feasibility study for village schemes by June 2016.                        |
| Sewer Load Management | Minimise hydraulic loads due to infiltration,<br>inflow and illegal connections and manage<br>any industrial and commercial pollutant<br>loads. | implement Infiltration/Inflow (I/I) program by 2015.                                |
| Service Pricing       | Ensure scheme achieves full cost recovery   | Review sewerage tariff by March 2015  |
|                       | and reflects best practice guidelines.  | Review and update developer charges by December 2014.                               |

| Financial Plan                | Maintain a long-term financial plan to<br>provide full cost recovery for scheme<br>operation and asset replacement at an<br>affordable level of cost to customers. | Sewerage long-term financial plan in place by March 2015.   |

## **Projected Financial Position**

The following Table presents the summary of forecast financial position of Council's sewer fund over the next 30 years at five-year intervals. Note all projected values are in 2013/14 dollars.

#### Summary of Projected Financial Position

| 2013/14 \$ (000)              | 2010/16 | 20177418 | 2022/28       | 2027/22 | 2032/88 | 20.07/688 20042246 |
|-------------------------------|---------|----------|---------------|---------|---------|--------------------|
|                               |         |          | ************* | *****   |         |                    |
| Estimated Total Revenue       | 1,239   | 1,271    | 1,364         | 1,568   | 1,659   | 1,737 1,842        |
| Estimated Total Expenditure   | 1,440   | 1,707    | 1,599         | 1,629   | 2,112   | 2,109 2,089        |
| Operating Surplus / (Deficit) | (20))   | (438)    | (235)         | :52:    | (354)   | (373) (247)        |
| Acquisition of Assets         | 231     | 300      | 100           | 28      | 3.020   | 120 20             |
| Principal Loan Payments       | 44      | 53       | 66            | 48      | 117     | 142 173            |
| Borrowings Outstanding        | 933     | 656      | 289           | 0       | 4,285   | 3,161 2,030        |
| Cash and Investments          | 3,472   | 1,323    | 1,029         | 1,877   | 868     | 590 821            |
| Total Assets                  | 24,334  | 22,379   | 20,063        | 18,839  | 22,179  | 19,426 17,043      |
| Total Liabilities             | 939     | 661      | 294           | 4       | 4,289   | 3,164 2,033        |

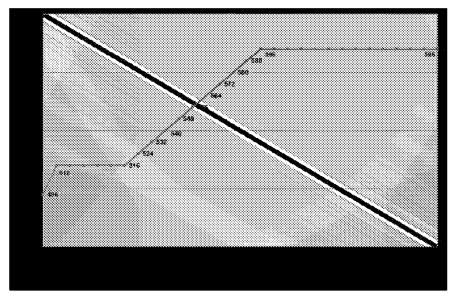

Financial modelling has demonstrated that the typical residential sewerage bill for sewerage services, measured in 2013/14 dollars has to be increased to \$516 p.a. in 2014/15 and can be maintained the same for the next 5 years i.e. till 2019/20. Thereafter, the TRB needs to be increased by \$8 per year to \$596 p.a. in 2029/30 as shown below:

- TRB for 2014/15 \$516 p.a.
- TRB for 2015/16 to 2019/20 \$ 516 p.a.
- TRB for 2020/21 \$ 524 p.a.
- TRB for 2029/30 \$ 596 p.a.

From 2029/30 onwards, the TRB can be maintained at the same level for the remainder of the forecast period. It should be noted that the financial model considered that residential customers of Millthorpe will also be paying the same level of TRB as for Blayney.

Note the forecast TRBs are to be adjusted annually for CPI/inflation

#### **Typical Residential Sewer Bill**

This level of typical residential charges for sewerage services is sufficient to maintain liquidity with a minimum of \$250 K of cash in hand over the period.

New external borrowing of \$4.5 Million will be required for the Blayney STP capacity augmentation works planned to start in 2031/32. The borrowing outstanding at the end of the 30-year forecast period will be \$2,030K.

See Section 12.4 for more financial projection details.

Blayney Shire Council SIBP for Sewerage

Page xiii

This is Page No. 58 of the Attachments Paper of the Ordinary Meeting of the Blayney Shire Council held on 9 February 2015

### 1 Introduction

### 1.1 Purpose of the Plan

The purpose of the strategic business plan is to provide guidance for the future management of Blayney Shire Council's sewerage businesses with the aims of:

- Providing the information for Council's Resourcing Strategy as required for compliance with the Integrated Planning and Reporting Framework and for the Management Plan;
- Focusing attention on the key issues affecting the day to day operations of sewerage services;
- Demonstrating to stakeholders that the scheme is well managed;
- Identifying the financial and other resources required to operate these services on a commercial basis;
- Providing a long term price path for services;
- Assisting in the development of a long-term capital works program with an affordable price path for the services;
- Enabling Council to model 'what-if' scenarios and see their impact on customer charges; and
- Allowing future financial performance indicators to be calculated, such as return on capital invested.

### 1.2 Integrated Planning and Reporting Framework

The Strategic Business Plan is required under the NSW Integrated Planning & Reporting (IPR) Framework (Figure 1). The framework is used by State Government agencies to:

- Gain an overview of the current status and future water supply and sewerage needs of non-metropolitan NSW; and
- Gather information to assist in directing policy and programs for financial and technical assistance towards the needs of the utilities.

The main elements of the IPR framework are the:

- Community Strategic Plan (CSP)
- Resourcing Strategy
- Delivery Program
- Operational Plan
- Annual Report
- Perpetual monitoring and review

### 1.3 Benefits of Strategic Business Plans

Sewerage capital investments tend to be large and lumpy, and assets are long-lived, for example, the economic lives of sewerage infrastructure can range from 50 and 70 years. For this reason, financial projections in the Strategic Business Plans are for 30 years. The projections for the next three years are based on reasonably firm estimates of costs, and, beyond this time, projections are based on indicative amounts only.

Strategic Business Plans provide many benefits to Council including:

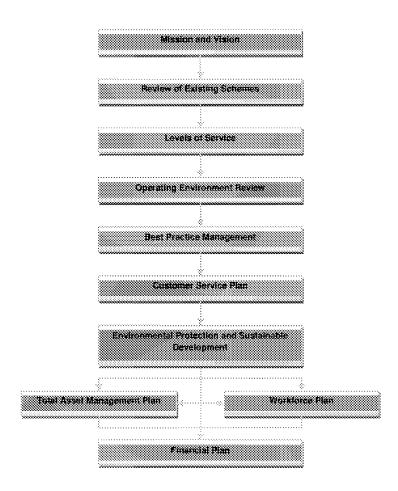

- improved management performance;
- improved financial performance;
- avoidance or minimisation of increases to Typical Residential Bills (TRBs); and
- increased accountability to customers.

Page 2

### 1.4 Plan Structure

The structure of this Strategic Business Plan is outlined in Figure 2.

Figure 2 - Structure of Plan

Blayney Shire Council SBP for Sewerage

Page 3

### 2 Mission and Vision

Strategic planning aims to optimise service delivery in terms of long term cost effectiveness and sustainability. The prime driver is Council's vision of the future and definition of a mission statement.

### 2.1 Corporate Vision

Council's vision is:

- To be a shire of welcoming communities
- Of beautiful and productive landscapes
- Recognising our rural and mining heritage
- Showing the world how agriculture, mining and industry can work together for the greatest good, and
- Be a place to live your dreams.

Council's values are:

- With a generosity of spirit we will:
- Be inclusive and united
- Act honestly and respect each other
- Have a "can do" attitude
- Think outside the square and
- Back ourselves

Blayney Shire strategic outcomes are:

- Grow the wealth of the Shire
- A centre for sports and culture
- Develop and maintain Shire infrastructure
- Develop strong and connected communities
- Leadership

### 2.2 Sewerage Objective

Council's corporate objective for sewerage is:

To provide sewerage services in an efficient manner to the agreed and currently recognised health, environmental and other community standards and needs with flexibility to promote and meet development demands within the Region.

Page 4

## 2.3 Implications of Vision Statements

The implications of Council's vision and objectives for the provision of sewerage services can be summarised as follows:

- To have sufficient capacity for community growth, this will require increasing the serviced areas and upgrading the capacity of some existing infrastructure.
- To provide environmentally and financially sustainable service, this will require improved environmental performance and
- To develop public confidence in the staff and services, this will require improving levels of service, customer care and customer education.

Blayney Shire Council SBP for Sewerage

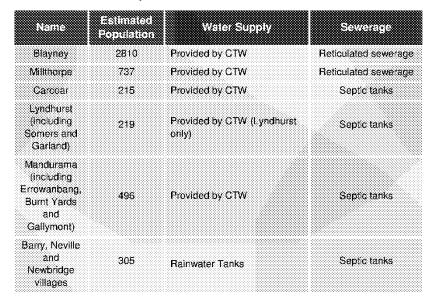

Page 5

### 3 Existing Schemes

Blayney Shire Council provides sewerage services to the community of Blayney and Millthorpe directly. The rest of the communities within the LGA uses on-site sewerage management systems (usually septic tanks, though some other systems may be in use). Council's Planning and Environment section is responsible for the management of these on-site septic systems.

Council provides services to the communities listed in Table 3-1. Reticulated water supplies are provided by Central Tablelands Water (CTW). CTW provides water to the townships of Blayney and Millthorpe as well as the villages of Carcoar, Mandurama and Lyndhurst. The availability and quality of the water provided, influences the volume and quality of sewage produced by these communities.

Rural properties and industries outside of the communities listed below generally source their water from rainwater tanks.

A map of the Blayney Shire Council Local Government Area (LGA), including most of these communities, is shown in Figure 3.

Page 6

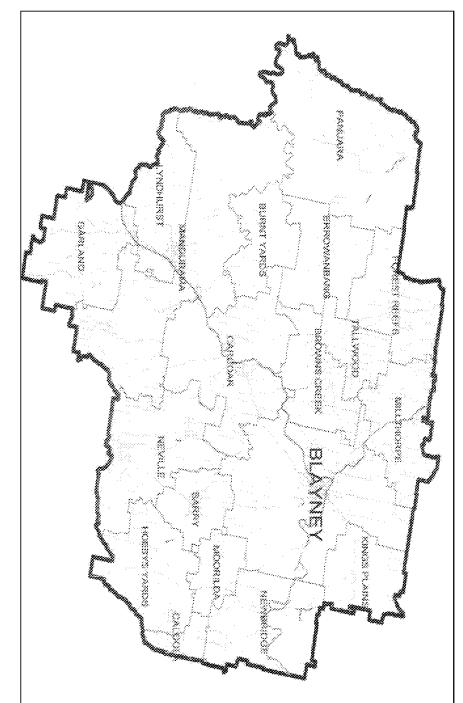

Figure 3 – Map of Blayney Shire Council

Page 7

### 3.1 Blayney Sewerage Scheme

The Blayney reticulation system consists of 51 km of AC and uPVC mains and six pumping stations. The original reticulation system in Blayney was constructed in late 1960s with considerable augmentation in 1970's, 80's, 90's and in 2003.

The Blayney Sewage Treatment Works is located on the south eastern outskirts of town on the north side of Hobby Yards Road. The original works, constructed in 1966, consisted of a Biological filter (Trickling filter) with a capacity of 2,100 E.P. The original treatment works was replaced by an Intermittently Decanted Extended Aeration (IDEA) activated sludge treatment plant with a design capacity of 7,000 E.P in 1989.

The STP fully treats all predicted inflows and currently has excess capacity based on the future design load.

Cadia mine currently takes all treated effluent. Any effluent that may not be pumped to Cadia mine due to the operational issues is released to the wetland, which then overflows to the Belubula River. Wetland has been provided as a supplementary structure to impart additional effluent polishing treatment. Flows to the wetland have been limited to wet weather events.

Sludge from sludge lagoons are dried at drying beds while supernatant is gravitated back to the IDEA plant.

The service area map of Blayney town sewerage scheme is shown in Figure 4.

### 3.2 Millthorpe Sewerage Scheme

Millthorpe sewerage services about 600 people in the village of Millthorpe. The sewer reticulation was commissioned in 2003. The system consists of 9.7 Km of uPVC gravity sewer mains and one pumping station. Collected sewage is pumped to the balancing tank of Blayney STP for treatment. The service area map of Millthorpe sewerage scheme is shown in Figure 5.

Page 0

Page 1

Figure 5 - Milithorpe Sewerage Service Area

#### 3.2.1 Sewerage Assets Summary

Blayney Shire Council has prepared an asset register and the locations of all major sewerage assets have been recorded. Council is continuously updating the asset register.

In 2012 Council carried out a valuation of the sewerage assets as required by the Division of Local Government, including the inspection of a representative sample of sewer pipes. Estimates of the timing for replacement needs in the medium and long term are based on the nominal lives of the assets combined with the results of the inspections and a general idea of the condition of the assets based on the day to day experience of the maintenance staff. A projection of costs has been made for modelling purposes based on this knowledge and the asset register data.

The currently estimated condition rating of Council's major sewerage assets is presented in Table 3-2 and the estimated value is presented in Table 3-3.

Page 2

| Asset   | No./Lengih/<br>Capacity | Average<br>Remaining<br>Life<br>(Years) | Condition<br>1 = As New<br>5 = Poor |
|---|-------------------------|---|-------------------------------------|
| Gravity mains including Trunk mains                   | 53 km                   | 35                                      | 3.2                                 |
| Sewage pumping stations                               | 8                       | 24                                      | 3.2                                 |
| Rising mains  | 23.3 km                 | 58                                      | 1,2                                 |

#### 3.2.2 Capital Works Program for Sewerage

The following is a summary of the major sewerage capital works planned for Blayney Shire Council over the next 10 years. The justifications for the works are shown below. Table 3-4: Major Sewerage Capital Works

| Proposed Capital Work                    | Year        | Justification   |
|--|-------------|---|
| Lining/ Replacement of sewer mains       | 2013 - 2019 | Renewal and refurbishment of ageing<br>assets           |
| Manhole rehabilitation program           | 2014 - 2019 | Improved levels of sewerage service and STP performance |
| Telemetry upgrade                        | 2014/15     | Improved scheme operation for better<br>performance     |
| Millthorpe transfer main<br>augmentation | 2014 - 2016 | Refurbishment of ageing assets                          |

Page 4

### 4 Levels of Service

The Levels of Service:

- define explicitly the standards required;
- are an expansion of the mission statements; and
- largely shape Council's detailed planning.

The Levels of Service define the deliverables and are the driving force for the management and development of sewerage schemes. Achieving the target Levels of Service is the **primary goal**.

Council uses its judgement in setting standards and while there are statutory service standards in some areas such as effluent quality, noise, and sludge management, in other areas, stakeholders may be consulted (see Section 5.4 for details) and may desire levels of service which are even more stringent than the regulatory requirements.

While Council endeavours to close any perceived gap between the stakeholder expectations and the levels of services provided, this is also subject to economic, social and environmental considerations. This Plan presents Council's proposed approach to future service delivery.

It should be noted that while the current Levels of Service are the target, which Council aims to meet, they are not intended as a formal customer contract. It is Council's responsibility to strive for continual improvement to achieve these levels in the most cost effective way.

The current and target levels of service are shown in the following tables.

Blayney Shire Council SBP for Sewerage

Page 5

Table 4-1: Levels of Service

Blayney Shire Council SBP for Sewerage

# 5 Operating Environment Review

The delivery of sewerage services to the scheme's customers is subject to a large number of constraints, requirements, guidelines and other factors, which collectively are referred to as the operating environment. The five major elements of the operating environment are shown in the following figure.

Figure 6 - Operating Environment

Page 8

### 5.1 Institutional Arrangements

There are several institutional arrangements available to Council as potential structures for providing sewerage services. These include institutional models such as Amalgamation, County Councils, Commercialisation, Strategic Alliances, Corporatisation, Regional Corporation and Privatisation.

These models have been suggested in the options paper issued by the LGSA and the NSW Water Directorate to assist Councils in making a submission to the NSW Government Inquiry into Local Water Utilities.

Blayney Shire Council has adopted the Strategic Alliance model by becoming part of the CENTROC Water Utility Alliance (CWUA) and running its sewerage services in a commercially viable manner in accordance with the NOW Best Practice Management Guidelines. The CWUA facilitates a unified approach to water management in the central NSW region and includes the member councils of Bathurst, Blayney, Young, Cabonne, Cowra, Forbes, Harden, Lachlan, Lithgow, Oberon, Orange, Parkes, Upper Lachlan, Weddin, Wellington, Young and Central Tablelands Water.

The definitions of these arrangements are:

- Commercialisation: Where a Council operates on a commercial basis, i.e. each aspect of the Council's operations is self-sustaining. This arrangement is believed to be able to reflect the true cost to customers, be more efficient and provide better service choices. There is however some concern this model can lead to some valuable services being abandoned, based on an economic and commercial basis.
- Strategic Alliance: Where a Council joins other participating Councils in the region/catchment through a Memorandum of Understanding, in order to pool in available staff and other resources to provide sewerage services. This arrangement aims to help provide crucial pooled professional and technical resources for efficient delivery of services. The major concern regarding this sort of alliance is that if not mandatory, it may risk falling apart in the face of difficulties, agreed scope of pooled activities or lack of interest.

Council would like to continue with the current Commercialisation / Strategic Alliance model for the foreseeable future.

# 5.2 Legislative Framework

Numerous Acts influence the way in which Council can provide sewerage services to the community. Appendix B provides a discussion of the relevant legislation and the specific implications it has for Council's operations.

In general, more regulation, stringent enforcement and fewer subsidies from the State and Federal Governments is imposing heavy burden on Council's sewerage service management responsibilities and hence on its finances.

Additionally, the latest State Government policies tend to transfer more regulatory responsibilities to Local Government; this increases the burden on the Council.

## 5.3 Corporate Policies

Blayney Shire Council currently has the following corporate policies that are relevant to the operation of its sewerage scheme.

#### Table 5-1: Council Corporate Policies

| Model Code of Conduct for<br>Local Councils                                   | - Socially responsible   |
|---|--|
| Asset Management Plan -<br>Sewer  | <ul> <li>Provision of required service infrastructure in a sustainable<br/>manner</li> <li>Meeting legislative requirements</li> </ul> |
| Water saving rules (Demand<br>Management Plan by Central<br>Tablelands Water) | Encouraging to be water-wise     Demand management   |
| Liquid Trade Waste Policy   | <ul> <li>Identification and monitoring of trade wastes according to<br/>NOW and EPA Guidelines</li> </ul>                              |
| Developers contribution for<br>sewage   | - Equitable distribution of infrastructure costs   |
| Pollution Incident Response<br>Management Plan                                | - Environmental Protection and notification  |

## 5.4 Stakeholder Review

Stakeholders are defined as individuals and organisations, both internal and external, with an interest and/or equity in the sewerage services provided by the Council. They typically include:

- Property Owners/Ratepayers
  - o Residents/Families
  - o Pensioners
  - Commercial and Industrial Consumers
- Councillors
- Management Staff
- Council Employees
- Government Agencies
- Tourists
- Special Interest Groups such as Environmental groups and Chambers of Commerce

Typically the expectations of the stakeholders cover a wide spectrum of issues and aspects of service delivery including operational levels of service relating to service reliability, responsiveness to complaints, etc., which are not covered by regulation. Such expectations may significantly impact on the development and operation of the schemes. A stakeholder review was undertaken at the planning workshop, the participants were asked to rate Council's service provision both from a Council and a Stakeholder point of view for a number of criteria generally of importance to the stakeholders. The results are included in Appendix C. Some of the criteria include:

- Quality of water in waterways downstream of the communities and sewage treatment plants;
- Public perception of the Council;
- Staff satisfaction; and
- External agency perception.

# 5.5 Future Development

Council's vision for a 30-year planning horizon for sewerage services reflects the changing operating environment due to future growth and developments that in turn influence the service requirements. Council considers the following factors as having significant influence on the future sewerage services provided and the general quality of life of the residents.

### 5.5.1 Population Growth

Blayney Shire Council has had a compounding population growth of 0.6% p.a. during the 20-year period between 1991 and 2011 (Based on ABS data – Regional Population Growth, Local Government Areas, NSW - 1991 – 2011, April 2013, Ref. 3218.0).

Population growth for Council has been estimated to be at 1.2% p.a. by Centroc (Western Research Institute - WRI, 2008). NSW Planning (2013) projected that the population would grow on average by 0.95% p.a. during the period between 2011 and 2031.

Council has adopted a long term average growth rate of 1.2% p.a. for sewerage services planning purposes (based on data from Central Tablelands Water Joint Integrated Water Cycle Management (IWCM) Detailed Strategy Study, NSW, June 2013)

The ABS census data, NSW Planning forecasts and Council's projection for sewerage service planning are shown graphically in the figure next page.

Blayney Shire Council SBP for Sewerage

# ATTACHMENT NO: 1 - STRATEGIC BUSINESS PLAN FOR SEWERAGE SERVICES

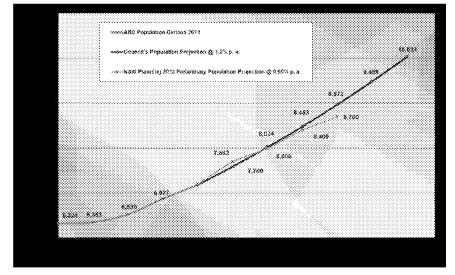

Figure 7 - Blayney Shire Council Population Growth Projections

For sewer fund financial modelling purposes, the projected number of assessments adopted is based on the 1,927 (Residential: 1,639; Non-residential: 288) assessments in June 2013 (Reference: Blayney Shire Council Special Schedule 5 for the year 2012/13) and factored up on a pro-rata basis in line with the adopted growth forecasts.

### 5.5.2 Development

- The key sectors driving economic output within the LGA are agriculture, manufacturing and mining.
- The major employers within the Shire are Newcrest/ Cadia Mining, Linfox and Nestle. Sea-link, a cold storage facility also operates in Blayney.
- New mines may be opened within the LGA increasing the potential for growth in the near term.
- Land releases are planned in North Millthorpe (96 rural residential lots)

#### 5.5.3 Public Health

- The residents of Blayney Shire are within reasonable distance to major regional centres including Orange, Bathurst and Sydney. The nearest base hospitals are located in Orange and Bathurst.
- Limited medical services in the Shire are considered an impediment to growth in the region.

#### 5.5.4 Environment

Algal blooms are now commonplace in the regional waterways; flows of almost all
of which are regulated.

Page 12

 The Shire continues to have good air quality however increasing through traffic of heavy vehicles may contribute in the long-term to air pollution due to vehicular emissions.

### 5.5.5 Transport and Tourism

- Blayney and Millthorpe are well connected to Orange, Bathurst, Dubbo and Sydney by road.
- The upgrade of the Mid-Western Highway is expected to drive growth of industrial properties in and around the Shire.
- Blayney is the railhead for the container terminal that exports to Port Botany and Port Kembla.
- Council is collaborating with Wellington Shire Council, Cabonne Council and the Regional Tourism Board to increase tourism in the area.

### 5.5.6 Technology and Information

- Advanced information management would provide better financial and operational analysis and lead to continual service improvement.
- Improvements in reliable mobile access and availability of high-speed (broadband) internet access in future will enhance opportunities for growth and development. This would also provide opportunities for tele-commuting.

### 5.5.7 Government Legislation/ Policy

- Potential for changes to effluent quality requirements and EPA licence requirements will have drastic impact on Council finances
- The notion that State Government shifting responsibility and costs to councils is considered a major threat to the Council
- Possible loss of council, headquarters, local representation either due to amalgamation or centralisation of government services is considered a major government policy related issue for the Council.

Blayney Shire Council SBP for Sewerage

## 5.6 Service Provision

Council's future growth projections indicate that there is insufficient extra capacity in the sewerage system to meet the expected future demand due to forecast growth and development in the LGA for the next 30-years. Also, the sewerage scheme will need to be maintained to cope with ageing assets and increasing demand. Council plans to extend services to urban growth areas as required.

Council's response to the forecast of likely future demands and changes to service provision are summarised in the table below.

Table 5-2: Future Demands and Responses

| Changes               | Council Actions   |
|-----------------------|---|
| Customer Growth Rate  | Extend services to villages areas, where financially feasible   |
|                       | Account for growth in demand plans  |
| Commercial Growth     | Extend services to urban development areas  |
|                       | Account for growth in demand plans  |
| Environmental Changes | Attempt to collect more climate data to improve yield models  |
| Service Culture       | Provide refresher training to staff on customer service   |
| Technology Changes    | <ul> <li>Monitor technology changes to enable appropriate decisions to be<br/>made during refurbishments, upgrades, augmentations etc.</li> </ul> |
| Tourism Growth        | Account for growth in demand plans  |
| Government Policy     | Keep abreast of changes in Government policies and Acts   |
|                       | Apply for grants and subsidies  |
| Ongoing changes       | Participate actively in Centroc   |

## 5.7 Service Delivery

The Federal Industry Commission Report on the Australian Water Industry indicated that there should be an efficient use of resources in the water industry – natural, physical and financial. The 1992 recommendations were wide-ranging and covered matters such as pricing and structural reforms. This has been followed up by the NSW Government's Competition Policy and the Independent Pricing and Regulatory Tribunal's Pricing Principles for Local Water Authorities. In addition, the Local Government Association has issued a guideline to self-regulation, which suggests ways Councils can improve their service delivery.

Council has considered the advantages and disadvantages of various methods of service delivery including full service contract, part-service contract, BOOT (Build, Own, Operate and Transfer), resource/ service sharing, and in-house resourcing.

Currently the majority of operation and maintenance works are carried out using in-house resources. Council contracts out work for minor operations such as maintenance and pipeline cleaning.

Council will contract out major works and will consider contracting out where in-house expertise and resources are limited and where more economical solutions may be available. A BOOT approach is not seen as desirable.

Page 14

Resource sharing/ shared services and knowledge/ information sharing (e.g. trade waste and road safety) etc. are of particular interest to Council and across the region. Considerations include rates, hire agreements, qualifications, skills, shared service agreements, panel contracts, long-term contracts, buying power, etc.

Main advantages of resource sharing are:

- There would be a reduction in the number of resources required by Council as these would be shared with the other organisations.
- By sharing the resources associated with the provision of sewerage services with other organisations economies of scale would be achieved.
- May enables specialist expert team to be established and used on a regional basis.

This option is along the lines of Strategic Alliance discussed under the institutional arrangement alternatives. Council, in conjunction with Centroc, is planning to identify areas of co-operating with neighbouring Councils.

### 5.7.1 Conclusion

The various service delivery arrangements were rated on a scale of +1 (very possible) to -1 (very unlikely) as listed below.

Table 5-3: Service Delivery Options

| (3)5){(6)       | ;        |   | lanking |  |
|-----------------|----------|---|---------|--|
| Full Service Co | ntract   | ~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~ | -1      |  |
| Part-Service Co | intract  |   | +1      |  |
| BOOT            |          |   | -1      |  |
| Resource/Servi  | ce Share |   | ¥1      |  |

Council believes that under the current operating environment only part-service contract options and resource sharing will hold any real advantages in the foreseeable future.

Blayney Shire Council SBP for Sewerage

# 6 Best Practice Management

## 6.1 Compliance Status

The NSW Office of Water (NOW) is responsible for the administration of the *Guidelines for Best-Practice Management of Water Supply and Sewerage* pursuant to section 409(6) (NSW Department of Water and Energy, 2007) of the Local Government Act 1993. A summary of Blayney Shire Council's current compliance status of the guidelines is listed in Table 6-1.

#### Table 6-1: Best Practice compliance

| Best Practice Requirement   | Status             |
|---|--------------------|
| Strategic Business Plan (including Financial Plan)                                      | This document      |
| Sewerage Service Pricing  |                    |
| <ul> <li>Full cost recovery without significant cross subsidies</li> </ul>              | Compliant          |
| <ul> <li>Complying residential charges. Independent of land value</li> </ul>            | Compliant          |
| Complying non-residential charges   | Compliant          |
| <ul> <li>Development service plan including commercial developer charges</li> </ul>     | Compliant          |
| <ul> <li>Appropriate liquid trade waste fees and charges</li> </ul>                     | Compliant          |
| <ul> <li>Complying liquid trade waste policy and approval for all discharges</li> </ul> | Compliant          |
| Performance Reporting   | Compliant          |
| Integrated Water Cycle Management (CTW)   | Compliant          |
| Asset Management*   |                    |
| 30-year capital works plan  | Compliant (part of |
| Operations and Maintenance Plans  | SBP)               |
|   | Compliant          |

\* Note: Development of Asset Management Plan is not currently a requirement of NOW Best Practice Guidelines; however, it is required to comply with DLG Integrated Planning and Reporting Framework, 2010.

Page 16

# 6.2 Principal Issues

A number of issues have been identified as important to the future operation of the sewerage scheme. Table 6-2 presents a list of major issues and where they have been addressed in this Strategic Business Plan.

Table 6-2: Principal Issues

Blayney Shire Council SBP for Sewerage

# 7 Action Planning Overview

The relationship between "Service Solutions" and "Asset Strategy Planning" is represented in Figure 8.

#### Figure 8 - Relationship between Service Planning and Asset Strategy Planning

In order to achieve the levels of service, a number of objectives have been defined along with the actions that will aid Council in achieving these targets. An "Objectives and Actions" table has been created for each area of the Action Plan. The definitions for each of the key terms used in these tables is summarised in Table 7-1.

Table 7-1: Key Terms in Objectives & Action Tables

| Section             | Description of Contents   |
|---------------------|---|
| Objective (Goal)    | Defines how key result areas contribute to service goals                                  |
| Performance Targets | Expected Outcomes   |
| Strategies          | The plan for achieving the objective(s), expressed in general terms rather than specifics |
| Actions             | Specific tasks to implement strategies and achieve objective(s)                           |
| Responsibility      | Person in charge of task completion   |
|                     | Implementation (Implement) - One off cost   |
| Cost                | Ongoing - Cost incurred annually over a number of years or at regular intervals           |

The responsibility for ensuring that each of the actions is undertaken has been assigned to a member of Council's management team. Each member of the team is identified by the acronym used for their position. A brief description of the responsibilities of each team member is contained in Table 7-2.

Table 7-2: Positions and Responsibilities

| Abbevia | tion Position                                |
|---------|--|
| GM      | General Manager                              |
| DIS     | Director Infrastructure Services             |
| DPES    | Director Planning and Environmental Services |
| DCS     | Director of Corporate Services               |
| IM      | Infrastructure Manager                       |
| HRM     | Human Resources Manager                      |
| MFS     | Manager Financial Services                   |
| OM      | Operations Manager                           |
| EHO     | Environmental Health Officer                 |
| RO      | Risk Officer                                 |
| SSS     | Sewer System Supervisor                      |

With respect to the expenditure, where the current levels of expenditure are considered sufficient to cover the required activities the acronym NAE (No Additional Expenditure) has been entered.

# 7.1 Service Planning

There is a relationship between the Levels of Service (LOS) to be provided to consumers and the actions that will be undertaken by Council. The following table shows how the Levels of Service map into the key result area action-planning framework. As such, it would be expected that any changes to current LOS would be addressed in the indicated objectives.

| Table 7-3: Relationship be | etween ( | Objectives | and | Levels | of | Service |  |
|----------------------------|----------|------------|-----|--------|----|---------|--|

# 8 Customer Service Plan

The Customer Service Plan covers activities, which involve interaction between Council, its customers and the wider community as illustrated in Figure 9.

Blayney Shire Council SBP for Sewerage

## 8.1 Performance Management (Levels of Service Review)

The Levels of Service discussed in Section 4, are designed to reflect an optimisation of the desired service provision, what is affordable, and the system's capability. These considerations take into account legislative requirements, industry standards and customer demands.

This section reviews the services currently provided by the Council's sewerage scheme. In addition to identifying areas where improvements are necessary, the review also refers to aspects of the operation that are being performed well.

The Levels of Service Review objective should enable the community to be aware of, and endorse the Levels of Service provided. As a public document, this report provides the necessary background information.

To demonstrate continuous improvement, Council will seek to provide the target Levels of Service in the most efficient manner. A number of items are of particular importance and these will be addressed under the relevant key result areas.

Under the NOW Best Practice Management Guidelines, a performance review is required to demonstrate that Council is either achieving the Level of Service or progressing towards achieving the target levels. Monitoring and benchmarking are needed to help Council determine if the methods are appropriate or more effective than other Councils. Performance data is forwarded to NOW in September each year.

A benchmarking exercise is then conducted to ensure Levels of Service are comparable to others in the industry at present. The outcome of the benchmarking exercise is provided as a feedback from NOW to the Councils as a 2-page Triple Bottom Line (TBL) report. The TBL report should be reviewed and an action plan to address areas of underperformance prepared by the Council.

In accordance with the Inter-Government Agreement on a National Water Initiative signed between the Commonwealth and the State Governments, NOW has introduced independent auditing of the performance data reported by all non-major water utilities for a comprehensive set of performance indicators developed by the National Water Commission (2012). The audit verifies the reliability and accuracy of the performance data reported by Water Utilities and enables meaningful state-wide and nation-wide benchmarking and comparison of key issues affecting water utilities and their customers. The performance audit is to be undertaken at least once in three years. Currently, audits are only applicable for utilities with more than 10,000 connections and hence not applicable to Blayney Shire Council.

Generally Council has been performing well in respect of the Levels of Service. Maintaining the levels of service is Council's current priority.

Blayney Shire Council SBP for Sewerage

### 8.2 Areas Serviced

This section of the Customer Service Plan addresses Council's intentions in the provision of sewerage services for the next thirty years.

The extension of sewerage services to new areas is dependent on a range of factors, the most important of which are:

- The growth in rural settlements
- The impact on levels of service to existing customers
- The environmental impact of the works
- Cost to customers associated with extending services

When extending services, Council will:

- Treat all residents as equal for the provision of services
- Consider residents expectation of service
- Consult community when considering new development areas or backlog programs
- Compete with neighbouring Councils in attracting commercial and industrial developments;

The main issues considered are:

- Providing sewerage services to future growth and development areas
- Ensuring that sewerage planning in line with the LEP is integrated with overall Council planning to eliminate pressure from developers and avoid the underutilisation of services

With regard to the development of new areas identified in Table 8-2, it has been assumed that there will be some form of development over the next 30 years.

Council have indicated that they may consider providing reticulated sewage services to Carcoar, Lyndhurst and Mandurama in the medium to long term.

The villages of Barry, Neville and Newbridge are not connected to a sewage system. Residents live on large blocks where onsite septic tanks are used. It is not considered financially practical to connect to the existing system.

### 8.3 Sewer Load Management

This section of the Plan outlines Council's intention in the management of loadings on the sewerage systems. While the impacts and management practices are of concern to the Customer Service Plan, the solutions must be an integrated part of the Asset Management Plan since they involve long-term system maintenance strategies.

Reducing hydraulic and biochemical loading on the system can:

- Effectively prolong the life of the existing assets;
- Defer new works programs;
- Make treatment processes more effective;
- Reduce siltation in the system and reduce pump wear;
- Reduce operation costs; and
- Improve environmental performance.

Problems of load management may occur due to changing development patterns affecting design capacity, trade waste discharges, stormwater, or ground water.

### 8.3.1 Inflow and Infiltration Management

Although water demand management can reduce the hydraulic load on the treatment works, the major factor is usually the ingress of water into the system. The challenge is to control and reduce any significant inflow and infiltration (I/I). The main reference for the management of Inflow and Infiltration was written by the Department of Land and Water Conservation (DLWC) in 1996. The section responsible for this study is currently part of NOW. The definitions used were:

- Inflow is stormwater that entered the sewerage system through direct ingress from illegal connections of roof drains, back yards and low gullies, manhole covers, surface water drain connections etc.
- Infiltration is stormwater that entered the sewerage system as a result of damage to the sewers due to cracking, breakage, open joints and broken junctions etc. Infiltration can occur in dry weather as well as wet weather if the pipes are below the water table, or adjacent to a streambed

The main issues identified with regards to inflow and infiltration are:

- Wet weather inflow and infiltration (I/I) caused by a combination of illegal connections, defective pipes and access chambers; and
- · Wet weather hydraulic loads and associated operational impacts on STPs.

The primary strategies for reducing I/I are:

- Education of plumbers and the general public regarding illegal connections; and
- Inspection of sewers to find damaged areas; and
- Smoke testing to find illegal connections.

Currently, during large, infrequent wet weather events, surcharging/overflows occur at the STP inlet works. This problem is being addressed through the inflow/infiltration program.

Blayney Shire Council SBP for Sewerage

### 8.3.2 Trade Waste Management

The treatment system functions can be jeopardised by shock loads of high nutrient or high biological oxygen demand wastes or toxic chemical loads. These loads are more likely to come from trade waste than domestic waste. Therefore, Council needs to assess the current levels of liquid trade waste discharges by non-residential customers into the town sewer system.

Council needs to review and update its trade waste policy and regulatory framework to control commercial and industrial discharges into the system. The policy is to be fully implemented in accordance with NOW guidelines by June 2014.

Further, as industry develops, trade waste policy will be reviewed to outline service expectations to developers, targeting in particular, chemicals, fuels, oils and hospital discharges and would start with a survey to determine the contributors.

Council plans to address the following main issues in this regard by updating the trade waste register and implementing trade waste policy to protect the sewers and STP from the impacts of high strength waste discharges.

Page 28

Blayney Shire Council SBP for Sewerage

## 8.4 Pricing

This section of the Plan outlines Council's intentions regarding the pricing of sewerage services.

Council's pricing policy will conform to the following general principles:

**Equity** - adoption of user pays principles. Residential and non-residential revenue to be collected via a two-part tariff which reflects the level of water used and hence the load on the sewer system. (It is considered equitable that people pay for the cost of the services they use).

**Financial** - provision of adequate cash flows to meet operating costs and to fund future capital works (as determined in the financial plans).

**Customers** - provision of a service of desired quality and reliability at a fair and affordable price.

Cross subsidies - should be fully disclosed in Council's reporting.

**Community service obligations** - provision of services to pensioners, disadvantaged groups and general community amenities, to be recognised.

**Other** - simplicity of pricing structure for ease of understanding by customers and stability of income.

### 8.4.1 Sewerage Charges

Best Practice Pricing Guidelines for sewerage services recommend adoption of two-part tariff structure for non-residential customers that has features such as:

- Uniform annual charges for residential customers
- A two-part, access and usage charges for non-residential customers;
- Trade waste charges for identified commercial and industrial customers; and
- Assessment and adoption of appropriate sewage discharge factors for commercial and industrial customers

The best practice tariff structure provides revenue stability and sustainability for the sewerage services and sends signals to business and industrial customers to conserve water as a resource.

The current non-residential sewerage charges do not comply with the current Best Practice recommendation. Council's sewerage charges are shown below.

Table 8-5: Charges for Blayney Sewerage Services

| Residential:                         |              |
|--------------------------------------|--------------|
| - General                            | \$496/year   |
| <ul> <li>Vacant/unmetered</li> </ul> | \$256/year   |
| Non-Residential*                     |              |
| Access charge (20mm water service)   | \$436/year   |
| Access charge (25mm water service)   | \$676/year   |
| Access charge (32mm water service)   | \$1,108/year |
| Access charge (40mm water service)   | \$1,732/year |

| - Vacant/unmetered  | \$701/year            |
| - Usage charge (\$/KL)  | \$1.15                |
| The charges are adjusted for discharge factor and are subject to<br>a minimum total annual charge equivalent to occupied residential<br>charges |                       |

Blayney Shire Council SBP for Sewerage

### 8.4.2 Developer charges

Developer Charges are up-front charges levied under Section 64 of the Local Government Act to recover part of the infrastructure costs incurred in servicing new developments or additions/changes to existing developments. Developer charges serve two related functions:

- They provide a source of funding for infrastructure required for new urban development.
- They impact on the costs of urban development and thus encourage less costly forms and areas of development.

Current developer charges are shown below.

Table 8-7: Developer Charges

| Siervice | Area    | 20112/20113 |
|----------|---------|-------------|
| Cause    | Blayney | \$2,367     |
| Gewei    |         | \$6,215     |

Council's Development Servicing Plan (DSP) is currently under review in accordance with NOW Developer Charges Guidelines. Council intends to adopt the DSP in 2015.

Blayney Shire Council SBP for Sewerage

## 8.5 Customer Relations

Council aims to maintain good customer relations through the:

- provision of a quality service,
- keeping customers informed of Council's intentions,
- responding to customer and community needs

Council believes it operates a service that is reliable, has a good level of service and provides a quick response to problems.

Customer satisfaction is measured in a variety of ways to suit the circumstances and to give a valid indication of the extent to which customers feel satisfied with the type, quality, cost and performance of service provided. Keeping customers informed is agreed by Council to be important for good customer relationship. Council has adopted a 'Complaints Policy' and developed and adopted a detailed complaints handling and resolution procedure. It also maintains requests and complaints register that classify and record requests and complaints, these are analysed to identify where conditions are deteriorating. Actions should then be seen to be taken to improve these situations.

Council promotes a customer focussed, socially responsive communications culture for service provision issues.

Regarding customer relations, Council currently:

- Undertakes regular staff training on customer relations procedures.
- Included sewerage information in the regular Council new section of the local newspaper, examples include updates on major construction project
- Public meetings through monthly report at Council meetings
- Customer surveys project specific e.g. IWCM
- Customer contact phone and front desk
- Public display of Management Plans, Annual Reports and Business Plans
- Information brochures and flyers
- Council website

Adherence to the published levels of service is important and notification of any planned failure to comply should be given wherever possible. Performance monitoring and reporting is very important for updating and review of the Strategic Business Plan.

In order to carry out Council's mission to focus on the community expectations, a level of communication is required so that the community is satisfied that the Council's decisions are responsive to their needs.

Page 34

## 8.6 Community Involvement

This section of the Plan outlines Council's intentions in involving the community in decision-making during the development of major infrastructure schemes. Community consultation is not only highly desirable in terms of major capital works, but there are requirements under the Environmental Planning and Assessment Act and the Local Government Act, which need to be satisfied. The aims of community consultation are to:

- Develop ownership of the service delivery issues by the community, and to gain agreement that action is required;
- Ensure that the concerns of the community, particularly social and environmental concerns, are taken into account;
- Allow the community to propose options it wants evaluated and ensure that the costs associated with decisions are acceptable; and
- Demonstrate to the community that Council is making the best decisions after the proper evaluation of all the issues.

Development and review of the Local Environmental Plan, sewage treatment process improvements, revision of tariff structure and developer charges, all benefit from direct involvement of the community. Periods of public display, public comment and notices to ratepayers and business groups to advertise the opportunity to comment are typical consultation processes.

Methods that Council uses to consult the community include:

- Project specific advisory committees (e.g. IWCM)
- Community meetings (as appropriate)
- Public meetings and village tours (as required for example school trips to the STP)
- Public forum at Council meetings
- Councillors' feedback
- Newsletters/Media

The following aspects are considered when undertaking community consultation:

- Members of community who are not directly affected by a project may also have concerns;
- There must be a balance between due process and risks in order that a satisfactory level of progress can be maintained; and
- While community consultation on projects is highly desirable, it can be a lengthy and costly process. Project lead times and budgets need to be programmed to take account of this.

Proposed sewerage issues that Council will consider for community consultation include:

- Service extension under the LEP
- Section 64 charges review

Council intends to maintain the existing methods of consultation for all major capital works or decisions.

Council's current objectives and actions with regards to community involvement are shown below.

Page 36

Blayney Shire Council SBP for Sewerage

# 9 Environmental Protection and Sustainable Development

The Environment objective addresses Council's intentions in managing the sewerage scheme to minimise the impact on the environment, protect environmentally sensitive areas and promote ecological sustainability.

It is recognised by Council that a responsible, region-wide approach to environmental protection and sustainable development is needed. Council's vision is to conserve and enhance the natural environment through sustainable management practices. Council's program will focus on identifying sensitive areas and undesirable outcomes. The driver is simply the need for the improvement of existing practices. As part of Council's due diligence, the following will be considered:

- Achieving environmental objectives should strengthen, not threaten the local economy; and
- Local knowledge and enthusiasm for sustainability should be harnessed.

The table below summarises the 'state of the environment' in regard to sewerage operations.

| Receiving<br>Environment | Location                                   | Activities<br>impacting on<br>the<br>environment                         |   | Response of the Council/<br>Government/ Community   |

Blayney Shire Council SBP for Sewerage

# 10 Total Asset Management Plan

This section contains information that Council will use in managing its sewerage assets throughout their whole life cycle. This includes asset creation, operation, maintenance, replacement and disposal. The Best Practice approach to asset management is outlined in Figure 10.

Page 40

Current Government policy is directed towards lifecycle asset management. Solutions in the past have often been capital intensive so there is the potential to generally reduce capital works costs for councils over the long term. The 'best practice' flow chart describes a methodology for improving asset management planning. This model is not intended to reflect the structure of the Asset Management Plan but rather provides a guide for continuous improvement. Some of the benefits of implementing this model are:

- Appropriate asset solutions;
- Optimal balance of capital works and maintenance;
- Maximisation of asset life and utility; and
- Cost effective and sustainable asset management.

The type of asset portfolio involved in sewerage services warrants significant investment of resources for its management. Council intends to adopt a Total Asset Management (TAM) approach for the schemes' management to ensure that assets are managed as effectively as possible i.e. optimisation of the whole of the asset lifecycle rather than focusing on asset creation alone. Following the TAM Approach, this section of the business plan reviews and develops objectives and strategies for the management of:

- Operations;
- Maintenance; and
- Capital Works.

Each of these components of the Plan deals with separate issues relating to the Scheme, but since they are interlinked several combinations of structured and non-structured solutions could result in providing the same level of service.

The implementation of an asset management system by Council will provide a vital repository for Council's asset related information such as: asset location, aerial photographs, financial and asset costs, construction and acquisition details and other asset attributes such dimensions. Key functions of the system include:

- Maintenance history;
- Maintenance planning;
- Operations management;
- Asset condition rating and values;
- Capital works planning;
- Asset disposals; and
- Customised reporting.

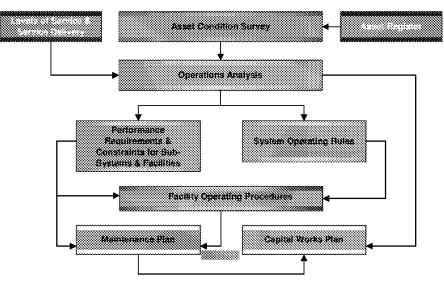

Anticipating the need for asset replacement is vital given the significant investment of resources involved and the need to ensure funds are available. Under the Total Asset Management approach a schedule of expected capital works is estimated into the future. Both current and projected capital works to satisfy future demands in terms of growth, improved Levels of Service and replacement of existing assets are identified. Appropriate operation and maintenance activities also are identified, to suit the desired level of service delivery. This includes documentation of the rules and procedures at system and facility level. All these details are used in the financial plan to ensure that required funds are available when needed.

Blayney Shire Council SBP for Sewerage

## 10.1 Operations Plan

This section of the Plan outlines Council's strategy for operation of the sewerage scheme in the future. The function of an operations plan is to ensure that the service objectives are achieved at the least cost, with minimal interruptions to services. This may be achieved through the process illustrated in Figure 11.

Provision of the agreed Levels of Service to customers is dependent on the efficient and effective running of operations. An operations analysis will form the interface between the operations and capital works plans by identifying what level of service the existing assets can provide and what additional works are needed to bridge any gap between existing and desired service levels.

The operations plan is based on knowledge of the system assets and as such, there are ongoing requirements for maintaining an appropriate asset register and for investigating the condition of key elements of the systems that affect the ability to deliver the desired Levels of Service. Contingency operations plans (emergency response plans) should be developed where the impact of failure is significant. The existing inspection and maintenance procedures are appropriate, however the utilisation of improved technology need to be investigated.

Asset condition surveys required include inspection for main breaks in the sewerage system and CCTV spot check inspection of sewer lines in the reticulation system. The Asset Register should be updated as an integral part of this recording process.

There are various documentation requirements for sewerage operations. Operating rules and procedures for both normal condition and breakdown contingencies need to be established. These should include system performance requirements and constraints, and cross reference to specific plant operations manuals (Water Directorate). Council recognises that a monitoring telemetry/ SCADA system leads to best operating efficiency and improves resource utilisation.

Page 42

Further operations planning requirements for the Council are:

- Completion of documenting system operating rules and performance requirements for all subsystems and facilities;
- Improving the Assets Management System to enable identification of conditions of assets from assets register and maintenance reports; and
- Compliance with Work Health and Safety (WHS) requirements.

Existing operational systems, processes and procedures routinely deliver services that comply with levels of service and regulatory requirements.

Rapid changes in the operating environment in terms of customer expectations, improved environmental outcomes, resource conservation, higher regulatory standards etc. will require commensurate improvements in operations.

Main operational issues include the following:

- Asset condition audit and monitoring program CCTV program
- Monitoring of operational performance
- Review and documenting of operating procedures for the STP and the effluent reuse scheme
- Weed control around STP site
- Sewer mains cleaning / root cutting
- Conducting a review of energy usage
- Conducting and implementing recommendations of a Safety Audit and complying with WHS regulations (last completed in 2009)

Council has developed a WHS Policy outlining the roles and responsibilities of all employees within the Council. As part of Council's ongoing commitment to Work Health and Safety requirements, all staff have been familiarised with the latest amendments to the WHS Act, Local Government Act 1993 and the Protection of the Environment (Operations) Act 1997.

Work health and safety hazards in sewerage operations include:

- Bacterial contamination
- Falling off structures
- Moving heavy mechanical parts
- Chemical exposure and handling
- Injuries due to sharps
- Electrical injuries
- Confined spaces

As part of Council's ongoing commitment to Work Health and Safety requirements, all staff have been trained in the relevant amendments to the WHS Act 2011, Local Government Act 1993 and the Protection of the Environment (Operations) Act 1997. The following table summarises Council's WHS performance during last 3 years.

Table 10-1: WHS Performance

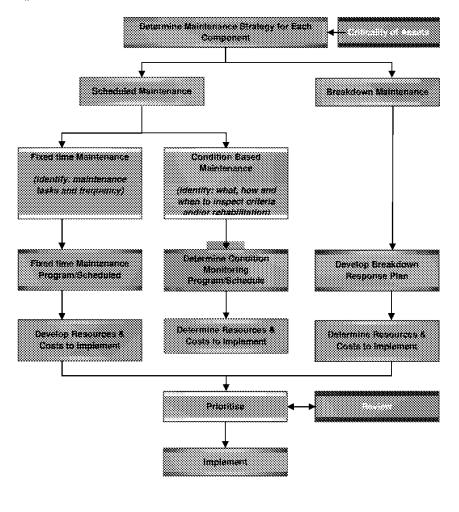

| Performance Indicator 2010/2011        |        |
|--|--------|
|  |        |
| Lost time due to injury (hours) NII    | Nil    |
|  |        |
| No. of Workers compensation claims NII | Nil N8 |
|  |        |

Blayney Shire Council SBP for Sewerage

## 10.2 Maintenance Plan

The Maintenance Plan is to ensure that the Operations Plan's outputs, reliability and availability of the sub-systems, facilities and components are achieved in the most cost effective manner. The most important factor is identification of the risk to system performance from failure of each asset. This leads to a minimum performance standard for each asset.

Figure 12 - Maintenance Flowchart

Page 44

Records should be kept of maintenance and operations requirements. The aim is to:

- Reduce delays or periods of reduced service;
- Determine the limit of acceptable substandard operation; and
- Determine the cost effective breakeven point.

The most cost effective strategy for each asset (either by class or individually depending on the asset) should be identified as either:

- Scheduled maintenance fixed time or condition based;
- Reactive maintenance failure based

The thrust of the Government's total asset management guidelines is to make the best use of existing assets by implementing systematic maintenance and rehabilitation plans. It could therefore be that increased maintenance costs will result from a critical review of the maintenance area. This in turn would be expected to be more than compensated for by a reduction in the need for capital works.

A complete assessment of the system is needed for the development of sound strategies to ensure the Levels of Service are not jeopardised by failure to address maintenance problems. A maintenance plan is needed to incorporate appropriate maintenance schedules and procedures. This should include references to specific plant maintenance manuals.

The Maintenance Plan has to consider the following information and issues on the existing system:

- Review and update the Maintenance manuals and the Maintenance Plan;
- Criticality analysis of systems to identify components of high risk and refine the maintenance strategy;
- Need for refresher training of key staff in dealing with mission critical functions;
- Maintenance has largely been on a fail and fix regime with no computer based maintenance management system. Asset audits power, fire, M&E, spares, general condition audits etc. are necessary.

The expansion of some programs will require resources and it is possible that current activities such as grounds maintenance could be outsourced to release resources.

## 10.3 Capital Works Plan

The capital works plan should make an assessment of scheduled work for growth, non-growth, and rehabilitation works over a 30-year period.

Figure 13 - Capital Works Flowchart

Blayney Shire Council SBP for Sewerage

The Capital Works Plan is of crucial importance because sewerage infrastructure is capital intensive and the construction and renewal of facilities can have a significant impact on Council's overall finances.

In the process of preparing the Capital Works Plan, the following points have been considered:

- The development of sewerage schemes is a long-term investment, and must be integrated with Council planning policies.
- The capital works strategy needs to be regularly updated to take account of changing conditions.
- Consideration of the costs and benefits of alternative options.
- Acceptance by the community of the development proposals and costs.

A summary of the 30-year capital expenditure program is shown in Section 12. On the forward budget for the sewerage scheme, the following specific capital works are addressed:

- Augment and upgrade Blayney STP capacity
- Aeration Tank Variable Speed Drives
- Lining/ Replacement of sewer mains
- Manhole rehabilitation program
- Telemetry upgrade

Further work is required to develop the capital works projections however the level of cost based on the current short term program and estimates for renewals in line with depreciation, provide an acceptable order of costs for the purposes of this Plan.

#### Table 10-3: Objectives & Actions - Capital Works

## 11 Workforce Plan

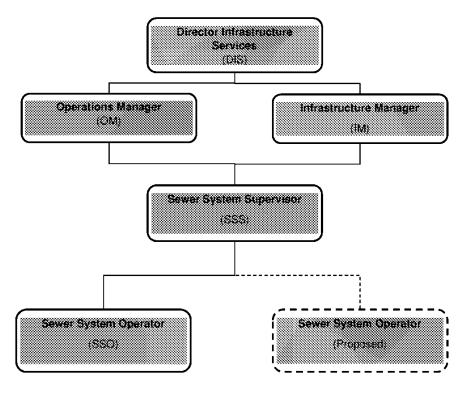

The aim of the Workforce Plan is to ensure that Council has the appropriate staff numbers with the necessary skills to meet current and future requirements. If these are in order, Council's Levels of Service can be met.

As part of the Work Force Plan, Council will ensure the following:

- Operators are familiar with all current practices including WHS requirements;
  - Up to date training program is in place for all staff (in particular training the treatment plant operators);
- There is succession planning for senior technical staff;
- Reviewing of job appraisal and jobs award scheme; and
- Additional resources including Trainee/ Apprentice for servicing new schemes as required.

Council's current Infrastructure Services Sections consists of 5 staff, who together operate and maintain the sewerage scheme. The organisational structure of Council's sewerage section is shown on the following page.

# 12 Financial Plan

## 12.1 Overview of Financial Planning

The purpose of the Financial Plan is to enable Council to determine the revenues needed to meet the Levels of Service over the long term and effectively manage the cash flow.

Legislation requires separate accounting for sewerage services and the elimination of cross subsidies from Council's General Fund or other areas. Any cross subsidy deemed necessary by Council should be explicitly noted.

Council's commitment to provide the Levels of Service described in this document requires collection of revenues of the order shown in the detailed tables and graphs in Appendix G. Estimates of the cost of activities in the action plan have been modelled using the NSW Financial Model (FINMOD) issued by the NSW Office of Water (NOW) and represent the best projection of future costs possible at this time. Actual billings will depend on the levels of developer charges and pricing structure adopted.

Generally, recurrent operating costs should be covered by the annual sewerage charges.

Capital funds are drawn from the following four sources:

- Developer charges;
- Government grants;
- Annual sewerage charges / cash; and
- Borrowing.

In accordance with the NOW Financial Planning Guidelines, Council will develop its longterm financial models and establish a steady price path. The financial model forecasts will be used in setting up the tariff structure in accordance with the NOW August 2007 Best Practice Management Guidelines.

Council's objectives and actions with respect to financial planning are outlined in the table below.

Table 12-1: Objectives & Actions - Financial Planning

Page 52

## 12.2 Financial Planning Process

The objective of financial planning is to develop full cost recovery models based on life cycle management. It models appropriate funding strategies for the preferred service planning option and projects a price path for residential charges against which to assess affordability in the long term.

By taking a long-term view, financial peaks and troughs can be smoothed to provide the basis for a consistent charging policy and to highlight any current impact of future actions. The new NSW Financial Planning Model (FINMOD Version 4.0), issued by the NSW Office of Water (NOW) in November 2003, has been used for this modelling. A 30-year planning horizon has been adopted as recommended in the NOW Best Practice Guidelines. It is assumed that any government grants will be available as expected by the Council.

In establishing the financial plan a number of scenarios are explored in order to determine the best funding strategy for sewerage. A minimum level of available cash is modelled to reflect risk of variable annual revenues to ensure the robustness of the price path for at least 4 years.

AAS27 reporting for the financial statements requires that all funds be declared as assets under cash and investments in the statement of financial position. Also, assets are valued on the basis of current replacement cost and depreciated according to their remaining lives compared with their expected lives.

All capital works estimates in the text are quoted in real (2013/14) dollars unless specified otherwise. The output data is quoted in real and inflated dollars.

When assessing affordability, note that a \$1 charge now will be equivalent to \$1.80 in 20 years' time, assuming a 3% annual inflation rate.

A summary of the input data and results are included in the following pages. Detailed financial input data and output financial projections are available in the Appendices.

## 12.3 The Financial Model

## 12.3.1 Inputs to the Financial Model

The financial model forecasts income streams to match projected expenditure. The diagram on the right illustrates the main elements, which affect the financial plan.

The financial modelling undertaken in this plan aims to:

- optimise the long term funding strategy,
- meet the demands of the capital works program and other life cycle costs of the system assets,
- ensure a minimum level of cash liquidity, and
- provide a forecast of the typical residential annual charges over the long term.

Blayney Shire Council SBP for Sewerage

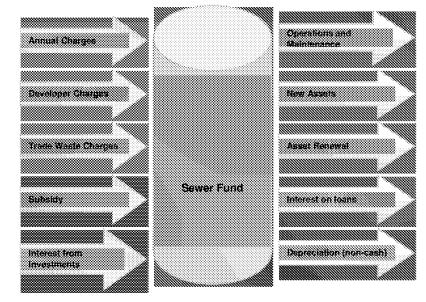

Figure 15 - Elements of the Financial Model

Input data for the model is sourced from three main areas:

- AAS27 special schedules for past financial performance of the sewerage fund
- Estimates for uncontrollable variables e.g. interest rates, growth, inflation
- Projected capital works, and operations and management expenses

All other criteria being met, the financial plan seeks, after an initial adjustment, to model, in real dollars, the lowest steady level of charging possible. Actual bills will depend on Council's pricing structure but this is indicative of the affordability of the services and shows the performance requirements for long-term stability.

A number of variables and assumptions have to be entered into the model and these are first agreed to by Council. They include:

### **Opening Balances**

Council's special accounting schedules are used to establish opening balances and baseline costs for the model. Financial statements for the last two years are compared to try to eliminate 'one off' occurrences from being incorporated as part of a normal trend.

#### **Developer Charges**

Council is planning to review and adopt a revised level of developer charges in accordance with NOW Best Practice Management Guidelines from January 2014 onwards. For modelling purpose, average revenue of \$45K/year to sewer fund through Section 64 developer charges has been considered.

### **Growth Projections**

A customer service growth rate of 1.2% p.a. and has been adopted for the financial projections.

Page 54

### Inflation

Average long-term inflation has been assumed as 3.0% per annum.

#### **Interest Rates**

A borrowing rate of 6.5% p.a. and an investment rate of 5.5% p.a. were used in this analysis

#### **Annual Revenue Splits**

For sewerage services, residential charges currently account for 78.2% of the sewerage revenue through annual charges. Remaining 21.8% revenue is contributed by non-residential customers.

The same level of revenue split has been used for all the forecast years.

#### Performance Measures

Council's minimum service criteria will have an impact on the level of charges required e.g. minimum cash level is generally assumed to be between 10-20% of annual revenues (excluding restricted revenues). For the financial model, \$250K (2013/14\$) for sewer fund has been considered as minimum cash level.

#### **Expected Lives of Assets**

The default average life of system assets is based on the weighted average of long-lived structures and shorter-lived mechanical plant. The average life of sewerage assets is currently estimated to be approximately 60 years. The life of assets controls the depreciation, which is a non-cash expense. It directly affects the need for future asset renewal works planned, which is part of the capital works program.

#### Grants and Subsidy for Capital Works

The State Government provides financial assistance to local government sewerage schemes through the Country Towns Water Supply and Sewerage Program. Councils can apply for funding of up to 50% of Improved Level of Service (ILOS) capital works. These days allocation of grant funds works on a priority scoring carried out by NSW Office of Water.

Financial model for sewer fund considered that no grant/ subsidy will be available for any of the capital works identified in the 30-year capital works program.

# Ongoing Recurrent Costs: Management, Operations and Maintenance

By default, the model increases historical operation and maintenance expenses on a pro rata basis with respect to growth. This has been overridden where Council provided revised estimates i.e. where the action plan requires new initiatives or where new works require additional operating resources.

The capital works plan and projected operations and management expenses also form a significant component of the inputs. These are shown in the section 'Projected Cost Schedules'.

Blayney Shire Council SBP for Sewerage

### Assumptions and Limitations

The projections of the financial plans are based on past financial performance. Allowance is made for new initiatives, future rate forecasts, and maintenance of sustainable levels of service as identified in the strategic planning process.

The depreciation is shown in the operating statement but this is not a cash item. The financial planning model manages the cash flow but keeps a running tally of cumulative depreciation so that Council can appreciate the potential future liability for maintaining the value in the system and levels of service. By planning ahead and making optimum use of existing assets, a more cost-effective and efficient service should result.

Typical annual residential charge is used as the performance measure representing overall revenue requirements from residential customers. This should not be confused with pricing. Pricing, i.e. distribution of the charges according to consumption or special customer groups, is the subject of a separate revenue planning exercise.

The financial model is not a substitute for normal budgeting (that is, short-term financial planning). The model assumes that all expenses and income occur at the beginning of the year and is therefore not appropriate to track cash flow throughout the year. It is important, however, that the budgeting process is carried out within the framework of the long-term financial plan.

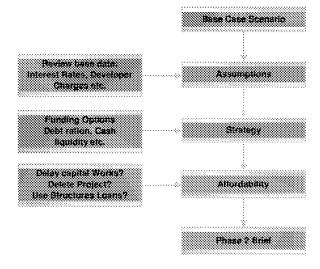

The Capital Works Plan provides a guide for estimation of long-term operation and maintenance costs. It is accepted that the level of confidence in these projections reduces with time but it is important to identify as many future commitments and liabilities as possible.

## 12.3.2 The Modelling Process

## 12.3.3 Phase 1 – Initial Runs

The objective of Phase 1 development is to present a first cut model of options for future service provision. Comparison of outcomes enables Council to make decisions as to the preferred model and the most beneficial and practical funding solution for the proposed asset management programs.

Page 56

#### Figure 16 -- Phase 1 Review of the Financial Model

### Funding

In considering funding for future options there are three basic options:

- Fund all capital works from revenues.
- Borrow to fund all capital works.
- Fund capital works from a mix of borrowing and revenue

To establish the lowest level of steady rate of typical residential bills in reals terms a combination of cash management and borrowing will usually be required. The model outputs demonstrate the required financial management required to keep the plan "on track".

Where capital works costs are low and cash levels are high it may be possible to avoid borrowing but this may also suggest that current charges are too high. Longer period loans spread the cost of works over a longer period, eliminating early peaks in annual charges. Often there may be no choice except to borrow for major projects because collecting sufficient cash in advance is impracticable and would require an unacceptably high level of charges. In the Phase 1 runs of the model, the default loan period used was twenty years.

### 12.3.4 Phase 2 – Preferred Model and Sensitivity

After consideration of Phase1 issues preferred modelling options for sewer fund has been adopted.

While the preferred model reflects the expected performance of the systems, it does not give any indication of the sensitivity of the proposed solution to the basic assumptions used, for example if the conditions prove significantly different in practice, there will be no information about the implications of the difference.

Sensitivity analysis has been carried out if it is perceived that a model variable may change significantly in the future. The value of a sensitivity analysis is that it shows:

- The sensitivity of the results to assumptions (uncontrollable variables); and
- The impact of changing controllable variables.

The guidelines suggest that a number of sensitivities be carried out to test the robustness of the plan. In regard to controllable variables, such as type of loan structure, level of developer charges etc. the model enables Council to make decisions to establish the right management policies.

It is important to demonstrate the impact of the "no subsidy" scenario, which shows the potential benefits of government assistance. Council's expectations for receiving subsidy are included in the final preferred model as being the most realistic future scenario.

With uncontrollable variables, Council is at the mercy of change. The downside risk of an increase in interest rates, or declining growth rates, or rise in energy costs, may be considerable.

## 12.3.5 On-going Review

Over time, changes in model variables can have a significant impact on the model's accuracy and this has implications for Council's forward planning. To maintain currency the model is to be revisited annually.

## 12.3.6 Model Inputs

#### **Projected Costs**

Projected capital costs are split into three categories (Table 12-2) and the projected recurrent costs include management, operation and maintenance costs as shown in (Table 12-3).

| Category          | Description  |
|-------------------|--|
| Growth Works      | Works required to increase the capacity of facilities e.g. to service new        |
|                   | subdivisions   |
| Improved Level of | Works to provide better public health and environmental standards, better        |
| Service Works     | service, higher reliability, or an extension of services to un-serviced existing |
| (backlog works)   | development.   |
|                   | Works in this category may be eligible for Government grants.                    |
| Asset Renewal     | Renewal/replacement of existing assets, which have aged and reached the          |
| Works             | end of their useful life.  |

#### **Table 12-3: Categories of Projected Recurrent Costs**

| Calegory                      | Description  |
|-------------------------------|--|
| Management                    | Reflects true overheads associated with providing this service. Any cross<br>subsidies with General Fund should be eliminated or explicitly disclosed in<br>the Annual Accounts.   |
| Operations and<br>Maintenance | It is assumed that the current level of costs shown in the Financial<br>Statements reflects a realistic level of expenditure for the current schemes.<br>The projections assume costs increased in proportion to the growth. |
| Model Cost<br>Overrides       | Additional costs are included where specific activities have been identified in<br>future years. This includes new initiatives plus additional costs associated<br>with new Capital Works.                                   |

Page 58

The expected capital and recurrent cost expenditures are presented in Appendix E. A summary of capital works program including subsidies/grants, if any, is presented in Table 12-4. Projections are in real (2013/14) dollars.

Historical and additional input data used for financial forecasts are shown in Appendix F.

Blayney Shire Council SBP for Sewerage

## 12.4 Outcomes of Financial Modelling

In line with current NOW guidelines, the financial plan identifies the lowest stable typical residential bill required with maximum utilisation of existing cash reserves. A number of scenarios have been analysed before Council adopting a 'preferred' price paths for the sewerage services. Modelling outcomes of the preferred scenarios and the sensitivity of the model forecasts for the financial parameters identified as important are presented in this section.

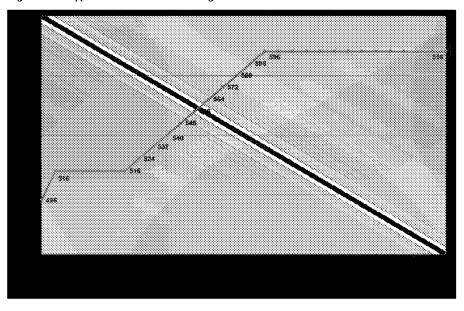

Financial modelling has demonstrated that the typical residential sewerage bill for sewerage services, measured in 2013/14 dollars, has to be increased to \$516 p.a. in 2014/15 and can be maintained the same for the next 5 years i.e. till 2019/20. Thereafter, the TRB needs to be increased by \$8 per year to \$596 p.a. in 2029/30 as shown below:

- TRB for 2014/15 \$516 p.a.
- TRB for 2015/16 to 2019/20 \$ 516 p.a.
- TRB for 2020/21 \$ 524 p.a.
- TRB for 2029/30 \$ 596 p.a.

From 2029/30 onwards, the TRB can be maintained at the same level for the remainder of the forecast period. It should be noted that the financial model considered that residential customers of Millthorpe will also be paying the same level of TRB as for Blayney.

Note the forecast TRBs are to be adjusted annually for CPI/inflation and the financial model will be reviewed for updating the forecasts after 3 years in accordance with the NOW Best Practice Guidelines.

Figure 17 - Typical Residential Sewerage Bill

This level of typical residential charges for sewerage services is sufficient to maintain liquidity with a minimum of \$250K of cash in hand over the period.

New external borrowing of \$4.5 Million will be required for the Blayney STP capacity augmentation works planned to start in 2031/32. The borrowing outstanding at the end of the 30-year forecast period will be \$2,030K.

The levels of cash and borrowing outstanding as the planned capital works program is implemented during the forecast period are depicted in the following figure.

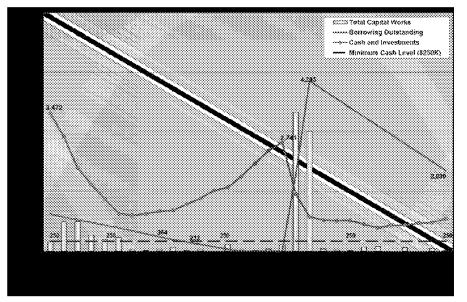

Figure 18 - Cash and Borrowing Projections - Sewerage

A summary of projected financial results is presented in Table 12-5. Detailed financial projections of Council's 'preferred scenario' for the sewer fund are shown in Appendix G.

Blayney Shire Council SBP for Sewerage

Table 12-5: Projected Financial Results

## Sensitivity Analysis

In accordance with the NOW Financial Guidelines, the following sensitivities have been modelled to determine the impact of various scenarios on typical residential bill for sewerage services.

| Criteria                | Preferred Case Sensitivity |
|-------------------------|----------------------------|
| Assessment growth rate  | 1.2% p.a. 0.5% p.a.        |
| Borrowing Interest Rate | 6.5% p.a. 10.0% p.a.       |
| Sec.64 Revenue          | \$45 K/year \$25 K/year    |

The results of sensitivity analysis are shown graphically in the following pages.

Page 62

Figure 19 -- Sensitivity of Typical Residential Bills

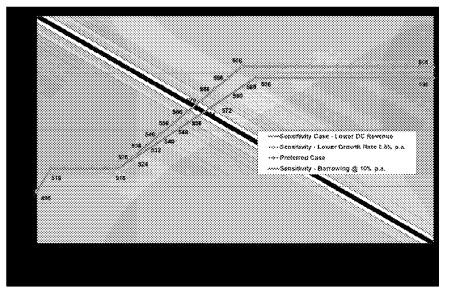

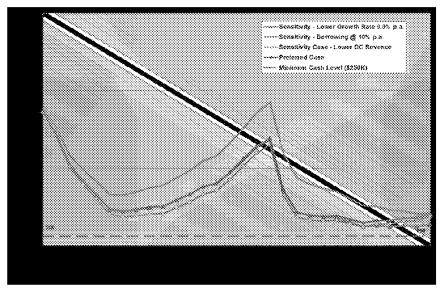

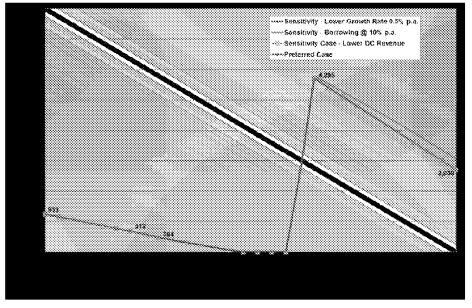

Figure 20 - Sensitivity of Cash Levels

Blayney Shire Council SBP for Sewerage

Figure 21 - Sensitivity of Borrowing

Sensitivity analysis indicates that the typical residential sewerage bills will not affected by higher borrowing interest rates of up to 10% p.a.

Lower assessment (customer) growth rate (0.5% p.a. instead of estimated 1.2% p.a.) and lower se.64 charges revenue will have a slight impact in the order of \$10 /year increase instead of \$8/year of the projected TRB for the preferred scenario during the 10 year period between 2020/21 and 2029/30.

# Appendix A Inputs for Reporting under IPR Framework

Blayney Shire Council SBP for Sewerage

Page A-1

The main requirements of the Local Government Integrated Planning and Reporting Framework 2010 for the 10-year Community Strategic Plan, 4-year Delivery Program, Annual Operational Plan and Annual Report are summarised below. Inputs for sewerage services for inclusion in each of these reports are also presented alongside the summaries.

# A.1 Community Strategic Plan

The requirements for the Community Strategic Plan in the IPR framework include:

- To be revised at least every 10 years.
- Give due regard to the State Plan and other relevant state and regional plans.
- Include a community vision statement.

The planning process is generally used to:

- Identify main priorities and aspirations for the future.
- Enable community input on the identification of social, environmental, economic and civic leadership issues.
- Establish strategic objectives and proposed strategies to achieve those objectives that address issues identified above.
- Establish expected levels of service.

### Input to Community Strategic Plan

For sustainable sewerage services the Strategic Business Plan (SBP) for Sewerage will be reviewed and implemented in accordance with the NSW Government's Best Practice Management of Water Supply and Sewerage Guidelines, August 2007.

Major sewerage capital works identified in the current Strategic Business Plan for completion over the next 10 years are shown in the Table below. The justifications for why these works have been planned also are presented in the Table below.

| Proposed Capital Work                    | Yest        | Justification  |
|--|-------------|--|
| Lining/ Replacement of sewer mains       | 2013 - 2019 | Renewal and returbishment of ageing<br>assets              |
| Manhole rehabilitation program           | 2014 - 2019 | Improved levels of sewerage service and<br>STP performance |
| Telemetry upgrade                        | 2014/15     | Improved scheme operation for better<br>performance        |
| Millthorpe transfer main<br>augmentation | 2014 - 2016 | Refurbishment of ageing assets                             |

# A.2 Resourcing Strategy

Sets out what Council will do over the next 10 years to address the community's main priorities in the Community Strategic Plan. Council determines its Resourcing strategy from the following:

- Total Asset Management Planning;
- Work Force Planning; and
- Long-term Financial Planning.

Page A-2

### Input to Resourcing Strategy

"The SBP for Sewerage is the Council's resourcing strategy for sewerage services in which the strategies for Asset Management Planning (AMP), Work Force Planning (WFP) and the Long-term Financial Planning are presented in detail".

Note regarding the AMP and WFP, the SBP details the current status and key outcomes and detailed reference is from the individual planning documents

## A.3 Delivery Program

- Directly addresses the objectives and strategies of the Community Strategic Plan.
- Identifies principal activities council will undertake.
- Identifies principal activities be undertaken within available resources.
- Provides financial estimates for the 4 year period.
- Considers priorities and expected level of service in the Community Strategic Plan.

### Input to Delivery Program

"The SBP for Sewerage (Sections 8 to 11) is the Council's delivery program for sewerage services where in the objectives, strategies, activities planned for the next 4 - 5 years including the costs, start and end dates and responsible officer are presented in detail. The financial estimates for the next 4 year period are presented as part of the 30-year financial projections of the Long-term Financial Plan".

## A.4 Operational Plan and Annual Report

- Operational Plan outlines the activities to be undertaken for the year as part of the Delivery Program and is prepared as a sub-plan of the Delivery Program
- Operational Plan includes Statement of Revenue Policy fees and charges, pricing methodology, proposed borrowings, and detailed budget for activities to be undertaken in the year.
- Annual Report is a report to the community which outlines council's achievements in implementing the Delivery Program as planned in the Operational Plan.
- Annual Report outlines the effectiveness of the principal activities undertaken in achieving the objectives in the Community Strategic Plan.

### Input to Operational Plan

"The SBP for Sewerage (Sections 8 to 11) is the Council's operational plan for sewerage services in which all the planned activities for delivery program are presented in detail".

Blayney Shire Council SBP for Sewerage

This is Page No. 138 of the Attachments Paper of the Ordinary Meeting of the Blayney Shire Council held on 9 February 2015

# Appendix B Legislation Affecting Sewerage Services

Blayney Shire Council SBP for Sewerage

Page 8-1

# B.1 Legislative Framework

Blayney Shire Council delivers reticulated sewerage services to the Blayney and Millthorpe communities under the authority of the Local Government Act, 1993. Council has embraced the principles underlying this Act as being of benefit to the community it serves. Community consultation and involvement in decision-making has been increased in line with the Act in the last few years.

Several other Acts also affect Council's scheme. These generally fall into three main categories as follows:

| Act   | General Implications for Council   |  |
|---|--|--|
| PRICING   |  |  |
| Local Government Act 1993                                     | - Determining developer charges:   |  |
| Esp. Sections 64 and 428                                      | <ul> <li>provide a source of funding for infrastructure<br/>required for new urban development</li> </ul>  |  |
|   | <ul> <li>provide signals regarding costs of urban<br/>development and encourage less costly forms</li> </ul>   |  |
|   | <ul> <li>Need to be more accountable.</li> </ul>   |  |
|   | <ul> <li>Need for better asset management.</li> </ul>  |  |
| Environmental Planning and<br>Assessment Act 1979             | Determining developer charges.   |  |
|   | <ul> <li>Requirement for LEP and DCPs</li> </ul>   |  |
|   | <ul> <li>Council control of service approvals.</li> </ul>  |  |
| Local Government Regulation - 2005 (Savings and Transitional) | - Determining developer charges  |  |
|   | <ul> <li>Gives powers to the independent Pricing and Regulatory<br/>Tribunal to inquire into and regulate prices.</li> </ul>                                     |  |
| Independent Pricing and<br>Regulatory Tribunal Act 1992       | IPART has developed a set of consistent pricing<br>principles to be adopted by local government authorities.   |  |
|   | <ul> <li>Guidelines for 'user pays' charging system in the water<br/>and wastewater industry.</li> </ul>   |  |
| Water Industry Competition Act 2006                           | Establishment of third-party access regime for water and sewerage infrastructure to encourage competition  |  |
|   | <ul> <li>Authorisation of IPART to regulate licensed private<br/>network operators to ensure services are delivered in a<br/>safe and reliable manner</li> </ul> |  |
| ENVIRONMENTAL<br>PROTECTION                                   |  |  |
| Protection of the Environment<br>Operations Act 1997          | <ul> <li>Regulating pollution activities and issue of licenses as<br/>well as the monitoring of and reporting on waste output.</li> </ul>                        |  |
|   | <ul> <li>Council is required to be "duly diligent" in undertaking the<br/>scheme operations</li> </ul>   |  |
| Soll Conservation Act 1938 -                                  | <ul> <li>Conserves soil resources and farm water resources and<br/>the mitigation of erosion and land degradation.</li> </ul>                                    |  |
|   | <ul> <li>Preservation of watercourse environments</li> </ul>   |  |
| Environmental Planning and<br>Assessment Act 1979             | Encourages the proper management of natural and man-<br>made resources, the orderly use of land, the provision of<br>services and protection of the environment. |  |
| Catchment Management Act<br>1989                              | <ul> <li>Promotes the coordination of activities within catchment<br/>areas. Council believes this Act has implications for the</li> </ul>                       |  |

Page 8-2

| Act  | General Implications for Council   |
|--|--|
|  | management of river water quality and quantity   |
|  | <ul> <li>Requirement for ongoing management plan.</li> </ul>   |
|  | <ul> <li>Requirement of Capital Works Plan under Sydney<br/>Catchment Authority Regulations.</li> </ul>                          |
| HEALTH AND SAFETY                                      |  |
| Public Health Act 2010                                 | <ul> <li>Prevention of the spread of disease.</li> </ul>   |
|  | <ul> <li>Effluent disposal methods.</li> </ul>   |
| Work Health and Safety Act 2011 (and Regulations 2011) | <ul> <li>Council's responsibility to ensure health, safety and<br/>welfare of employees and others at places of work.</li> </ul> |
|  | - Likely be cost implications  |
|  | - Impacts all operations.  |
|  | <ul> <li>Note public safety – insurance.</li> </ul>  |

### Local Government Act 1993

The main purpose of the Local Government Act 1993 is to provide the legal framework for an effective, efficient, environmentally responsible, and open system of Local Government in NSW.

The Act is, in the main, administered by the Minister for Local Government, but the Minister for Water has significant powers under the Act for water, sewerage and drainage.

The Act confers service functions on Councils. These include the provision, management and operation of water supply and sewerage works and facilities. The Act provides Councils with broad power to carry out their functions, and a "Council may do all such things as are supplemented or incidental to, or consequential on, the exercise of its functions" (section 23 of the Act).

Some particular parts of the Act relating to water supply and sewerage are:

- Section 64 developer charges (Under this section of the new Act, a Council may
  use the relevant provisions of the Water Management Act 2000 to obtain water
  supply and sewerage developer charges. The provisions of Section 94 of the
  Environmental Planning and Assessment Act are no longer available to Councils
  for obtaining water supply and sewerage developer contributions.);
- Section 68 Council approval of plumbing works;
- Sections 634-651 water supply, sewerage and drainage offences; and
- Water, Sewerage and Drainage Regulation which cover matters from the "old" ordinance 4.5 and 4.6.

The role of the Minister for Water in regard to water supply, sewerage and drainage is covered in Sections 56-66. The Minister's role is generally along the lines of Part XIV of the 1919 Act, and it includes matters such as construction of works, hand over and vesting of work, approval of dams and treatment works, directions to Councils concerning dams and treatment works, action during emergencies, and the appointment of an administrator.

The NSW Office of Water provides section 60 approvals to council proposals to construct a dam, water or sewage treatment works and for effluent and bio-solids reuse.

The NSW Office of Water carries out section 61 inspections of LWU dams and water and sewage treatment works.

Blayney Shire Council SBP for Sewerage

Page B-3

The NSW Office of Water provides concurrence to Council liquid trade waste approvals under section 90(2) of the Act.

Councils issue approval to applications to discharge trade waste to their sewerage system under section 68 of the Local Government Act. Conditions of approval are imposed under clause 32 of the Local Government Regulation 2005.

#### **Environmental Planning and Assessment Act 1979**

The Environmental Planning and Assessment (EP&A) Act was enacted in 1979, and amended by the Environmental Planning and Assessment (Amendment) Act (1985). The Act is the principal planning instrument in NSW, and it specifies the environmental considerations required in all development activities. It also governs the procedures of all proposals that have an effect on the environment. Its objectives are to encourage the proper management of natural and man-made resources, the orderly use of land, the provision of services, and the protection of the environment.

The Act is administered by the Minister for Planning.

The Act requires that all proposals, activities, and functions which are investigated, designed, planned, constructed, and operated by Councils should be studied during all stages for their environmental impact on the basis of scale, location, and performance.

Environmental studies are to be undertaken concurrently with the technical or planning investigations. The findings of environmental studies should be reported initially in Reviews of Environmental Factors (REF), which indicate the need for further studies, their extent and depth, and the degree of public or other involvement required. The REF can often be used for consents or approvals. A Council can give consents for a development as prescribed in Local Environmental Plans (LEP) when the Council are the consent authorities (Part IV of the EP&A Act).

An Environmental Impact Statement (EIS) is a comprehensive report compiled from extensive studies. An EIS is required for:

- designated developments (Part IV of the EP&A Act);
- projects which affect the environment significantly (Part V of the EP&A Act); and
- when designated by a State Environmental Planning Policy or in an LEP.

### Catchment Management Act 1989

The objectives of this Act are:

- To coordinate policies, programs and activities as they relate to total catchment management;
- To achieve active community participation in natural resource management;
- To identify and rectify natural resource degradation;
- To promote the sustainable use of natural resources; and
- To provide stable and productive soil, high quality water and protective and productive soil and vegetation cover within each of the State's water catchments.

The Act is administered by the Minister for Land and Water Conservation.

### Soil Conservation Act 1938

The objective of the Soil Conservation Act is the conservation of soil resources and farm water resources and the mitigation of erosion and land degradation.

The Act is administered by the Minister for Land and Water Conservation.

Under Section 21C of the Act, a Council is required to protect land along prescribed streams and to prevent any destruction of trees and soil erosion on protected land. The

Page 8-4

same section of the Act specifies the rules for any person or occupier or any protected land from ringbarking, cutting down, felling, poisoning of, or otherwise destroying, vegetation or trees.

Section 21D of the Act requires that the land owner or occupier must obtain an authority before damaging or destroying trees between the banks or within 20 metres of banks of a prescribed stream. Public Works is responsible for preparing inspection reports for sites downstream of the tidal limit.

Section 22 of the Act outlines requirements for preservation of proclaimed works and catchment areas.

### Public Health Act 2010

The Public Health Act 2010 replaced the Public Health Act 1991. The main objectives of the Public Health Act 2010 are:

- to promote, protect and improve public health;
- to control the risks to public health;
- to promote the control of infectious diseases; and
- to prevent the spread of infectious diseases.

The Act recognises the role of local government in protecting public health. Under the Act, a local government authority has the responsibility to take appropriate measures to ensure compliance with the requirements of this Act in relation to public swimming pools and spa pools, regulated systems and premises on which skin penetration procedures are carried out. A local government authority has the responsibility of appointing authorised officers to enable it to exercise its functions under this Act and ensuring that its authorised officers duly exercise their functions under this Act.

Part 3 Division 1 of the Act includes the provisions in respect to safety measures for drinking water.

The Minister for Health has the power to take actions and to issue directions, as the Minister considers necessary:

- to restrict or prevent the use of unsafe water, potable or otherwise, that is likely to be a risk to public health; and
- to bring unsafe water to such a condition that it is no longer unsafe water.

The Director General has the power to direct a supplier of drinking water to carry out testing and produce information in relation to the treatment and quality of drinking water.

The Chief Health Officer has the responsibility for determining the necessity for a boil water advice and additional information or correction or re-traction of such advice, by a supplier of drinking water for the drinking water it supplies. The Chief Health Officer may also prepare advice concerning public health risks or boil water advice, and provide the advice to the drinking water supplier.

According to the Clause 25 of the Act a supplier of drinking water must establish and adhere to a quality assurance program that complies with the requirements prescribe by the regulations. The regulations are yet to be enacted.

#### Independent Pricing and Regulatory Tribunal Act 1992

The Independent Pricing and Regulatory Tribunal Act establishes the Independent Pricing and Regulatory Tribunal and enables the Tribunal to determine and advise on prices and pricing policy for government monopoly services. A government monopoly service is a service supplied by a government agency (which may include a local

Blayney Shire Council SBP for Sewerage

Page 8-5

government council) and declared by the regulations, or the Minister, to be a government monopoly service.

The Tribunal conducts investigations and makes reports to the Minister on the determination of the maximum price and on a periodic review of pricing policies for services applied by these agencies specified in Schedule 1 to the Act. Schedule 1 presently includes Sydney Water Corporation, Hunter Water Corporation, Water Supply Authorities, including Gosford City Council, Wyong Shire Council, State Water (Fish River Water Supply) and Essential Energy (Broken Hill).

The Tribunal may also conduct investigations and make reports for any government monopoly service, at the request of the Minister, whether or not it is supplied by a government agency specified in Schedule 1.

### Work Health and Safety Act 2011

This revised Act details Council's responsibilities to ensure health, safety and welfare of employees and others at places of work. All of the scheme's operational activities are impacted on by this Act. This act is administered by the Work Cover Authority.

### Protection of the Environment (Operations) Act 1997

This Act came into effect in July 1998 and consolidated existing legislation to eradicate the duplication of powers and overlapping use of resources. The Act brought together what used to be five separate pieces of legislation:

- Clean Air Act 1961;
- Clean Waters Act 1970;
- Pollution Control Act 1970;
- Noise Control Act 1975; and
- Environmental Offences and Penalties Act 1989.

The POEO Act introduces a holistic approach to protecting the environment, changing from pollution control legislation to environment protection legislation.

The Act enables the NSW Government to set out explicit protection of the environment policies (PEPs) involving environmental standards, goals, protocols and guidelines.

Key features of the Act are as follows:

- Single licensing arrangement relating to air pollution, water pollution, noise pollution and waste management;
- EPA issues licences and is the regulatory authority for scheduled activities specified in Schedule 1 of the Act;
- Local councils are the regulatory authorities for non-scheduled activities except activities undertaken by a public authorities;
- EPA can issue licences to regulate water pollution from a non-scheduled activity therefore becomes the regulating authority;
- Environment protection notices that can be issued by appropriate regulatory authorities;
- The Act includes an offence regime and may involve heavy penalties and or gaol.
- The Act includes civil enforcement provisions for third parties.

The Act is administered by Office of Environment and Heritage.

The POEO Act is a powerful tool for regulation of sewerage and trade waste by local water utilities and facilitating compliance with the utility's conditions of approval for liquid trade waste discharges to the sewerage system.

Page 8-6

Councils may issue a penalty notice under section 222 of the Act to a discharger who fails to obtain an approval to discharge trade waste to the council's sewerage system or who fails to comply with the conditions of the council's approval. In addition, section 123 of the Act may be used to sue a discharger causing major damage to the council's sewerage system or to the environment

The legislation also incorporates major regulatory provisions of the Waste Minimisation and Management Act.

#### Water Industry Competition Act 2006

The objectives of the Act and supporting regulations are to encourage competition in the water industry and to foster innovative recycling projects and dynamic efficiency in the provision of water and wastewater services.

Increasing competition in the metropolitan water market and water recycling are key actions in the NSW Government's Metropolitan Water Plan and State Plan.

The Act provides for the matters such as:

- the establishment of a new licensing regime for private sector providers of reticulated drinking water, recycled water and sewerage services;
- the establishment of a third-party access regime for water and sewerage infrastructure;
- provisions for a licensed network operator to construct or remove water industry infrastructure; and
- provisions to authorise IPART to undertake regulatory functions in certain parts of the Act.

Key aspects of General Regulation include:

- ensuring new entrants and the public water utilities face similar obligations, where like services are provided;
- strict licensing rules to ensure that drinking water meets Australian standards, that recycled water is 'fit for purpose' and that all services are delivered in a safe, reliable manner with minimal environmental impacts; and
- provisions to prevent retailers from disconnecting small customers for nonpayment of debt and to require the implementation of NSW Government social policies, such as pensioner rebates.

Page B-7

# B.2 Other Government Initiatives

| initiative                  | Purpose   |
|-----------------------------|---|
| Efficient Operation         | The Department of Local Government is concerned that councils<br>generally are well managed.  |
| Efficient Resource Use      | The Federal Industry Commission Report on the Australian Water<br>Industry is concerned to ensure efficient use of resources - natural,<br>physical and financial. Its 1992 Report's recommendations were<br>wide-ranging and covered matters such as pricing reforms and<br>structural reforms (e.g. amalgamation of authorities).   |
| Competition Policy          | In 1995 the Council of Australian Governments (COAG) ratified the<br>National Competition Policy. Of particular significance to the water<br>and sewerage functions of Council is the application of competitive<br>neutrality to operations. The purpose of this is to have councils<br>"operate under similar competitive pressures to those experienced by<br>the private sector".                 |
|                             | The NSW Government has embraced these principles and set in motion a number of policies to increase the efficiency and the competitiveness of this type of business area. (Refer to the <u>NSW</u> Government Policy Statement on the Application of National Competition Policy to Local Government).  |
| Asset Management            | The NSW Government, which has ultimate responsibility for water and<br>sewerage in the State, is concerned to ensure that the \$7 billion asset<br>base in water supply and sewerage schemes of country towns under<br>the care of Local Governments is well managed.   |
| Financial Assistance        | The NSW Government has been providing grants for the development<br>and improvement of water supply and sewerage schemes in country<br>areas, under the Country Towns Water, Sewerage and Drainage<br>Program, which is now administered by the NSW Office of Water.  |
|                             | The Minister responsible for water has made changes to the subsidy provisions. The main changes are the requirement to implement best industry management practices and the withdrawal of subsidies for growth related capital works. These changes are outlined in the publication <u>Country Towns Water Supply and Sewerage Program</u> . Technical and Financial Assistance available to Councils |
| Best Practice<br>Management | The NSW Government encourages best practice for all LWUs. The<br>purpose of best practice management is:  |
|                             | <ul> <li>To encourage the effective and efficient delivery of water supply<br/>and sewerage services; and</li> </ul>  |
|                             | <ul> <li>To promote sustainable water conservation practices and water<br/>demand management throughout NSW.</li> </ul>   |
|                             | From 1 July 2004, compliance with the six best practice criteria is<br>mandatory for payment of a dividend from the surplus of an LWU's<br>water supply and sewerage businesses and future financial<br>assistance under the Country Towns Water Supply & Sewerage<br>program.  |

# Appendix C Stakeholder Review

Blayney Shire Council SBP for Sewerage

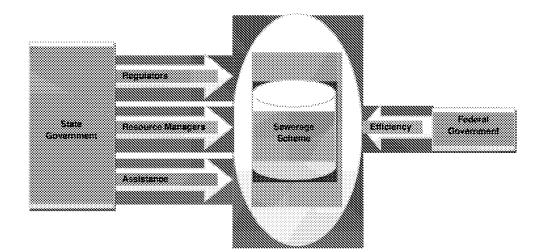

Page C-1

## C.1 Identification of Stakeholders

Stakeholders are individuals and organisations with an interest and/or equity in the sewerage services provided by Council. Stakeholders may have different expectations, and the extent to which Council meets, or is perceived to meet, these expectations may vary.

#### Institutional Stakeholders

A large number of government departments and agencies have interest in, and impact on, the management of the sewerage scheme, as shown in the chart below.

#### Local Government

The sewerage undertaking is an integral part of Council's operation. Council has the ultimate responsibility for the development, operations, maintenance and performance of the scheme.

#### State Government

The State Government has a significant impact on the sewerage scheme. Various government agencies fill a role in one or more of the following areas.

#### Regulators

These are the agencies that are largely responsible for administering the various acts listed in the preceding section. Of particular significance to the sewerage scheme are the Independent Pricing and Regulatory Tribunal (IPART), which is urging councils to adopt the pricing principles outlined in Pricing Principles for Local Water Authorities, and the Environment Protection Authority (EPA) who regulates environmental protection, issues licenses to discharge effluent and administers the various pollution control acts. Council discharges effluent from sewage treatment plants under license from the EPA.

Page C-2

Blayney Shire Council SBP for Sewerage

#### **Resource Managers**

These are the agencies responsible for managing the State's resources, such as water resources, forestry and land.

#### Assistance

The State Government has been providing financial and administrative assistance for improvements of water supply and sewerage schemes through the Country Towns Water Supply and Sewerage Program. Under the newly introduced guidelines, assistance is generally available for servicing backlog areas and improving standards, but not for augmentation works required to accommodate growth. This program is administered by the NSW Office of Water.

Other assistance is in the form of services, such as the professional services provided by the NSW Public Works.

#### Federal Government

The Federal Government has no direct bearing on the sewerage scheme. Indirectly, the Federal Government is taking the initiative on reforming the way services are delivered to the community by Government agencies in order to improve efficiency.

# C.2 Stakeholder Analysis

Stakeholders are individuals and organisations with an interest and/or equity in the sewerage services provided by the Council. Stakeholders may have different expectations, and the extent to which Council meets, or is perceived to meet, these expectations may vary.

The Table next page lists the major stakeholders and their general level of satisfaction with the sewerage operations as perceived by the participants of the Strategic Planning Workshop and the comments of Council regarding the standing of their operations.

Low scores or perception gaps between Council and Stakeholders suggest the need for improvement in service standards and or communication.

| Stakeholder  | How to judge success?  | How does<br>Council rate its<br>service?<br>1 - Poor<br>10 - Excellent | How do<br>stakeholders<br>rate the<br>service<br>1 – Poor<br>10 - Excellent |

#### Schedule B Conditions of Consent

#### CONDITIONS ISSUED WITH DEVELOMENT APPLICATION No. 122/2014

#### STATUTORY

#### **REASON:** To comply with legislative statutory requirements.

- 1. Development is to take place in accordance with the attached stamped plans for Development Application No. 122/2014, documentation submitted with the application and subject to the conditions below, to ensure the development is consistent with Council's consent. Note: Any alterations to the approved development application plans must be clearly identified **WITH THE APPLICATION FOR A CONSTRUCTION CERTIFICATE.** The Principal Certifying Authority (PCA) for the project may request an application for modification of this consent or a new application in the event that changes to the approved plans are subsequently made.
- 2. The building be maintained in accordance with the requirements of the Building Code of Australia.
- 3. The approved studio must not be used for any other purpose other than in the approval being a tattoo/art studio. Any proposed change of use to the approved studio shall be only permitted by further application to Council.
- 4. Copies of all relevant licenses and permits are to be displayed on the premises, and copies provided to Council prior to commencement of operations.
- 5. Before commencement of operations the development is to be inspected by Council's Senior Health Surveyor prior to issue of a final Occupation Certificate.

#### ENVIRONMENTAL

#### **REASON:** To comply with Council's statutory requirements.

- 6. There shall be no burning of waste material, felled trees or other material on the site.
- 7. The operation of the development is limited to 9.30am to 5.30pm, Monday to Friday.

#### HEALTH

#### **REASON:** To comply with legislative statutory requirements.

8. The activity is to be managed and operated in a manner that demonstrates compliance to Part 4 of the *Public Health Regulation 2012*.

1

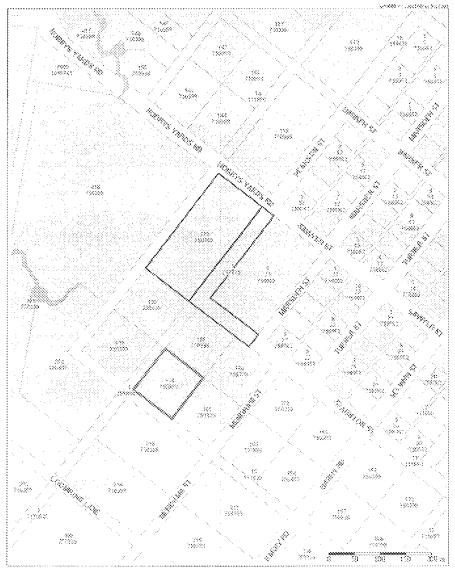

- 9. All medical waste (excluding sharps) shall be placed in yellow heavy duty plastic bags bearing the Bio-Hazard symbol, prior to disposal.
- 10. No sharps or other medical waste are to be disposed of via Council's domestic or general commercial waste collection services.
- 11. All medical waste is to be stored and secured on site prior to collection and must be transported to an approved disposal facility by a licensed contractor.

#### ADVICE AND NOTES

Prior to opening a business that conducts a skin penetration activity must notify Council in writing and obtain a registration pursuant to the *Public Health Regulation 2012* (form attached).

The *Public Health Regulation 2012* will require regular (annual) inspection by Council's Senior health Surveyor.

# Attachment B Conditions of Consent

# CONDITIONS ISSUED WITH DEVELOMENT APPLICATION No. 126/2014

# STATUTORY

# **REASON:** To comply with legislative statutory requirements.

- 1. Development is to take place in accordance with the attached stamped plans for Development Application No. 126/2014, documentation submitted with the application and subject to the conditions below, to ensure the development is consistent with Council's consent. Note: Any alterations to the approved development application plans must be clearly identified **WITH THE APPLICATION FOR A CONSTRUCTION CERTIFICATE.** The Principal Certifying Authority (PCA) for the project may request an application for modification of this consent or a new application in the event that changes to the approved plans are subsequently made.
- 2. The developer is to relocate, if necessary, at the developer's cost any utility services.
- 3. Prior to commencement of any works, a Construction Certificate is to be obtained and where Council is not the PCA, a copy is submitted to Council.
- 4. Prior to the occupation or use of the building an Occupation Certificate is to be obtained and where Council is not the PCA a copy is submitted to Council.
- 5. Provide a clearly visible sign to the site stating:
  - a) Unauthorised entry is prohibited;
  - b) Builders name and licence number; or owner builders permit number;
  - c) Street number or lot number;
  - d) Contact telephone number/after hours number;
  - e) Identification of Principal Certifying Authority.
- 6. The building shall be constructed and maintained in accordance with the requirements of the Building Code of Australia.
- 7. In the case of residential building work for which the Home Building Act 1989 requires there to be a contract of insurance in force in accordance with Part 6 of the Act, evidence that such a contract of insurance is in force is to be provided by the Principal Certifying Authority before any building work authorised to be carried out by the consent commences.
- 8. Residential building work within the meaning of the *Home Building Act 1989* must not be carried out unless the principal certifying authority for the development to which the work relates (not being the Council) has given the Council <u>written notice</u> of the following information:

- a) in the case of work for which a principal contractor is required to be appointed:
  - 1. The name of the licence number of the principal contractor, and
  - 2. The name of the insurer by which the work is insured under Part 6 of that Act,
- b) in the case of work to be done by an owner-builder:
  - 1. The name of the owner-builder, and
    - 2. The name of the owner-builder is required to hold an owner-builder permit under that Act, the number of the owner-builder permit.

If arrangements for doing the residential building work are changed while the work is in progress so that the information under this condition becomes out of date, further work must not be carried out unless the principal certifying authority for the development to which the work relates (not being the council) has given the council written notice of the updated information.

# ENVIRONMENTAL

# **REASON:** To comply with Council's statutory requirements.

- 9. Prior to the commencement of works, the applicant shall install and maintain adequate sediment and soil erosion controls in accordance with *WBC Guidelines for Engineering Works.*
- 10. There shall be no burning of waste material, felled trees or other material on the site.
- 11. All the required commitments shown on the BASIX Certificate No:572580S dated 3 September 2014 and approved plans, are to be implemented prior to issue of an occupation certificate.
- 12. The on-site sewage management system chosen shall be maintained in accordance with the recommendations of the report by Calare Civil Consulting Engineers, Ref: 20140747 Dated: 29 October 2014.

# DRAINAGE

# **REASON:** To comply with legislative statutory requirements.

- 13. All dwelling drainage and plumbing work shall be carried out in accordance with the Plumbing Code of Australia.
- 14. All plumbing and drainage work shall be carried out by a licensed plumber and drainer.
- 15. A works as executed drainage plan drawn to the scale of 1:200 is to be submitted to Council at the time of inspection.

- 16. All required roof harvested water must be conveyed to the proposed rainwater tank in accordance with Australian Standard 3500.
- 17. The overflow for the rainwater tank is to be connected to a drainage line and conveyed on site in accordance with Australian Standard 3500 in a manner that is not adversely affecting adjacent land.

# WATER STORAGE

# REASON: To comply with Council's statutory requirements.

18. On site water storage is to be provided for both domestic and firefighting reserve purposes. Total storage capacity is to be a minimum of 50,000 litres including a minimum 10,000 litres firefighting reserve as recommended by the Bush Fire Council. The following Bush Fire Council recommendations are attached for information.

"Storage capacity as referred to above may be in ground or above ground provided that, with respect to the 10,000 litres reserved for firefighting purposes, the following is observed:-

Where in ground storage is provided, access for pumping water into a fire fighting unit must be provided. In this regard, a standard suction hose is usually 6m in length.

Where above ground storage is provided it is recommended that:

- a. the outlet for domestic supplies is to be located at a level above that of the 10,000 litres reserved for firefighting purposes;
- b. the outlet for firefighting purposes must be fitted with a 65mm Storz (brass/steel) type full flow tap with gate valve;
- c. the outlet in b. above shall be located so as to provide easy access for firefighting units ie. directly where there is vehicle access to the outlet or via plumbing where such direct access is not possible".

# CONSTRUCTION

# **REASON:** To comply with legislative statutory requirements.

- 19. A gravelled footway crossings is to be constructed off Mendham Street, 3 metres wide in accordance with *WBC Guidelines for Engineering Works* is to be undertaken from the edge of and perpendicular to the travelling lane in the public road including a piped culverts or concrete causeway, if appropriate.
- 20. A 4.0 metre wide all-weather 2WD vehicular access is to be constructed off Mendham Street to the property boundary. This access roadway is to be appropriately formed and contain suitable measures for the prevention of soil erosion, including mitre drains and piped culverts where necessary. All such works are to comply with *WBC Guidelines for Engineering Works*.

- 21. All road and inter allotment drainage is to be conveyed to a legal point of discharge in accordance with *WBC Guidelines for Engineering Works*.
- 22. The rural address number must be displayed at the entrance of the property in a prominent position that is visible from the road within fourteen (14) days of being provided by Council.

# AMENITY REASON: To comply with legislative statutory requirements.

- 23. Noise generating construction activities are to be restricted to the hours of:-
  - Monday to Friday 7am to 6pm
  - Saturday

8am to 5pm

• Sundays and Public Holidays Nil

# ADVICE AND NOTES Inspection Schedule

The Principal Certifying Authority (Council) is required to ensure all work is carried out in accordance with the consent, Building Code of Australia (BCA), and relevant standards, which is done during inspections at nominated stages of the work. The "Inspection Schedule" lists the mandatory and other required inspections that must be carried out by Blayney Shire Council during construction of the work.

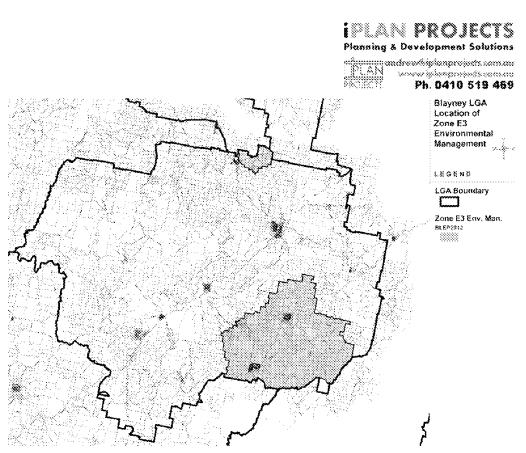

- a. Internal and external sanitary drainage.
- b. Hot and cold water prior to internal lining.
- c. Final inspection at time of completion of all works.

# Notice of Commencement

Notice of commencement of building works – The attached form needs to be completed and faxed or mailed to Council at least 2 days before any work commences on the site.

# Reference to the Building Code of Australia

A reference to the *Building Code of Australia* is a reference to that Code as in force on the date the application for the relevant construction certificate is made.

Planning Proposal to amend Planning Controls in the Drinking Water Catchments, Blayney Shire NSW

MAP ILLUSTRATING THE LOCATION OF ZONE E3 IN BLAYNEY LOCAL ENVIRONMENTAL PLAN (JAN 2015) EXCLUDING THE VILLAGES OF BARRY & NEVILLE.

# **Planning Proposal**

Proposed Amendment(s) to *Blayney Local Environmental Plan 2012* to amend the Planning Controls for the Drinking Water Catchments for Lake Rowlands (Blayney LGA) & Suma Park Dam (Orange LGA) including

- Replacement of Zone E3 Environmental Management with Zone RU1 Primary Production
- Other minor amendments to Zone RU1 Primary Production Land Use Table

Prepared on behalf of Blayney Shire Council for submission to the NSW Department of Planning & Environment

29 January 2015 Version D

# 1. INTRODUCTION

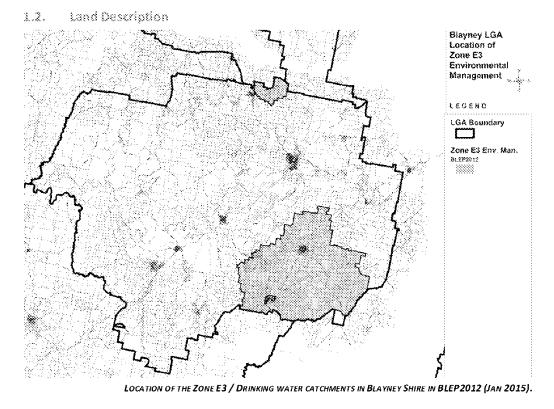

#### 1.1. Aim of Amendment

Blayney Shire Council is applying to amend *Blayney Local Environmental Plan 2012* ('BLEP2012') to change the planning controls relating to what is effectively rural land that is covered by Zone E3 Environmental Management and forms part of two (2) drinking water catchments including:

- Lake Rowlands (southern area of Blayney Local Government Area ('LGA')); and
- Suma Park Dam (in Orange LGA but with catchment extending into northern area of Blayney LGA)). The aim is to replace the existing Zone E3 Environmental Management with Zone RU1 Primary Production.

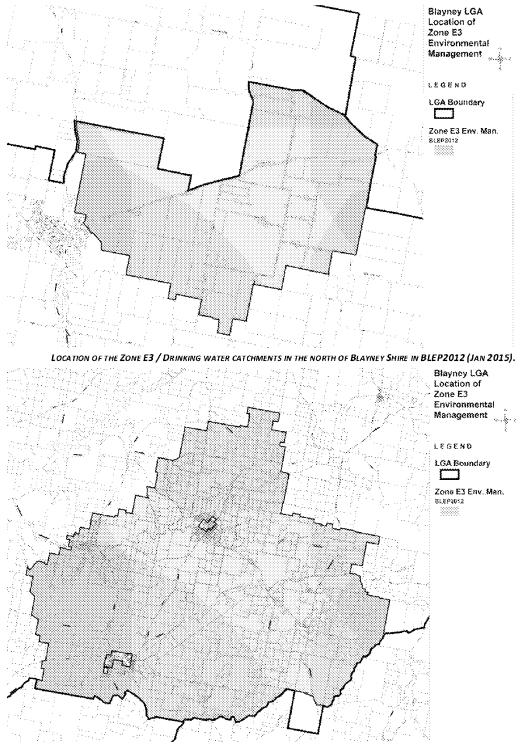

The brief reasoning for the amendment is that Zone E3 Environmental Management has been found to potentially be overly restrictive in terms of rural land uses and development processes that may be suitable for the rural area, potentially inhibiting economic growth and development when there are other mechanisms in BLEP2012 to achieve the required environmental protections. It is submitted that an improved approach would be to let the market decide what rurally appropriate land uses could be supported and address any site-specific environmental constraints through the development assessment process.

In particular, Zone E3 prohibits a range of rural land uses within the drinking water catchments that may be appropriate subject to a merit based development assessment. There are a range of other controls in BLEP2012 including, but not limited to, *Clause 6.5 – Drinking water catchments*, to provide a suitable level of protection for the drinking water catchments. Also, Zone E3 may impact on the permissibility of exempt and complying development and thereby require a full development application for certain land uses that could otherwise utilise these potentially cheaper and faster processes.

Version D (January 2015)

PLAN PROJECTS Planning & Development Solutions

Planning Proposal to amend Planning Controls in the Drinking Water Catchments, Blayney Shire NSW

LOCATION OF THE ZONE E3 / DRINKING WATER CATCHMENTS IN THE SOUTH OF BLAYNEY SHIRE IN BLEP 2012 (JAN 2015) CLEARLY EXCLUDING THE VILLAGES OF BARRY & NEVILLE.

Version D (January 2015)

PLAN PROJECTS Planning & Development Solutions

#### Planning Proposal to amend Planning Controls in the Drinking Water Catchments, Blayney Shire NSW

The area where Zone E3 applies(the 'subject lands' for the purpose of this Proposal) are illustrated on the map above. Note that whilst Zone E3 to a large extent matches the Drinking Water Catchment Maps – Zone E3 does not apply to the villages of Neville or Barry that are within the drinking water catchment. Please see the detailed maps in the Appendices.

The first catchment is for Lake Rowlands which is the primary drinking water source for a number of local government areas throughout the central west including Blayney, Cabonne, Cowra and Weddin Shires. The catchment for Lake Rowlands is predominantly in the Blayney LGA and covers an area of 20,111ha extending from the southern LGA boundary to north of Barry.

The second catchment is for Suma Park Dam which is the primary drinking water source for the City of Orange. The Suma Park Dam is located in the Orange LGA to the north-east of the city but its catchment extends partially into Blayney LGA to the east of Millthorpe including 1,143ha of land.

# 1.3. Intent of Original Use of Zone E3

The original intent of using Zone E3 Environmental Management for the drinking water catchment was supported by the following factors (with an alternative response to justify this variation suggested):

| The Subregional Land Use Strategy (GHD 2008) recommended that<br>Council implement a specific environmental protection zoning for<br>land within the drinking water catchments that would restrict the<br>type and intensity of development in these areas (See Final<br>Strategy, Section 12.3, Strategy 2, p.104).<br>The transport and utilities infrastructure (especially in the Lake<br>Rowlands catchment) is weak (i.e. lack of state or regional roads;<br>lack of sewerage reticulation; only low voltage power lines) so the<br>likelihood of rural industries and other commercial ventures was<br>less likely to be economically viable and would require significant<br>upgrades to infrastructure at a high cost. | Response: The Subregional<br>Strategy does not preclude the use<br>of alternative planning tools to<br>achieve the key principles.<br>Response: This is something that<br>the market and merit assessment<br>can decide so increased flexibility<br>is more likely to be economically<br>sustainable. |
|--|---|
| Zone E3 was being used by Orange City Council for their drinking<br>water catchments (including the catchment for Suma Park Dam) so<br>the use of the zone would increase compatibility in planning<br>outcomes across the LGA boundary.   | <b>Response:</b> Other Councils such as<br>Cabonne have not used Zone E3<br>for the drinking water catchment<br>so consistency is not mandatory if<br>protections in place.   |
| Lake Rowlands is currently used as a drinking water source for four<br>(4) LGAs and is therefore a regionally strategic water source and<br>supply. Other strategic studies suggested that Lake Rowlands may<br>be expanded to increase supply and potentially service a wider<br>area. Its strategic significance was deemed worthy of additional<br>protections through regulation of land uses within the drinking<br>water catchment. See the section below on the Public Health Act<br>and Australian and NSW Guidelines for Drinking Water<br>Management.  | <b>Response:</b> The drinking water<br>catchment overlay can provide<br>sufficient protection for existing<br>and future water security.  |
| Suma Park Dam is currently the primary drinking water source for<br>Orange City Council and it is expected that some regulation of land<br>use within that catchment may be necessary. However, this was<br>included in Zone E3 primarily for consistency in planning approach.  | <b>Response:</b> The drinking water<br>catchment overlay can provide<br>sufficient protection for existing<br>and future water security.  |
| An alternate suitable zone may have been Zone RU2 Rural<br>Landscape (as this zone was used for the drinking water catchment<br>in Cabonne LGA). However, in Blayney LGA this zone had already<br>been used for the original scenic protection zones in BLEP1998 and<br>had a different focus, objectives, and land use permissibility.  | <b>Response:</b> Utilising Zone RU1<br>Primary Production may be<br>sufficient with the additional<br>overlays in BLEP2012.   |

Version D (January 2015)

iPLAN PROJECTS Planning & Development Solutions

#### Planning Proposal to amend Planning Controls in the Drinking Water Catchments, Blayney Shire NSW

#### 1.4. Process Overview

This Planning Proposal has been prepared in accordance with the requirements of:

- Letter from DPE dated 5/9/14 notifying Blayney Shire of amended procedures for drafting and notifications of local environmental plans;
- The Environmental Planning & Assessment Act 1979 ('EP&A Act');
- The Department of Planning (October 2012) 'A guide to preparing planning proposals';
- Planning Circular No. PS12-006 Delegations and independent review of plan-making decisions;
- Blayney Local Environmental Plan 2012 ('BLEP2012').

A gateway determination under Section 56 of the EP&A Act is requested from the Department of Planning & Environment ('Department') to allow this planning proposal to be placed on public exhibition.

We also request delegation to Council (as the Relevant Planning Authority or RPA) of the power to make this amendment to the *Blayney Local Environmental Plan 2012* recommending that this rezoning is generally consistent with an endorsed strategy (primarily the *Sub-Regional Land Use Strategy 2008*) except for the recommendation in this Strategy to utilise Zone E3 for the drinking water catchments (as it did not consider the use of the drinking water catchment overlay as a suitable alternative).

We submit that there is sufficient detail in this Planning Proposal to justify a positive Gateway Determination considering the low complexity of the proposed amendment and limited chance of any significant impacts on adjacent land uses, the natural environment and the community.

Version D (January 2015)

PLAN PROJECTS

# PROPOSED AMENDMENT(S)

The key amendments (and/or retained planning controls) are as follows:

- a) It is intended to amend the land use zone for all of the lands that are in Zone E3 Environmental Management in BLEP2012 and replace it with Zone RU1 Primary Production. This will amend the following Land Zoning Maps: LZN\_004; LZN\_004A; LZN\_005; LZN\_005B; LZN\_005C; LZN\_007. As a result, the land use permissibility (without consent / with consent / prohibited) of Zone RU1 will apply to these lands (see table below).
- b) Zone E3 will be removed from the Land Use Table in Part 2 of BLEP2012 as there are no other lands utilising this zone;
- c) Any reference to Zone E3 will be removed from the following clauses (if permissible in Standard Instrument):
  - i) Clause 4.1AA Minimum subdivision lot size for community title
  - ii) Clause 4.1A Minimum subdivision lot size for strata plan schemes in certain rural and environmental zones
  - iii) Clause 4.2A Erection of dwelling houses or dual occupancies on land in certain rural and environmental protection zones.
- d) The following minor amendments to land use permissibility will be made to Zone RU1 Primary Production - Emergency service facilities – permissible with consent
- It is important to note that these amendments will **NOT** affect the following key controls:
- a) There will be no impact on the minimum lot size for subdivision of those lands so no Lot Size Maps will be amended; and
- b) The Drinking Water Catchment Maps that trigger consideration under Clause 6.5 Drinking water catchment will be retained and provide the key protection of the drinking water catchments (in addition to other factors to be considered as part of a merit assessment of any development application). This will meet the requirements of the Public Health Act 2010 and the 2013 NSW Guidelines for Drinking Water Management Systems.

Council have elected to ensure that **intensive plant agriculture** and **intensive livestock agriculture** are permissible **with consent** in Zone RU1 if it were to include the drinking water catchment and would rely on the merit assessment process to ensure that development with consents have appropriate measures in place to protect the catchment and those that are unsuitable are not approved.

Version D (January 2015)

iPLAN PROJECTS Planning & Development Solutions

# 3. SITE ANALYSIS

A brief desktop review of known constraints and opportunities has been considered to inform the proposed amendment and determine if there are other factors in addition to the drinking water catchment to consider when removing Zone E3 from these areas.

## 3.1. Topography

#### 3.1.3. Slope & Gradient

The Subregional Strategy highlights that there are only very limited areas within the Lake Rowlands catchment and none within the Suma Park catchment where the slope exceeds 18 degrees and there would be a need to avoid significant development to protect against erosion and landslip.

#### 3.1.2. Scenic Protection

BLEP2012 utilises Zone RU2 Rural Landscape to define scenic protection areas around the towns of Blayney and Carcoar (outside the catchments) due to the valley setting of these two settlements. No other parts of the Blayney LGA are deemed worthy of protecting for the purposes of scenic protection under the LEP (including the existing Zone E3 / drinking water catchment areas) but merit assessment may still take this into consideration.

#### 3.2. Water

#### 3.2.1. Drinking Water Catchment

Obviously, the areas in consideration are both drinking water catchments as highlighted and defined on the Drinking Water Catchment Maps in BLEP2012 for both Lake Rowlands and Suma Park Dam (excluding the villages of Neville and Barry). The Suma Park catchment falls within the former Central West Catchment Management Authority and Lake Rowlands falls within former Lachlan Catchment Management Authority (now Central Tablelands Local Lands Services). There is no proposal to amend the drinking water catchments at this time so their protection under Clause 6.5 of BLEP2012 remains.

#### 3.2.2. Watercourses & Riparian Corridors

Both drinking water catchments, by their very nature include watercourses. The most significant of these are shown as riparian waterways on the Riparian Lands and Waterways Maps in BLEP2012. This includes, but it not limited to, Coombing Creek which flows past Barry and is fed by a watercourse from Neville before flowing into Lake Rowlands. The ESA Mapping – Sensitive Water Resources (see figure below) shows most of the watercourses are major freshwater habitats with riparian qualities. It also shows that there are some limited areas in the drinking water catchments with very severe stream-bank erosion, these are less significant than in most other areas of the Shire and don't generally involve very severe gully erosion. The issue of stream protection can be addressed by the existing Clause 6.6 Riparian lands and watercourses during any development assessment processes.

#### 3.2.3. Flooding & Stormwater Management

There are no Flood Planning Maps in BLEP2012 for the drinking water catchment areas. There is likely to be intermittent flooding along the watercourses through Neville and Barry and the rural areas but there is no historical evidence of a broad flood plain or other flood hazard that would significantly impact on future land uses or an appropriate zoning of this rural land. Any evidence of flooding can be addressed under Clause 6.1 Flood Planning.

#### 3.2.4. Groundwater

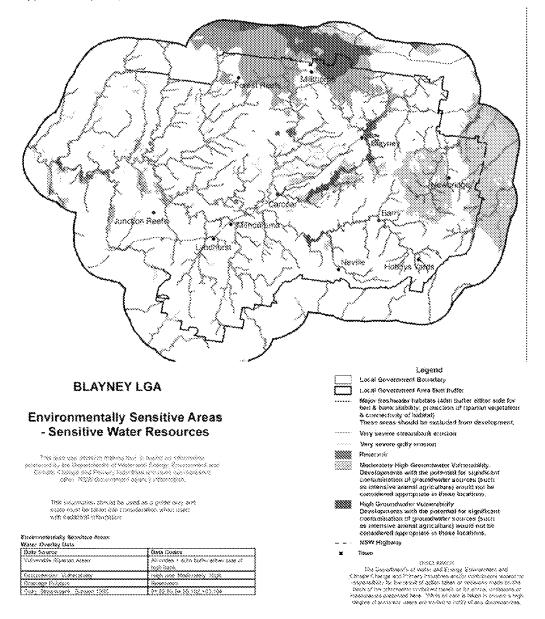

The Natural Resource – Groundwater Vulnerability Maps in BLEP2012 (based on the ESA – Sensitive Water Resources Maps see figure below) highlight that there is a high groundwater vulnerability under the majority of the Suma Park catchment to the east of Millthorpe but very little groundwater

Version D (January 2015)

PLAN PROJECTS Planning & Development Solutions

#### Planning Proposal to amend Planning Controls in the Drinking Water Catchments, Blayney Shire NSW

vulnerability in the Lake Rowlands catchment. A rural zone is unlikely to significantly increase impacts on the groundwater systems. The issue of groundwater vulnerability can therefore be addressed by *Clause 6.4 – Groundwater vulnerability* if required for any development application and is not an absolute prohibition on more intensive agricultural uses or rural industries where alternate water supplies are required/available.

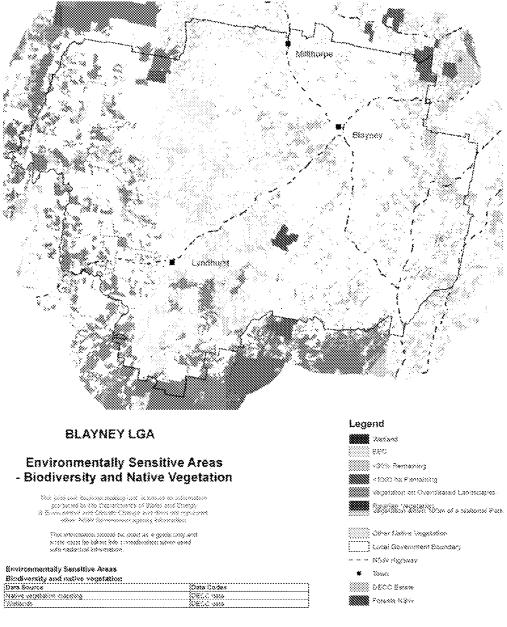

ENVIRONMENTALLY SENSITIVE AREAS - SENSITIVE WATER RESOURCES (STATE GOV. 2008)

Version D (January 2015)

IPLAN PROJECTS Planning & Development Solutions

# 3.3. Flora, Faona & Potential Biodiversity

The Terrestrial Biodiversity Maps suggests that there are some features of the two drinking water catchments that <u>may</u> contain sensitive biodiversity (see opposite) and trigger Clause 6.3 of BLEP2012. As the ESA – Sensitive Biodiversity Areas mapping shows (see figure below), the majority of the highlighted areas are sensitive because there is less than 30% of that species remaining (orange) with 2-3 pockets of vegetation on over-cleared landscapes (brown) but no specific species are identified for protection. There are some pockets of remnant native vegetation but there is limited connectivity and these generally overlap with the sensitive biodiversity areas.

ENVIRONMENTALLY SENSITIVE AREAS - BIODIVERSITY & NATIVE VEGETATION (STATE GOV. 2008)

Version D (January 2015)

IPLAN PROJECTS Planning & Development Solutions

#### Planning Proposal to amend Planning Controls in the Drinking Water Catchments, Blayney Shire NSW

However, a rural zone is likely to have a similar effect in terms of future clearing and impacts and these sensitive areas are protected by the retention of the biodiversity overlay in BLEP2012 that does not require the additional protection of Zone E3 (that has little additional benefit/consideration in the development assessment process).

In addition, we have utilised Council's GIS data and the NSW Natural Resource Atlas to confirm there are no known threatened or endangered species (flora or fauna) or ecological communities in the drinking water catchments including no sensitive wetlands or reserves or former DECC estates. Generally the change of zoning is not likely to significantly increase activities that would impact on the Threshold Sustainability Criteria.

#### 3.4. Bushfire

According to the Rural Fire Service (2009) *Bushfire Prone Land Map* there are only small pockets of bushfire prone land to the south and north-east of Neville and very limited pockets to the east of Millthorpe. The change in zoning from environmental to rural is unlikely to significantly increase development on or near bushfire prone land and can be addressed through the development assessment process.

#### 3.S. 1386

#### 3.5.1. Historical Land Use(s) & Contamination

There are no known listed contaminated sites listed in Blayney Shire within the drinking water catchments under the *Contaminated Land Management Act 1997*. The predominant historic use of land in these areas has been for grazing and other agricultural practices and there could be some expectation of chemical use with low level soil contamination. However, the change in zoning from environmental to rural will predominantly result in ongoing rural uses and contamination issues can be dealt with during the development assessment process for any sensitive uses.

#### 3.5.2. Geology & Soils

As there are very few pockets of land with slope above 18 degrees, landslip is less likely to be an issue. The ESA – Sensitive Land Resource mapping for the Shire suggests that the areas to the east of Millthorpe and around Neville/Barry/Hobbys Yards (i.e. within the drinking water catchments) are relatively free of sensitive land issues such as salt affected land, land capability classes 5-8, karst or soil regolith R4. The NSW Natural Resource Atlas mapping also suggests the areas are not affected by dryland salinity (this occurs generally to the east and south east of the Shire).

## 3.5.3. Mineral Potential & Mine Subsidence

According to the Mineral Resources Audit Map (Aug, 2012) prepared by the former Department of Mineral Resources there are no existing or potential resource areas in the Suma Park catchment near Millthorpe and there is only one known existing extractive industry in the Lake Rowlands catchment known as Gordon's Quarry (NE of Barry). The change of zoning is unlikely to significantly increase development potential (particularly dwelling potential) in or around this industry as a rural zone is proposed and there is no change in the minimum lot size.

#### 3.6. Agricultural Potential

#### 3.6.1. Role of Agriculture in Blayney Shire

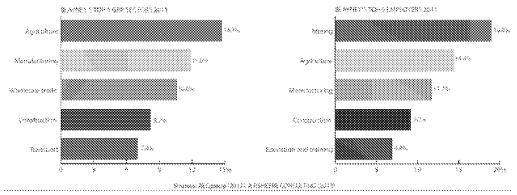

It is important to put this amendment in perspective of the role of agriculture in Blayney Shire. In 2011 (Australian Bureau of Statistics – Region Summary) the Blayney Shire (SA2) had 134,271ha of agricultural land (out of 164,254ha) of which there were 222,498ha sheep, 66,280 meat cattle and 1,021

| Version D (January 2015) | IPLAN PROJECTS                   | <b>Page   1</b> 5 |
|--------------------------|----------------------------------|-------------------|
|                          | Planning & Development Solutions |                   |

#### Planning Proposal to amend Planning Controls in the Drinking Water Catchments, Blayney Shire NSW

dairy cattle – so it was dominated by grazing. Only very limited areas were used for broad-acre crops (2,590ha) and fruit and nuts excluding grapes (32ha). The agriculture, forestry and fishing industry employed the largest percentage (12.8%) of the workforce. The gross value of agricultural production was \$38.2 million dollars.

The CENTROC website summarised the Blayney Regional Overview 2011-2012 and stated that Agriculture (\$34.9 million) was the biggest sector of the economy by gross regional product (see graph excerpt below) and employed the 2<sup>nd</sup> highest number of people in the Shire. It is for these reasons that this review seeks to consider replacing the Zone E3 with Zone RU1 Primary Production in the drinking water catchments.

BLAYNEY REGIONAL OVERVIEW 2011-2012 (SEE CENTROC WEBSITE).

#### 3.5.2. Agricultural Land Classification

According to the mapping in the Subregional Strategy (Local Profile – Figure 6.8 – Land Capability) most of the land in the drinking water catchments are in Class 2, 3 or 4 areas. Therefore, they have a high to moderate agricultural potential with limited areas suitable for cropping with soil conservation practices but are mostly suited to grazing and pasture improvement.

#### 3.5.3. Central West Pilot Mapping Project

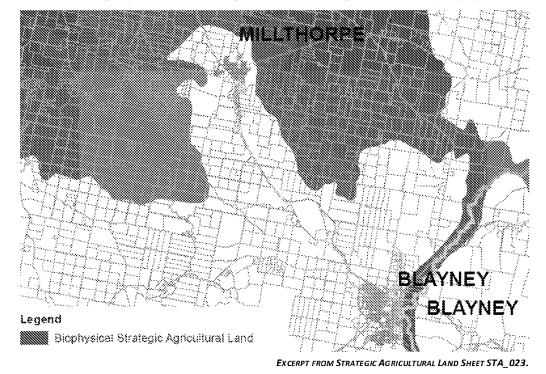

In 2011-2012 the NSW Department of Primary Industries (DPI) investigated a new process for mapping agricultural lands in a pilot project for the Central West including the Site. It looks at agricultural development potential and resources and implications for land use planning. This study found that the majority of land in the drinking water catchments was potentially important grazing land and medium wool land, with more limited areas important for horticulture and viticulture land. This accords with the land capability classifications above.

#### 3.6.4. Biophysical Strategic Agricultural Land Mapping

Biophysical Strategic Agricultural Land (BSAL) is land with high quality soil and water resources capable of sustaining high levels of productivity. The BSAL Mapping is given legal authority by *State Environmental Planning Policy (Mining, Petroleum Production and Extractive Industries) 2007* and is primarily a tool to avoid conflicts between mining and prime agricultural land. Strategic Agricultural Land Map Sheet STA\_023 and STA\_024 covers the Shire and demonstrates that there is biophysical strategic agricultural land to the east of Millthorpe (Suma Park catchment) but the Lake Rowlands catchment is not strategic agricultural land. A rural zoning would therefore be better suited to strategic agricultural land than an environmental zone, particularly where there are no other underlying environmental sensitivities other than the drinking water catchment.

Version D (January 2015)

PLAN PROJECTS

Planning Proposal to amend Planning Controls in the Drinking Water Catchments, Blayney Shire NSW

## 3.7. Culture & Heritage

Whilst there are items of non-indigenous heritage and possibly Aboriginal heritage in these drinking water catchments, the change in zoning from environmental to rural is not expected to significantly increase development potential and with consent required for most new land uses this can be managed during the development assessment process.

Version D (January 2015)

**i**PLAN **PROJECTS** Planning & Development Solutions

# 4. PLANNING IMPLICATIONS

The following is a comparison between the planning controls (and likely development outcomes) between the use of Zone E3 Environmental Management and Zone RU1 Primary Production for the subject lands.

# 4.1. Zone Objectives

The objectives of both zones are set out as follows:

| Zone E3 Environmental Management  | Zone RU1 Primary Production   |
|---|---|
| <ul> <li>To protect, manage and restore<br/>areas with special ecological,<br/>scientific, cultural or aesthetic values.</li> <li>To provide for a limited range of<br/>development that does not have an<br/>adverse effect on those values.</li> <li>To protect drinking water catchments<br/>from the impacts of development by<br/>minimising impacts on the quality<br/>and quantity of water entering<br/>drinking water storages.</li> </ul> | <ul> <li>To encourage sustainable primary industry production by maintaining and enhancing the natural resource base.</li> <li>To encourage diversity in primary industry enterprises and systems appropriate for the area.</li> <li>To minimise the fragmentation and alienation of resource lands.</li> <li>To minimise conflict between land uses within this zone and land uses within adjoining zones.</li> <li>To enable function centres, restaurants and appropriate forms of tourist and visitor accommodation to be developed in conjunction with agricultural uses.</li> </ul> |

The objectives between Zone E3 and Zone RU1 have significant differences in terms of their focus and the key issues facing land uses in each zone. Zone E3 is focussed on limiting development and protecting the environmental and cultural amenity of the area whilst Zone RU1 seeks to encourage agriculture and appropriate ancillary land uses for economic growth with land use conflicts been the key issue. An additional local objective was added to Zone E3 to protect drinking water catchments because this was the primary role of the zone when BLEP2012 was prepared.

It is submitted that the primary role of the area that forms the drinking water catchment is actually its agricultural role and the drinking water catchment is a secondary (but equally important) role. A review suggests that the intent to limit development in Zone E3 is not appropriate for these rural areas and instead Council should be facilitating development and assessing environmental and social impacts on their merits.

# 4.2. Land Uses Permissible without Consent

#### Land uses permissible without consent for each zone are as follows:

| Zone E3 Environmental Management | Zone RU1 Primary Production    |
|----------------------------------|--------------------------------|
|                                  | Building identification signs  |
| Environmental protection works   | Environmental protection works |
| Extensive agriculture            | Extensive agriculture          |
| Home occupations                 | Home occupations               |

The land uses permissible without consent in Zones RU1 are very similar to Zone E3 with the exception of building identification signs. This is probably an oversight because building identification signs would have no impact on the drinking water catchment and are appropriate in these areas. Therefore, for these land uses Zone RU1 is appropriate.

Version D (January 2015)

Planning Proposal to amend Planning Controls in the Drinking Water Catchments, Blayney Shire NSW

In conclusion, it can be seen that Zone RU1 is significantly more flexible with regard to agricultural land uses and commercial premises where these can be shown to be ancillary to agriculture and this would suggest that Zone RU1 is the preferred zone for the drinking water catchment land. Potential impacts on the drinking water catchment can be managed through merit assessment.

# 4.4. Existing Minimum Lot Size & Owellings

The minimum lot size for subdivision in both Zone E3 Environmental Management and Zone RU1 Primary Production is 100 hectares and will remain at this size so there is no need to amend any Lot Size Maps in BLEP2012 and no impact in terms of additional dwelling potential or fragmentation of agricultural lands. Any new dwellings would need to have approval for any on-site effluent management anyway so there is a low chance of significant impact on the drinking water catchment.

# 4.5. Drinking Water Catchment Overlay

It is proposed to retain the existing Drinking Water Catchment Maps and *Clause 6.5 – Drinking water catchment* in BLEP2012. This is the primary control that can be used to ensure development will avoid, or minimise/mitigate its impacts on the drinking water catchment if the zoning is changed. However, it must be understood that this may mean that complying development is not available in these areas (see more detail on Exempt and Complying Development below).

## 4.6. Exempt & Complying Development

State Environmental Planning Policy (Exempt and Complying Development Codes) 2008 ('SEPP Code') sets out a variety of circumstances when development can be classified as either 'Exempt development' or 'Complying development'.

The key aim of the SEPP Code is to provide streamlined assessment processes (with potential for reduced development costs and processes) for development that complies with state-wide development standards including:

- a) Exempt development that may be carried out without the need for development consent as it is likely to have minimal environmental impact; and
- b) Complying development that offers a fast-track approvals process where development meets the requirements of the SEPP Code and can be assessed by an accredited certifier.

Council supports the use of exempt and complying development where impacts can be appropriately managed. However, historically the complexity of these processes has reduced the use of exempt and complying development paths so people have tended to lodge development applications.

The SEPP Code includes the following and we have highlighted where the relevant sections may be applicable in the rural and environmental zones of the drinking water catchments:

**Part 2 - Exempt Development Codes** includes the General Exempt Development Code; Advertising and Signage Exempt Development Code; and Temporary Uses and Structures Exempt Development Code. Changing from Zone E3 to Zone RU1 for the subject lands will enable agricultural related development such as 'animal shelters' and 'farm buildings' to be undertaken with as exempt development.

| Co | mplying Development Codes  | Comment   |
|----|--|---|
| 1) | Part 3 - General Housing Code  | Clause 3.1 - Only applies to specific development in Zones R1,<br>R2, R3, R4 or RU5. Only relevant to village of Neville in drinking<br>water catchment but not affected by Zone E3.  |
| 2) | Part 3A - Rural Housing code   | Clause 3A.1 - Only applies to specific development in Zones RU1,<br>RU2, RU3, RU4, RU6 and R5 (No mention of Zone E3) but would<br>apply if a rural zone adopted. Predominantly about new 1-2<br>storey housing and ancillary structures (See restrictions in<br>drinking water catchment below). |
| 3) | Part 4 - Housing Alterations<br>Code   | Applies to internal alterations to existing dwellings and ancillary development (in all zones)  |
| 4) | Part 4A – General Development<br>Code  | Applies to bed and breakfast accommodation, home businesses, tent/marquees/community event booths, stages/platforms etc.  |
| 5) | Part 5 – Commercial and<br>Industrial Alterations Code                       | Applies to an internal alteration to a building used for any<br>purpose other than residential, heavy industry, sex services or<br>restricted premises and change of uses.  |
| 6) | Part 5A – Commercial and<br>Industrial (New Buildings and<br>Additions) Code | Applies to specified development in business, industrial, and special use zones only. Not applicable to Zone E3.  |
| 7) | Part 6 – Subdivisions Code   | Applies to strata subdivision of multi-dwelling housing or a building other than a dual occupancy which is unlikely in Zone E3.   |
| 8) | Part 7 - Demolition Code   | Applies to demolition of a dwelling, ancillary development, swimming pool, industrial building, or a commercial building.   |
| 9) | Part 8 – Fire Safety Code  | Applies to fire sprinkler systems and fire safety systems in specified circumstances.   |

Version D (January 2015)

PLAN PROJECTS Planning & Development Solutions

#### Planning Proposal to amend Planning Controls in the Drinking Water Catchments, Blayney Shire NSW

The key issue is that the complying development code for rural housing does not apply to Zone E3 Environmental Management so an application for a dwelling and associated structures will always require a development application in this zone.

However, it is important to note that under Division 2 of the SEPP Code development is excluded from being either exempt or complying if it is **located within a drinking water catchment** including:

- 1) Clause 1.19 Land on which complying development may not be carried out
  - a) Subclause (1) Specific land exemptions for General Housing Code and Rural Housing Code
     i) Subsection (j) Unsewered land [this would include all of the drinking water catchments in Blayney LGA]
    - (1) Subsection (ii) in any other drinking water catchment identified in any other environmental planning instrument [this would include BLEP2012].
  - b) Subclause (4) Specific land exemptions for Housing Alterations Code and General Development Code states that complying development must not be carried out on unsewered land:
    - (1) Subsection (b) in any other drinking water catchment identified in any other environmental planning instrument [this would include BLEP2012].

Therefore, in Zone RU5 (Neville), Zone R5 (Neville and Barry) and Zone E3 or RU1 in the rural areas complying development is excluded because of the drinking water catchment and these areas being unsewered. This has significant implications because there are no current plans for reticulated sewer in either of these villages.

One future suggestion for the current review of Exempt & Complying Development in the Western Region is that dwellings requiring on-site effluent systems could be managed through the Section 68 approval process for the on-site systems whilst still allowing complying development for the dwelling component ensuring that drinking water catchments are protected from effluent and stormwater where required.

Version D (January 2015)

iPLAN PROJECTS Planning & Development Solutions

#### 5. SUBREGIONAL LAND USE STRATEGY

#### 5.i. Sackground

Council and the Department of Planning and Environment ('Department') have approved and adopted the GHD (2008) Subregional Rural and Industrial Land Use Strategy ('Subregional Strategy'). This is the relevant land use strategy applying to all land outside of the main towns/villages in Blayney LGA including the drinking water catchments. The Subregional Strategy was approved by the NSW Government by letter dated 30 June 2011 from the former NSW Department of Planning & Infrastructure.

#### 5.2. Strategies and Actions

The key strategies and actions are set out in the Final Strategy Section 9 – Agriculture and Section 10 – Industry (relevant to Rural industry in particular), and Section 12 – Natural and Scenic Environment (particularly relating to water quality).

Section 9 ~ Agriculture 5.2.2.

The objective of Section 9 is to 'protect and promote agriculture in the Sub-Region, having regard to its economic value and contribution to the regional, state and national economies.' It is for this reason that this Proposal submits that Zone E3 is potentially unduly restrictive on the range of agriculture and ancillary uses that could be permissible in what has traditionally been a rural area (albeit with a drinking water catchment overlay). This Proposal does not propose to affect minimum lot size that may increase fragmentation of rural lands. The following strategies and action (Section 9.3) are relevant:

| Strategy   | Policy Actions  | Comment  |
|--|---|--|
| 1. Provide for the<br>economic growth<br>of the rural area<br>and maintain and<br>enhance rural job<br>opportunities | <ul> <li>1.1 Ensure agriculture is given priority in planning and land use decision making.</li> <li>1.2 Encourage a wide variety of agricultural activities within the agricultural zones.</li> <li>1.3 Encourage the development of intensive agricultural industries where they can be serviced with necessary infrastructure and in appropriate locations to avoid land use conflicts.</li> </ul> | Zone E3 is somewhat restrictive<br>in terms of intensive agricultural<br>land uses and rural industries<br>that could potentially be<br>supported in the drinking water<br>catchments. This contradicts the<br>Strategy recommendations.<br>Zone RU1 is more flexible. |
| 2. Protect<br>agricultural land<br>resources   | 2.1 Adopt the land use designations in Figure<br>6.1 including Primary Production / Rural<br>Landscape / Forestry / Rural Small Holdings  | BLEP2012 is roughly consistent<br>with Figure 6.1 in the Strategy.<br>However, the Strategy failed to<br>resolve the conflict between use<br>of agricultural zones and<br>environmental zones in the<br>drinking water catchments.                                     |
| 3. Minimise the fragmentation of agricultural land   | 3.2 Consider including performance-based<br>criteria for minimum lot size with an ancillary<br>dwelling for intensive forms of agriculture as a<br>local provision.   | This Proposal does not affect the<br>minimum lot size or<br>fragmentation or dwelling<br>permissibility. No impact.  |
| 4. Promote<br>sustainable<br>management of<br>natural resources<br>for primary<br>production                         | <ul> <li>4.1 Ensure planning policy supports efficient<br/>and sustainable irrigation practices on farms.</li> <li>4.3 Investigate with industry the potential for<br/>re-use and recycling of waste products</li> <li>4.4 Locate and design primary industry and<br/>associated land uses to minimise potential</li> </ul>   | The original intent of using Zone<br>E3 was to limit some uses that<br><u>may</u> have higher impacts on the<br>drinking water catchment.<br>However, it is possible to meet<br>these recommendations through<br>greater flexibility and merit                         |

Version D (January 2015)

IPLAN PROJECTS **Planning & Development Solutions** 

| Strategy   | Policy Actions  | Comment   |
|--|---|---|
|  | <ul> <li>hazards, such as chemical spills, particularly<br/>onto productive land and watercourses.</li> <li>4.5 Develop programs with primary industries to<br/>address drainage and management of irrigation<br/>wastewater to prevent adverse impacts</li> <li>4.8 Create environmentally sensitive area<br/>overlays with associated assessment clauses</li> </ul>                               | assessment processes and<br>programs to educate primary<br>industries to minimise impacts.<br>The use of the drinking water<br>catchment overlay assists with<br>determining impacts. Proposal<br>not inconsistent with Strategy.   |
| <ul><li>5. Protect and<br/>enhance forestry<br/>resources AND</li><li>6. Promote the<br/>forestry industry<br/>in the sub-region</li></ul>   | <ul> <li>5.2 Encourage the development of forestry in<br/>locations where the impact on water resources<br/>is appropriately managed</li> <li>6.1 Encourage State Forests, existing private<br/>forestry operators and landowners to expand<br/>existing forests or introduce new commercial<br/>forestry</li> </ul>  | Private forestry is prohibited in<br>Zones E3 but permissible with<br>consent in Zone RU1 which<br>would provide more flexibility to<br>assess impacts on catchments.<br>Expansion of forestry is<br>consistent with Zone RU1.  |
| 7. Prevent and<br>manage land use<br>conflicts AND<br>10. Prepare<br>controls for<br>specific land uses<br>11. Provide<br>guidelines for<br>development<br>associated with<br>viticulture. | <ul> <li>7.1 Prepare specific controls for the agricultural land uses and regulate them through the LEP or DCP.</li> <li>10.1 Prepare specific controls in the LEP and/or DCP for [a range of agricultural and associated land uses].</li> <li>11.1 Prepare guidelines and controls on the location of wineries and cellar doors, dwelling houses, tourist facilities and accommodation.</li> </ul> | Council submits that an outright<br>prohibition through use of Zone<br>E3 is less appropriate than<br>providing merit controls in the<br>DCP to control key impacts on<br>the drinking water catchment. It<br>is difficult to predict what lands<br>could support these additional<br>uses without impacting<br>agriculture so flexibility is a more<br>sensible way forward. |

Planning Proposal to amend Planning Controls in the Drinking Water Catchments, Blayney Shire NSW

Overall, the replacement of Zone E3 with Zone RU1 would be broadly consistent with the recommendations as long as there are other controls (like Clause 6.5 of BLEP2012) that would protect natural resources and reduce land use conflicts.

5.2.2. Section 10 - Rural Industry & Yourism

The objective of Section 10 is to 'provide adequate opportunities for employment-generating activities that will support the community and the economy of the Sub-Region'.

**Rural Industries:** The Strategy states '[g]iven the importance of rural industries in the Sub-Region, demand for agricultural value-adding and processing industries could emerge. The zoning provisions in the rural area would need to be flexible to accommodate these industries, however development controls would need to be developed to ensure that impacts on surrounding agricultural activities were minimised.'

It is for this reason that this Proposal submits that Zone E3 is potentially unduly restrictive on the range of rural industries that could be suitable to support economic growth in rural areas such as the drinking water catchments.

Unlike standard industrial types, rural industries must often occur in proximity to the primary industries/ agriculture for efficiency. There is potentially sufficient transport and infrastructure in the drinking water catchments to support a wide range of rural industries that would not conflict with the industrial zones in Blayney or quasi-industrial uses in key villages. Broadly, however, the replacement of Zone E3 with Zone RU1 is consistent with allowing flexibility in rural areas as long as impacts are managed in the assessment process.

Version D (January 2015)

PLAN PROJECTS

| Strategy   | Policy Actions  | Comment  |
|--|---|--|
| 12. Encourage<br>the<br>establishment of<br>enterprises that<br>value-add to the<br>agricultural<br>industry | <ul> <li>12.1 Permit rural industries within the<br/>Primary Production and Rural Small Holdings<br/>zones.</li> <li>12.2 Allow for the development of value-<br/>adding activity, such as packing sheds and<br/>processing facilities, which complement<br/>primary industry in the local area.</li> <li>12.4 Examine opportunities for co-location<br/>of intensive primary industries and<br/>compatible processing activities to reduce<br/>land use conflict and achieve efficiencies</li> </ul> | The proposal is consistent with have<br>flexibility in the rural zones for<br>compatible rural industries. The<br>only discrepancy is determining<br>whether existing rural areas in<br>drinking water catchments require<br>an environmental zone or are better<br>suited to a rural zone. The recent<br>North Coast review suggests that<br>rural zones are more suited to<br>drinking water catchments. |

#### Planning Proposal to amend Planning Controls in the Drinking Water Catchments, Blayney Shire NSW

**Tourism:** The Strategy states '[t]ourism planning needs to avoid any adverse impacts on agriculture and should concentrate low impact rural tourism, particularly where it includes overnight accommodation, in and around rural towns.'

| Strategy  | Policy Actions   | Comment  |
|---|--|--|
| 15. Identify land<br>that is<br>appropriate for<br>tourísm<br>development               | 15.5 Encourage sustainable rural tourist facilities in rural zones including farm stays, ecotourism resorts and associated facilities through the development of a DCP | As the land use permissibility<br>between Zones E3 and RU1is not<br>significantly different for tourism<br>uses then the amendment will have<br>little impact. |
| 17. Promote and<br>enhance those<br>qualities of the<br>region that<br>attract tourists | 17.5 Require rigorous site analysis and<br>innovative design for any tourism<br>development in environmentally sensitive<br>areas.                                     | This is something best managed<br>through a DCP and merit<br>assessment controls for tourism<br>land uses.   |

| Strategy   | Policy Actions   | Comment  |
|--|--|--|
| 11. Protect<br>known and<br>potential mineral<br>and extractive<br>resources | <ul> <li>11.2 Known resources and areas of identified high mineral potential would not be unnecessarily sterilised by inappropriate zoning or development.</li> <li>11.5 Development for the purposes of mines and extractive industries would be permitted in the Primary Production zone.</li> </ul> | As the land use permissibility<br>between Zones E3 and RU1is not<br>significantly different for mining /<br>extractive industry uses then the<br>amendment will have little impact.<br>There is only one known mining<br>location and increased agricultural<br>and rural industries are unlikely to<br>conflict with its ongoing use. |

5.2.3. Section 12 – Natural and Scenic Environment

The objective of Section 10 is to 'ensure that natural resources, the scenic environment and conservation values are preserved for the benefit of current and future generations'.

**Water Quality:** The Strategy states that '[h]ealthy water resources and catchments in the Sub-Region are critical to the wellbeing of both the Sub-Region due to the region's vital role for the agricultural industry. Protection of water quality and quantity is one of the highest priorities for the region and attention must be given to the cumulative impact of land uses and management of these resources. Provision of suitable buffers to development is critical in facilitating appropriate outcomes for natural resources, including groundwater and surface water.'

Version D (January 2015)

IPLAN PROJECTS Planning & Development Solutions

| Strategy  | Policy Actions   | Comment   |
|---|--|---|
| 2. Control<br>development in<br>drinking water<br>catchments                                    | <ul> <li>2.1 Implement a specific environmental protection zoning for land within the drinking water catchments.</li> <li>2.2 Restrict the type and intensity of development permissible in the drinking water catchment.</li> <li>2.3 Develop specific performance criteria based on the most current government endorsed Water Quality and River Flow Objectives, to be applied to all development in the drinking water catchment to further minimise adverse impacts.</li> </ul> | This is the core reason why Zone E3<br>was used in BLEP2012. However,<br>the Strategy was perhaps remiss in<br>not considering the use of the<br>drinking water catchment overlay as<br>a suitable tool to achieve a similar<br>outcome. With that control (and<br>further controls in the DCP) there is<br>the potential to restrict<br>inappropriate development in the<br>catchments and minimise adverse<br>impacts. <b>Council submits that</b><br><b>inconsistency with Policy Action 2.1</b><br><b>is not sufficient to refuse this</b><br><b>Proposal if the other strategies are<br/>addressed</b> . |
| 1. Ensure<br>development<br>does not have a<br>detrimental<br>impact on nearby<br>water bodies. | <ul> <li>1.1 Development to be located an appropriate distance from waterways.</li> <li>1.4 On-site effluent management is to be in accordance with an adopted DCP for On-Site Sewage Management and the NSW Government's Environment and Health Protection Guidelines.</li> <li>1.6 Identify and map environmentally sensitive waterways.</li> </ul>  |   |

#### Planning Proposal to amend Planning Controls in the Drinking Water Catchments, Blayney Shire NSW

The Subregional Strategy recommends that Council implement a specific environmental protection zoning for land within the drinking water catchments and, in particular, the Strategy Area maps suggested in the legend that this would be an 'Environmental Management' zone and Zone E3 is listed as one of the possible zones to be applied to the new local environmental plan in Chapter 15 – Recommendations for LEPs.

However, the Strategy also recommends the use of 'drinking water catchment' overlays and the use of the Standard Instrument Local Provision for drinking water catchment protection. Therefore, it could be argued that this clause meets the objectives for water quality protection set out in the Strategy as an alternative to an environmental zone.

**Biodiversity:** It is not intended that the change in zoning would remove the use of the Terrestrial Biodiversity mapping or the Riparian Corridors and Waterways mapping that trigger additional controls in BLEP2012 to protect these significant resources. However, it is important to note that the two drinking water catchments do not include a significant amount of areas identified as sensitive biodiversity or riparian corridors (see Section on Site Analysis) so the impacts of this proposal are likely to be limited and can be addressed through a merit assessment process.

**Scenic Quality:** The additional permitted land uses in Zone RU1 are primarily for a rural zone and have a low impact (when appropriately designed) on scenic quality.

**Environmental Hazards:** The drinking water catchments do not have any significant flooding or bushfire threats over and above other rural lands so the proposed amendment to Zone RU1 is unlikely to result in inappropriate development in environmental hazard areas.

Version D (January 2015)

PLAN PROJECTS

#### NSW NORTHERN COUNCILS ENVIRONMENTAL ZONES REVIEW

#### 6.1. Area / Reason for the Review

The Department of Planning and Environment (DPE) has highlighted that the issue of environmental zoning is currently being reviewed by Councils along the North Coast of NSW. The reason for the review was that there was concern that councils were introducing environmental zones and overlays as they updated their LEPs without evidence of the environmental significance of the land and, in some cases, these zones were being applied to rural and agricultural land which has the potential to limit the use of this land for agricultural purposes.

The review applies to the zoning of land in Ballina, Byron, Lismore, Tweed and Kyogle LGAS. It is an independent review by Parsons Brinckerhoff. The *Northern Councils E Zone Review Interim Report* (30 September 2013) was placed on public exhibition in May/June of 2014 and is under consideration by DPE. DPE has provided preliminary responses to the Interim Report but no formal position has been adopted with regard to environmental zonings.

Whilst the review only applies to those specific LGAs at this time, some of the considerations and principles raised by the Interim Report are relevant to the discussion of the use of Zone E3 in Blayney Shire.

#### 6.2. Key Recommendations & Criteria

The relevant consultant's key draft recommendations are as follows (taken from DPE Frequently Asked Questions Sheet:

- a) Environmental zones should only be applied to those areas which have important environmental values, based on validated ecological evidence;
- b) Land that does not meet the criteria should be zoned according to its primary use;
- c) Where an environmental value is identified which may not warrant an environmental zone, it should be protected through an environmental overlay on the LEP map which an accompanying clause. The consultant considers environmental values which should be managed in this way are <u>drinking water</u> <u>catchment areas</u>, scenic protection areas, coastal risk areas and terrestrial biodiversity;
- d) Extensive agriculture should be permitted without consent on E3 zoned land;
- e) Aesthetic values should be removed as an attribute from the E3 zone.

In effect the consultant is suggesting that <u>on the North Coast</u> drinking water catchment areas are best protected by adopting a drinking water catchment overlay and the DPE has agreed that where this is the <u>only</u> issue then this is appropriate. Where there is cleared land used for agricultural or rural purposes it should be given an appropriate rural zoning if there are not substantial environmentally sensitive areas. The DPE does not support the use of overlays for scenic protection or terrestrial biodiversity.

The consultant has recommended the application of a set of criteria for applying the E3 zone as follows (excerpt from Interim Report, p.77 – see below).

In response, the land in Blayney's E3 zone does not meet criteria 1-2 & 4-6 as it does not contain rainforest; old growth forest; rare, endangered or vulnerable forest ecosystems; coastal foreshore or coastal hazard; or on vegetated land where the vegetation is critical (i.e. to prevent erosion, landslides, flood or drought, etc.).

The only criterion that is partially met is Criteria No.3 – as there are identified riparian corridors through the lands but these do not contain any wetland or estuarine vegetation. The riparian corridors are identified on the Riparian Lands and Waterways Maps and receive protection under Clause 6.6 – Riparian land and watercourses so it may not need an Environmental Zone to protect the riparian outcomes.

Version D (January 2015)

iPLAN PROJECTS Planning & Development Solutions

|    | unerie   |  |  |
|----|--|--|--|
|    | Land identified within a validated spatial dataset comprising areas of all types of rainforest other than SEPP 26<br>mapped areas  |  |  |
| 22 | Land identified within a validated spatial dataset comprising amas of old-growth forest, defined as an<br>ecologically insture forest where the effects of disturbances are now negligible (Commonwealth of Australia<br>1997)   |  |  |
| 70 | Land identified within a validated spatial dataset comprising areas of riparian, wetland and estuarine vegetation other than SIPP 14 mapped areas  |  |  |
| 4  | Land identified within a validated spatial dataset comprising areas of rare, endangered and vulnerable forest<br>ecosystems based on criteria defined by the Joint ANZECC/MCFFA National Forest Policy Statement<br>Implementation sub-committee (JANIS) (Commonwealth of Australia 1997). |  |  |
| 5  | Land identified within a validated spatial dataset comprising areas of native vegetation on coastal foreshores<br>and land subject to coastal hazards (as listed under the <i>Coastal Protection Act 1979)</i> , including climate<br>change effects.                                      |  |  |
|    | Land identified within a validated spatial dataset comprising areas of land where strict controls on development should apply. Such land includes those areas of native vegetation where the ecosystem services provided by the vegetation is critical including:                          |  |  |
| 6  | <ul> <li>where the tisks of severe erosion and landslides are extremely high (i.e. steep land) and the consequences<br/>are potentially catastrophic</li> </ul>  |  |  |
|    | <ul> <li>where native vegetation that is critical to watershed protection (i.e. when vegetation protects against<br/>catastrophic floods or drought and the destruction of fisheries where spawning grounds are protected by<br/>mangroves or riparian forests).</li> </ul>                |  |  |

Planning Proposal to amend Planning Controls in the Drinking Water Catchments, Blayney Shire NSW

Therefore, it is submitted that the criteria suggested in the Interim Report for the application of an E3 Zone is only partially met but has no significant environmental resource that requires protection and, therefore, the land should be returned to an appropriate rural zone.

#### 6.3. Implications of E Zone Review

The Frequently Asked Questions Sheet from DPE suggests that DPE will support the removal of E zones where it can be protected by an alternate overlay, such as the Drinking Water Catchment maps and standard clause. However, there are a number of more detailed matters that have not yet been agreed and the Department is currently reviewing submissions from the exhibition of the Interim Report before it will set out its preferred position.

The Fact Sheet also suggests this position will be applied state-wide and that the Minister for Planning will in the future issue a direction to councils about the criteria that must be used when applying an E2 or E3 zone. This would apply when a council sought to amend their local environmental plans. Blayney may be taking a small risk in seeking the removal of the E zone before the Department has finalised its position. However, it could be argued that the Blayney LGA has quite a different set of circumstances to the North Coast Councils and should be considered on its own merits and should not have to wait for the North Coast matter to be resolved. Also, there appears to be a relatively clear direction to remove E zones when there is an additional drinking water catchment overlay / protection and no other matters of environmental significance and it is not expected this will change.

It is important to note that any land use zone and/or drinking water catchment overlay only is considered when a development application is lodged for a particular land use, though it may also affect where complying development can occur. If a land use does not require an application then it will not need to address these criteria.

Version D (January 2015)

PLAN PROJECTS Planning & Development Solutions

#### Planning Proposal to amend Planning Controls in the Drinking Water Catchments, Blayney Shire NSW

# 7. PUBLIC HEALTH ACT & DRINKING WATER GUIDELINES

# 7.1. Public Health Act 2010 (NSW)

It is important to note that under the *Public Health Act 2010* there are a number of obligations including but not limited to Clause 25 – Quality assurance programs that states:

- (1) A supplier of drinking water must establish, and adhere to, a quality assurance program that complies with the requirements prescribed by the regulations.
- (2) The regulations may make provision for or with respect to any of the following:
  (a) the tests on water and other substances to be carried out by a supplier of drinking water pursuant to this Division,

(b) the records to be maintained by a supplier.

(3) The Chief Health Officer may, by notice in writing, exempt a supplier of drinking water or class of suppliers from subsection (1) if the Chief Health Officer is satisfied that the supplier, or class of suppliers, is subject to other appropriate licensing or other regulatory requirements.

Under Clause 34 of the Regulations it further expands on these requirements by stating:

- (1) For the purposes of section 25 (1) of the Act, a **quality assurance program** must address the elements of the Framework for Management of Drinking Water Quality (as set out in the **Australian Drinking Water Guidelines** published by the National Health and Medical Research Council) that are relevant to the operations of the supplier of drinking water concerned.
- (2) A supplier of drinking water must provide the Director-General with a copy of its most recent quality assurance program.
- (3) The Director-General may arrange for the review of a quality assurance program of a supplier of drinking water at any time.

#### A supplier of drinking water includes, amongst other,

- (c) a water supply authority within the meaning of the Water Management Act 2000,
- (d) a local council or a county council exercising water supply functions under Division 2 of Part 3 of Chapter 6 of the Local Government Act 1993,

## 7.2. Guidelines

Section 3.3 of the *Australian Drinking Water Guidelines 2011* (updated Dec 2013) states that 'prevention is an essential feature of effective drinking water quality management. Preventative measures are those actions, activities and processes used to prevent hazards from occurring or reduce them to acceptable levels'. In particular, there should be a 'multiple barrier approach' and 'preventative measures should be applies as close to the source as possible, with a focus on prevention in catchments rather than sole reliance on downstream control'. It then goes on to state on p.28-29:

#### Cotchment management and source water protection

Catchment management and source water protection provide the first barrier for the protection of water quality. Where catchment management is beyond the jurisdiction of drinking water soppliers, the planning and implementation of preventive measures will require a coordinated approach with relevant agencies such as planning authorities, catchment boards, environmental and water resources regulators, road authorities, and emergéncy services.

Effective catchment management and source water protection include the following elements:

- developing and implementing a catchineni management plan, which includes preventive measures to protect surface water and groundwater.
- ensuring that planning regulations include the protection of water resources from potentially polluting activities, and are enforced;
- promoting awareness in the community of the impact of human activity on water quality.

Version D (January 2015)

PLAN PROJECTS Planning & Development Solutions

#### Planning Proposal to amend Planning Controls in the Drinking Water Catchments, Blayney Shire NSW

Whether water is drawn from surface catchments or underground sources, it is important that the characteristics of the local catchment or aquifer are understood, and the scenarios that could lead to water pollution are identified and managed. The extent to which catchment pollution can be controlled is often limited in practical terms by competition for water and pressure for increased development in the catchment.

Effective catchment management has additional benefits. By decreasing contamination of source water, the amount of treatment and quantity of chemicals needed is reduced. This may lead to health benefits through reducing the production of treatment by-products, and economic benefits through minimising operational costs.

In surface water catchments, preventive measures can include:

- selection of an appropriate source water (where alternatives exist);
- exclusion or limitations of uses (e.g. restrictions on human access and agriculture);
- protection of waterways (e.g. fencing out livestock, management of riparian zones);
- use of planning and environmental regulations to regulate potential water-polluting developments (e.g. urban, agricultural, industrial, mining and forestry);
- use of industry codes of practice and best practice management;
- regulation of community and on-site wastewater treatment and disposal systems;
- stormwater interception.

In addition, the 2013 *NSW Guidelines for Drinking Water Management Systems* reiterates these requirements and requires suppliers of water to prepare a Drinking Water Management System (DWMS) to address risks in their catchments. The document at p.15 states that:

'catchments can be protected by limiting access by humans and animals, limiting land use to nonpolluting types that will not contribute to risk and the use of buffer zones. Development controls can be used to ensure that development within catchments is appropriate. Planning Instruments such as Local Environmental Plans (LEPs) may be used to help protect catchment integrity, for example inclusion of local provisions which restrict land use within catchments to types that will not pose a risk to water quality.'

The Public Health Unit of NSW Health (representative Marnie Page) has reiterated these regulations and overarching controls at several recent conferences including EDAP (April/May 2014) and the Central West Planners Group (November 2014).

We have not yet determined if the Central Tablelands Water authority has prepared a Drinking Water Management System in accordance with the guidelines to comply with the Public Health Act but it was partly their original direction to include Zone E3 in BLEP2012 and the drinking water catchment overlay. We expect that a full and complete response from CTW prior to or during the public exhibition process will assist in a decision relating to these issues.

## 7.3. Lond Use that may Conflict with these Requirements

Zone E3 permits **intensive plant agriculture** (excluding **turf farming**) with consent but prohibits **intensive livestock agriculture** (which was part of the original reason for Zone E3 to differentiate it from Zone RU1).

It is for these reasons that Council have elected to ensure that **intensive plant agriculture** and **intensive livestock agriculture** are permissible **with consent** in Zone RU1 if it were to include the drinking water catchment and would rely on the merit assessment process to ensure that development with consents have appropriate measures in place to protect the catchment and those that are unsuitable are not approved.

Version D (January 2015)

iPLAN PROJECTS Planning & Development Solutions

# Planning Proposal to amend Planning Controls in the Drinking Water Catchments, Blayney Shire NSW

# 7.4. Other Councils

It is important to note that there are discrepancies between Councils in the region on this issue. A number of Councils have drinking water catchments and do not define / map these areas for the purposes of their LEPs. Many of these have utilised rural zoning for these catchments and generally these permit a wide variety of rural uses including some forms of intensive agriculture (often without consent).

However, differences with Council may relate to the strategic nature of their drinking water catchments, the perceived risk and planning response, appropriate development control using other tools / methods, or less awareness of the changing guidelines/regulations for water suppliers. Whatever the reasons, Blayney Shire Council must form its own opinion (in collaboration with the key stakeholders) on the issue.

Version D (January 2015)

PLAN PROJECTS

## Planning Proposal to amend Planning Controls in the Drinking Water Catchments, Blayney Shire NSW

# 8. COMPLETED KEY STAKEHOLDER CONSULTATION

We have already approached a number of the key stakeholders during the preparation of this Planning Proposal (See Appendices for copies of all relevant correspondence) as follows:

## 8.1. Department of Planning & Environment (DPE)

The following key meetings have occurred with officers at DPE:

| Date                    | Department Officers   | Comments/Outcomes   |
|-------------------------|---|---|
| 16/9/14                 | Meeting with Erin<br>Strong of DPE Dubbo                          | Brief overview of the Planning Proposal and relationship to the<br>North Coast review of E Zones. Erin had also previously<br>discussed this with the Director of Environmental Services (Mark<br>Dicker) at Blayney Shire.   |
| 2/10/14                 | Telephone discussion &<br>emails with Noo Porima<br>of DPE Sydney | Arrangement for DPE to prepare the SILEP mapping for the<br>Planning Proposal based on MapInfo files to be provided to the<br>Department.   |
| 20/11/14                | Telephone discussions<br>with Erin Strong of DPE                  | Discussions regarding the permissibility with consent of intensive<br>plant agriculture in the drinking water catchment in Zone RU1,<br>particularly, whether there was a method to permit it without<br>consent in Zone RU1 whilst permitting with consent in the<br>catchment with the same zone. |
| Dec<br>2014/Jan<br>2015 | Council officers met<br>with DPE<br>representatives               | Review of Draft Planning Proposal with concerned citizens and agreement on final amendments to permit Council adoption.   |

# 8.2. Office of Environment & Heritage (OEH)

# The following key meetings have occurred with officers at OEH:

| Date     | Department<br>Officers   | Comments/Outcomes   |
|----------|--|---|
| 2/10/14  | Email to Erica<br>Baigent. Brief<br>discussion with<br>David Kerring | Email overviewing Planning Proposals and seeking preliminary comments to assist in drafting.  |
| Late Oct | Telephone<br>discussion Erica<br>Baigent,<br>Conservation<br>Officer | Erica reiterated the submission made to Blayney Council during the<br>public exhibition of BLEP2012. This submission is in the Appendices. In<br>summary OEH supported the exclusion of intensive livestock agriculture<br>and intensive plant agriculture and water treatment facilities from the<br>E3 zone which has been applied to the drinking water catchment.<br>Therefore, they are less likely to support the proposed introduction of<br>Zone RU1 with these land uses being permissible with consent. |

#### 8.3. NSW Agricolture

The following key meetings have occurred with officers at NSW Agriculture:

|         | Department<br>Officers   | Comments/Outcomes   |
|---------|--|---|
| 2/10/14 | Mary Kovac –<br>Resource<br>Management<br>Officer – NSW<br>Agriculture | The broad intent of the proposed rezoning and removal of Zone E3 was<br>not considered a critical issue for NSW Agriculture as a rural zoning was<br>proposed. There would be more flexibility for agricultural uses which is<br>consistent with their charter. For this reason, NSW Agriculture is happy<br>to be notified as part of the public exhibition process and does not need<br>to comment prior to lodgement of the Planning Proposal. |

Version D (January 2015)

PLAN PROJECTS

#### Planning Proposal to amend Planning Controls in the Drinking Water Catchments, Blayney Shire NSW

8.4. Central Tablelands Water (CTW)

#### The following key discussions have occurred with officers at CTW:

| Date     | Department<br>Officers                         | Comments/Outcomes   |
|----------|--|---|
| 18/11/14 | Gavin Rhodes –<br>General<br>Manager of<br>CTW | Meeting with Mr Rhodes explaining the proposed outcomes in the<br>drinking water catchment for Lake Rowlands for which CTW is the<br>responsible water authority. The requirements under the <i>Public Health</i><br><i>Act 2010</i> and the 2013 <i>NSW Guidelines for Drinking Water Management</i><br><i>Systems</i> were highlighted. A copy of the draft Planning Proposal was<br>provided to Mr Rhodes by email on the same date for comment. |

#### 8.5. Central Tablelands Local Land Services (LLS)

#### The following key meetings have occurred with officers at OEH:

| Date    | Department<br>Officers           | Comments/Outcomes   |
|---------|----------------------------------|---|
| 2/10/14 | Email to Casey<br>Proctor of LLS | Email overviewing Planning Proposals and seeking preliminary comments to assist in drafting. No comment yet received. |

#### 8.6. NSW Health

#### The following key discussions on this topic have occurred with officers from NSW Health:

| Date              | Department<br>Officers                     | Comments/Outcomes  |  |
|-------------------|--|--|--|
| April/May<br>2014 | Marnie Page,<br>EHO, Public<br>Health Unit | Discussions at the EDAP Conference (Cowra) on how Blayney came to<br>have Zone E3 and a drinking water catchment overlay for its catchments<br>and support for this position.                              |  |
| 5 Nov<br>2014     | Marnie Page,<br>EHO, Public<br>Health Unit | Reiteration at the Central West Planners Forum (Parkes) of support for protection of drinking water catchments in Blayney and concerns about removal of any protections as part of this Planning Proposal. |  |

Version D (January 2015)

PLAN PROJECTS

#### Planning Proposal to amend Planning Controls in the Drinking Water Catchments, Blayney Shire NSW

#### 9. PLANNING PROPOSAL

The layout of this section is in accordance with the requirements of the Department of Planning's document dated October 2012 entitled '*Guide to preparing planning proposals*'.

## 9.1. Part 1 -- Objectives and Intended Outcomes of Proposed Instrument

Part 1 of the planning proposal should be a short, concise statement setting out the objectives or intended outcomes of the planning proposal. It is a statement of what is planned to be achieved, not how it is to be achieved. It should be written in such a way that it can be easily understood by the general community.

The objective of this planning proposal is to made amendments to *Blayney Local Environmental Plan* 2012 ('BLEP2012') to facilitate a wider range of land uses (primarily agricultural and rural industrial land uses) in the drinking water catchments of Blayney Shire.

The current Zone E3 Environmental Management is considered overly restrictive in terms of land use permissibility and the existing *Clause 6.5 – Drinking water catchments* and the associated Drinking Water Catchment Maps provide sufficient protection to assess a wider range of agricultural and other land uses on their merits without compromising the importance of protecting the drinking water catchments and drinking water quality.

#### 9.2. Part 2 – Explanation of Provisions to be included in Proposed Instrument

**Part 2** of the planning proposal provides a more detailed statement of how the objectives or intended outcomes are to be achieved by means of amending an existing local environmental plan.

The proposed mechanism(s) to achieve the objective(s) in Part 1 above is to amend *Blayney Local Environmental Plan 2012* (BLEP2012) as follows:

- a) Amend the land use zone for all of the lands that are in Zone E3 Environmental Management in BLEP2012 and replace it with Zone RU1 Primary Production. This will amend the following Land Zoning Maps: LZN\_004; LZN\_004A; LZN\_005; LZN\_005B; LZN\_005C; LZN\_007. As a result, the land use permissibility (without consent / with consent / prohibited) of Zone RU1 will apply to these lands (see table below).
- b) Zone E3 will be removed from the Land Use Table in Part 2 of BLEP2012 as there are no other land utilising this zone and potentially the reference to Zone E3 Environmental Management can be removed from all Land Zoning Maps;
- c) Any reference to Zone E3 will be removed from the following clauses:
  - i) Clause 4.1AA Minimum subdivision lot size for community title
  - ii) Clause 4.1A Minimum subdivision lot size for strata plan schemes in certain rural and environmental zones
  - iii) Clause 4.2A Erection of dwelling houses or dual occupancies on land in certain rural and environmental protection zones.
- d) The following minor amendments to land use permissibility will be made to Zone RU1 Primary Production - **Emergency service facilities** – permissible with consent

An excerpt from BLEP2012 providing a comparison of the objectives and permitted land uses in Zone RU1 and Zone E3 is set out in the above section reviewing the potential planning outcomes.

Version D (January 2015)

PLAN PROJECTS

#### Planning Proposal to amend Planning Controls in the Drinking Water Catchments, Blayney Shire NSW

#### 9.3. Part 3 – Justification of Objectives, Outcomes & Process for Implementation

Part 3 of the planning proposal provides a justification that sets out the case for the making of the proposed instrument. The overarching principles that guide the preparation of planning proposals are:
The level of justification should be proportionate to the impact the planning proposal will have;

 It is not necessary to address the question if it is not considered relevant to the planning proposal (as long as a reason is provided why it is not relevant);

• The level of justification should be sufficient to allow a Gateway determination to be made with the confidence that the instrument can be finalised within the time-frame proposed.

As a minimum a planning proposal must identify any environmental, social and economic impacts associated with the proposal. Generally detailed technical studies are not required prior to the Gateway determination.

The Director General has set out the following requirements as matters that must be addressed in the justification of all planning proposals:

#### SECTION A

- 1) Is the planning proposal the result of any strategic study or report?
- 2) Is the planning proposal the best means of achieving the objectives or intended outcomes, or is there a better way?

#### SECTION B

- 3) Is the planning proposal consistent with the objectives and actions of the applicable regional or subregional strategy?
- 4) Is the planning proposal consistent with a council's local strategy or other local strategic plan?
- 5) Is the planning proposal consistent with applicable State Environmental Planning Policies?
- 6) Is the planning proposal consistent with applicable Ministerial Directions (s.117 directions)?

#### SECTION C

- 7) Is there any likelihood that critical habitat or threatened species, populations or ecological communities, or their habitats, will be adversely affected as a result of the proposal?
- 8) Are there any other likely environmental effects as a result of the planning proposal and how are they proposed to be managed?
- 9) Has the planning proposal adequately addressed any social and economic effects?

#### SECTION D

- 10) Is there adequate public infrastructure for the planning proposal?
- 11) What are the views of state and Commonwealth public authorities consulted in accordance with the Gateway determination?

The following justification sets out the case for the amendment to BLEP2012.

Version D (January 2015)

PLAN PROJECTS Planning & Development Solutions

#### Planning Proposal to amend Planning Controls in the Drinking Water Catchments, Blayney Shire NSW

#### 9.3.1. SECTION A

#### 1) Is the planning proposal the result of any strategic study or report?

This planning proposal has not been initiated by a strategic study or report for the Blayney Shire but does seek to address some of the recommendations of the *Northern Councils E Zone Review Interim Report* (30 September 2013) and is consistent with the principles of the Councils of Blayney, Cabonne and Orange City (2008) *Subregional Land Use Strategy* ('Subregional Strategy') prepared by GHD in 2008 that has been adopted by both Council and the NSW State Government.

Whilst the Subregional Strategy recommended an Environmental Management zone for the drinking water catchments, it perhaps did not consider the potential to utilise a drinking water catchment overlay instead and to meet the recommendations for agriculture that are more suited to the historical use of these lands. Therefore, it could be argued that this Proposal seeks to provide alternate planning controls in BLEP2012 that meet the underlying principles and recommendations of the Strategy.

## 2) Is the planning proposal the best means of achieving the objectives or intended outcomes, or is there a better way?

The only two ways that Council could approve the additional land uses (predominantly intensive agriculture and some ancillary commercial premises) would be to either change the zoning or to add these uses as Additional Permitted Uses to BLEP2012. It is our understanding that Additional Permitted Uses are not preferred for this purpose (particularly when Zone E3 would then 'mimic' Zone RU1 with no additional distinction/separation in outcome). In addition, the North Coast E Zone Interim Report suggests that the removal of Zone E3 over drinking water catchments is likely to be the preferred solution by key stakeholders where the drinking water catchment is protected by other controls (such as the drinking water catchment overlay/clause and other environmentally sensitive mapping/clauses).

#### 9.3.2. SECTION 8

## 3) Is the planning proposal consistent with the objectives and actions of the applicable regional or sub-regional strategy?

As stated above, the GHD (2008) Subregional Strategy applies to the rural and environmentally zoned lands (outside of key settlements) across the Councils of Cabonne, Blayney and Orange City. The Strategy included a local profile, issues paper and final strategy. The primary recommendations are in Part D – Land Use Strategies in the Final Strategy (July 2008), in particular:

- a) Section 9 Agriculture;
- b) Section 10 Industry (including rural industry / tourism etc.);
- c) Section 12 Natural and Scenic Environment.

The proposed development is <u>consistent</u> with the principles set out in the sections relating to agriculture and industry and with most of the key environmental concerns relating to the drinking water catchments.

However, the Subregional Strategy made the recommendation to include all of the drinking water catchments in Zone E3 Environmental Management – which was somewhat inconsistent / at odds with the recommendations for agriculture and rural industry in the other sections considering that the drinking water catchments are primarily rural rather than environmentally sensitive areas.

Council considers that the inclusion of a range of environmentally sensitive area maps and standard instrument clauses (including but not limited to drinking water catchment maps) meets the environmental principles of the Strategy but offers an alternative set of planning controls to achieve the same outcome.

| Version D (January 2015) 。 。 。 。 。 。 。 。 。 。 。 。 。 。 。 。 。 。 。 | <b>Page  </b> 37 |
|--|------------------|

#### Planning Proposal to amend Planning Controls in the Drinking Water Catchments, Blayney Shire NSW

As a result, the Proposal can be seen to be consistent with the underlying principles of the Strategy (albeit with a different planning approach) so we submit that the Planning Proposal can be considered under delegation to Council if the Gateway Determination is positive.

#### 4) Is the planning proposal consistent with a council's local strategy or other local strategic plan?

The Subregional Strategy addressed above and in Section 5 of this Proposal is the primary strategy that directly addresses rural and environmental areas outside of the key towns/villages in Blayney LGA. The only other local strategy that has high level objectives for development in Blayney LGA is the *Community Strategic Plan 2025*. Its purpose is to identify the community's main priorities and aspirations for the future and to plan strategies for achieving those goals. The Proposal can be seen to be consistent with these goals and aspirations as there are alternative controls retained in BLEP2012 to protect the natural environment whilst facilitating economic growth by minimising overly prescriptive zoning.

#### 5) Is the planning proposal consistent with applicable State Environmental Planning Policies?

The Planning Proposal is consistent with all of the State Environmental Planning Policies as follows:

| SEPP No.30 – Intensive Agriculture   |  |
|--|--|
| One of the reasons for making this proposed change in zoning is to potentially perm<br>agriculture in the drinking catchment if suitable mechanisms to protect the environ<br>quality are maintained. This SEPP defines when intensive livestock agriculture will r<br>consent and consideration of public feedback, pollution, and measures to mitigate<br>impacts. Therefore, this SEPP provides additional protections through the developr<br>process and supports this proposed amendment.  | ment and water<br>equire development<br>potential adverse  |
| SEPP No.44 – Koala Habitat Protection  |  |
| Blayney is a listed LGA to which this SEPP applies. This policy aims to encourage the<br>and management of areas of natural vegetation that provide habitat for koalas. Th<br>will not substantially affect the predominantly rural outcomes that already occur w<br>water catchments. The biodiversity overlay and control in BLEP2012 will also aid in<br>stands of native vegetation through the area. Therefore, the Proposal is consistent  | e change in zoning<br>ithin the drinking<br>protecting significant   |
| SEPP No.55 – Remediation of Land   |  |
| This policy applies to the whole State including the Site. Under Clause 6, contaminatis to be considered in zoning or rezoning proposals. The change from an environme zone is only expected to increase the permissibility of intensive agricultural uses an industries and associated commercial premises. It is not expected that this change in increased land use conflicts with potentially contaminated lands. This can be ad development application for these additional uses as they require consent. If any c found then it will be remediated in accordance with SEPP55 and the relevant guide Therefore, the Proposal is consistent with this SEPP. | ntal zone to a rural<br>d some rural<br>of zoning will result<br>dressed as part of any<br>ontamination is |
| SEPP No.62 – Sustainable Aquaculture   |  |
| Aquaculture is already permitted with consent in Zone E3 so any amendment to Zo<br>aquaculture is also permitted with consent will have no impact and will be consister  |  |
| SEPP No.64 – Advertising and Signage   |  |
| To the extent that this Proposal seeks to amend the permissibility of land uses in Zo<br>Production to enable building identification signs without consent – it is consistent<br>SEPP to ensure signage is compatible with the amenity and visual character of these<br>identification signage is generally low impact.   | with objectives of this  |
| SEPP (Mining Petroleum Production and Extractive Industries) 2007  |  |

## SEPP (Mining, Petroleum Production and Extractive Industries) 2007

This SEPP applies to land identified as having mineral potential. The most relevant map is the Mineral Resource Audit map provided by the former Department of Mineral Resources in 2010. As

Version D (January 2015)

PLAN PROJECTS Planning & Development Solutions

#### Planning Proposal to amend Planning Controls in the Drinking Water Catchments, Blayney Shire NSW

demonstrated in the Site Analysis Section above, there are no existing or potential resource areas in the Suma Park catchment near Millthorpe and there is only one known existing extractive industry in the Lake Rowlands catchment known as Gordon's Quarry (NE of Barry) and the change of zoning is unlikely to significantly increase development potential (particularly dwelling potential) in or around this industry as a rural zone is proposed and there is no change in the minimum lot size. Therefore, the Proposal is consistent with this SEPP.

#### SEPP (Infrastructure) 2007

This SEPP is concerned with appropriate opportunities for infrastructure development throughout the State. The proposed rural zone would not be inconsistent with future infrastructure provision. Neither area is located on a State or Regional Road or a railway line. The primary infrastructure is likely to be water storage and reticulation as part of Lake Rowlands. The change in zoning is unlikely to significantly increase development potential (particularly dwelling potential) so traffic generation is unlikely to require RMS consideration. Therefore, the Proposal is consistent with this SEPP.

#### SEPP (Rural Lands) 2008

This policy aims to facilitate the orderly use and development of rural lands, identify Rural Planning Principles, reduce land use conflicts, and identify State significant agricultural land.

- The Rural Planning Principles are as follows:
- (a) the promotion and protection of opportunities for current and potential productive and sustainable economic activities in rural areas,
- (b) recognition of the importance of rural lands and agriculture and the changing nature of agriculture and of trends, demands and issues in agriculture in the area, region or State,
- (c) recognition of the significance of rural land uses to the State and rural communities, including the social and economic benefits of rural land use and development,
- (d) in planning for rural lands, to balance the social, economic and environmental interests of the community,
- (e) the identification and protection of natural resources, having regard to maintaining biodiversity, the protection of native vegetation, the importance of water resources and avoiding constrained land,
- (f) the provision of opportunities for rural lifestyle, settlement and housing that contribute to the social and economic welfare of rural communities,
- (g) the consideration of impacts on services and infrastructure and appropriate location when providing for rural housing,
- (h) ensuring consistency with any applicable regional strategy of the Department of Planning or any applicable local strategy endorsed by the Director-General.

Again, the change from an environmental to a rural zoning is likely to be consistent with the Rural Planning Principles and is aimed at increasing agricultural opportunities whilst providing appropriate alternative mechanisms to protect natural resources like the drinking water catchment. Therefore, the Proposal is consistent with this SEPP.

#### SEPP (Exempt and Complying Development Codes) 2008

This SEPP is addressed in more detail in Section 4.6 of this Proposal. Changing from Zone E3 to Zone RU1 will enable agricultural related development such as 'animal shelters' and 'farm buildings' to be undertaken as exempt development. Whilst one aim of changing the zoning was to enable more complying development in the drinking water catchment areas, the fact that most development would involve on-site effluent management would preclude it from being complying development under this Code.

Version D (January 2015)

iPLAN PROJECTS Planning & Development Solutions

Planning Proposal to amend Planning Controls in the Drinking Water Catchments, Blayney Shire NSW

#### 6) Is the planning proposal consistent with applicable Ministerial Directions (s.117 directions)?

The Planning Proposal is consistent with all of the relevant Ministerial Directions as follows:

#### 1. Employment & Resources - 1.2 Rural Zones (1 July 2009)

This direction seeks to protect rural zoned land from being rezoned for another use or increase the permissible density of that land. The variation from environmental zoned land to rural zoned land is consistent with this direction. The agricultural potential of the lands has been addressed also in the Site Analysis Section above.

#### 1. Employment & Resources - 1.3 Mining, Petroleum Production and Extractive Industries This Planning Proposal has demonstrated that the proposed development will not impact on any known or likely mineral resources in the area according to the former Department of Mineral Resources – Audit

Map 2012. This has been addressed also in the Site Analysis Section above.

#### 1. Employment & Resources - 1.5 Rural Lands

The objectives of this direction are to protect the agricultural production value of rural land and facilitate the orderly and economic development of rural lands for rural and related purposes. The key justification for the amendment from an environmental to a rural zone for this land is to achieve these objectives.

#### 2. Environment & Heritage - 2.3 Heritage Conservation

Whilst there are listed heritage items and potential for Aboriginal cultural heritage within the drinking water catchments, the change in zoning to a rural zone is not likely to significantly increase development potential or impacts on heritage or cultural items. This has been addressed also in the Site Analysis Section above.

3. Housing, Infrastructure & Urban Development - 3.4 Integrating Land Use and Transport (1 July 2009) Objectives of this direction seek to improve access to transport and reduce travel demand. The proposed rural zone will not significantly increase development requiring additional infrastructure and rural uses are appropriate in a rural zone.

#### 4. Hazard & Risk - 4.3 Flood Prone Land

This direction applies to all land that may be flood prone land in accordance with the *Floodplain* Development Manual 2005 and has been addressed also in the Site Analysis Section above. Whilst there is always a chance of flooding along the key watercourses in each catchment, historically this has been minor and is unlikely to significantly affect development potential for rural land uses. Any known flood impacts can be addressed during the assessment process.

#### 4. Hazard & Risk - 4.4 Planning for Bushfire Protection

As stated in the Site Analysis Section above, there are only limited areas of bushfire prone land within both catchments and these are unlikely to significantly affect the development potential of the land for rural and associated uses. Each development application can address site specific issues in accordance with *Planning for Bushfire Protection 2006*.

#### 9.3.3. SECTION C

## 7) Is there any likelihood that critical habitat or threatened species, populations or ecological communities, or their habitats, will be adversely affected as a result of the proposal?

As stated in the Site Analysis Section above, there are no known critical habitats or threatened species, populations or ecological communities, or their habitats within the drinking water catchments – though it is appreciated that there is remnant native vegetation and sensitive biodiversity due to historic vegetation removal in these areas. However, this issue is best addressed through merit assessment of each development application in accordance with the Biodiversity Maps and Riparian Lands and Waterways Maps in BLEP2012.

Version D (January 2015)

PLAN PROJECTS

Planning Proposal to amend Planning Controls in the Drinking Water Catchments, Blayney Shire NSW

## 8) Are there any other likely environmental effects as a result of the planning proposal and how are they proposed to be managed?

The key planning outcome of the replacement of Zone E3 with Zone RU1 is that it will potentially permit with consent a range of intensive agricultural land uses, rural industries, and some agriculturally related commercial premises. As these will require development consent, there is the opportunity to ensure that environmental impacts including water for irrigation, effluent management, chemical usage and storage, transport and infrastructure demand, and land use conflicts can be appropriately addressed through the assessment process.

#### 9) Has the planning proposal adequately addressed any social and economic effects?

The significant economic benefits of ensuring appropriate flexibility in rural areas to encourage appropriate rural and ancillary land uses is consistent with all major state policy and the Subregional Strategy. The only economic challenges are to ensure that new developments are economically viable, particularly when they are more distant from major infrastructure but zoning should not preclude the possibility of these land uses being considered. From a social perspective, the existing rural communities want Council to consider new more intensive rural developments and address any land use conflicts on a case-by-case basis. Social impacts are likely to be low from the proposed changes in planning tools to achieve similar development outcomes.

#### 9.3.4. SECTION D

#### 10) Is there adequate public infrastructure for the planning proposal?

Public infrastructure includes a range of infrastructure (e.g. roads), utilities (e.g. water, electricity, gas etc.), access to key services (retail, employment, health etc.) and access to open space and recreation. The proposed amendment from an environmental zone to a rural zone is not expected to significantly increase development potential or reliance on public infrastructure. However, if there are applications for intensive livestock agricultural, rural industries, or ancillary commercial premises the impacts on key infrastructure can be determined and managed through appropriate conditions and contribution plans. For most rural uses the public infrastructure is adequate.

## **11)** What are the views of state and Commonwealth public authorities consulted in accordance with the Gateway determination?

Section 10 of this Proposal sets out the consultation to-date with the key NSW Government authorities relevant to this rezoning and proposed development including the Department of Planning & Environment (DPE), Office of Environment and Heritage (OEH), Local Lands Services (LLS), and NSW Agriculture. Their responses are included in Section 7. No Commonwealth authorities are believed to be relevant to this application but this can be determined at the Gateway stage.

#### 9.4. Part 4 - Maps (where relevant) showing Intent of Planning Proposal

This Planning Proposal seeks to amend the land use zone for all of the lands that are in Zone E3 Environmental Management in BLEP2012 and replace it with Zone RU1 Primary Production. This will amend the following Land Zoning Maps: LZN\_004; LZN\_004A; LZN\_005; LZN\_005B; LZN\_005C; LZN\_007. No other maps require amendment in BLEP2012. The proposed amendments will be prepared in SILEP format by DPE after a positive Gateway Determination and prior to public exhibition.

Version D (January 2015)

iPLAN PROJECTS Planning & Development Solutions

#### Planning Proposal to amend Planning Controls in the Drinking Water Catchments, Blayney Shire NSW

- 9.5. Part 5 Community Consultation
- 9.S.1. Key Stakeholders

The key stakeholders for this Site include:

- a) Department of Planning & Environment (Gateway Determination process);
- b) Office of Environment & Heritage (within DPE) relating to environmental and water issues;
- c) Local Land Services (LLS) including the former Lachlan Catchment Management Authority;
- d) Orange City Council and Cowra Council as the adjacent local government authorities.

Additional stakeholders that may need to be notified when the Planning Proposal is on public exhibition include:

- a) The affected land owners;
- b) NSW Department of Primary Industries (NSW Agriculture) regarding the increased agricultural potential of the land which they are likely to support;
- c) NSW Department of Primary Industries (Office of Water) regarding treatment of the drainage lines / watercourses and water licencing for intensive agriculture (if required).
- d) NSW Trade & Investment Crown Lands Division if any Crown land exists in these areas;
- e) NSW Health Public Health Unit (re drinking water catchment protection).

#### 9.9.2. Proposed Notification

In addition to the previous notification of key stakeholders during the preparation of this Planning Proposal, Council is likely to provide a letter notifying all key stakeholders listed above of the dates that the Planning Proposal is on public exhibition and providing opportunity for further submissions (if required). Council is also expected to provide a letter notifying all relevant land owners in existing Zone E3 that the Planning Proposal is on public exhibition and providing opportunity for further submissions (if required).

#### 9.5.3. Proposed Public Exhibition & Consmunity Notification

#### Public Exhibition

Council will provide public notice of a proposed resolution to rezone land and specify a 28 day period during which submissions may be made to Council.

Notice will include:

- a) Notification in the Blayney Chronicle newspaper prior to the public exhibition period;
- b) Written notification to all land owners in existing Zone E3(as noted above);
- c) Provision of a copy of the Gateway Determination, Planning Proposal and supporting information at the Council Offices in Blayney.
- d) Any other requirements of the Gateway Determination made by the Department.

#### Submissions

Council will accept public submissions up to the close of the public exhibition period. All public submissions will be reviewed and summarised. The outcomes of any public hearing (if required) will also be considered prior to making a recommendation to Council.

#### Public Hearing

Under Section 57 of the EP&A Act Council must arrange a public hearing in respect of a planning proposal if one is requested by a key stakeholder or member of the public. The public hearing must be presided over by someone who is not a councillor or employee of Council (in the last five years). The presiding person should make a report available to Council on the outcomes of the public hearing.

Aaron Jones General Manager Biayney Shira Council PO Box 62 Biayney NSW 2799

Dear Mr. Jones

Attention: Leon Rodwell, Director Environmental Services

Thank you for your letter (dated 6<sup>th</sup> February 2012) seeking comment from the Office of Environment and Heritage (OEH) regarding the exhibited Oraft Blayney Local Environment Plan 2011 (LEP);

Please note that as of the 29<sup>th</sup> of February 2012, the Environment Protection Authority (EPA) has been recreated as an independent authority. However as part of the transition period for these new arrangements, EPA issues have been considered and included in this response.

The OEH and EPA have the following primary areas of interest relating to strategic land use planning and the preparation of new Local Environmental Plans (LEPs);

- The impacts of development and settlement intensification on biodiversity, Aboriginal cultural heritage, eix, water quantity and quality and noise related issues;
- 2. Adequate investigation of the environmental constraints of allected land;
- 3. Avoiding intensitication of land use and settlement in environmentally sensitive areas (ESAs),
- 4. Ensuring that development within a flooriplain is consistent with the NSW Government's Flood Prone Land Policy, the principles set out in the Floodplain Development Manual, and applicable urban and rural floodplain risk management plans.

We also understand that draft LEP's must comply with current statutory matters such as the Local Planning Directions under \$117 of the Environmental Planning and Assessment Act 1979 (EP&A Act).

We generally support strategic planning proposals which:

 Avoid rural settlement intensification in areas of biodiversity value. Aboriginal cultural heritage value and other environmentally sensitive areas;

> PO Box 2111 Cubbo NSW 2830 Level 148-52 Wingename Street Debbo NSW Tet (02) 8555 5312 Fax (02) 5894 9575 ASN 30 841 357 271 www.sevbonment.nsw.gov.au

Version D (January 2015)

IPLAN PROJECTS Planning & Development Solutions

#### Planning Proposal to amend Planning Controls in the Drinking Water Catchments, Blayney Shire NSW

. . .

Page 2

- Include objectives, such as 'no net loss of native vegetation', that will ensure the LEP supports the NSW State Plan via State Natural Resource Management Targets and Catchment Management Authority Action Plans;
- Avoid neighbour conflicts associated with noise, edour, dust and pesticide use; and
- Minimise flood risk to human life, property and the local environment while maintaining floodplain connectivity for environmental benefit.

Specific comments on the exhibited draft LEP are included below.

#### **Biodiversity and Environmental Protection**

We strongly support the Council's inclusion of the biodiversity overlay and associated clause within the LEP. The inclusion of this clause will help support the view expressed in the Blayney Settlement Strategy that There should be no net loss of native vegetation from development' and the intent to 'seek to preserve and enhance the biodiversity of the region and protect existing native vegetation' and 'to sethack development from riparter corridors and areas of existing significant vegetation or adopt other controls to minimise the impact of settlement'.

This clause will also be important in ensuring that the impacts of development on native vegetation are appropriately assessed and mitigated, particularly in parts of the LGA where the LEP has not excluded development intensification within remnant native vegetation. As previously noted, one such instance is at Mandurama, where there will be potential to create additional jots within native vegetation, with little opportunity for future dwellings and associated asset protection zones to be sited to avoid clearing. We remain of the view that a larger NLS should be applied to this area, to further reduce the number of new last hat can be created. We also encourage Council to consider specific controls related to this land within a future Development Control Plan as a secondary measure.

We also support:

- The inclusion of clause 6.6 'Riparian lands and waterways'.
- The exclusion of intensive livestock and plant agriculture and water treatment facilities from the E3 zona which has been applied to the drinking water catchment.
- The proposed clause 6.4 to be applied to the drinking water catchment and clause 6.3 relating to atomwater;

However we also note that the LEP is inconsistent with the Rural and Industrial Land Use Strategy developed for the LGA. This Strategy recommended larger minimum lot sizes for rural lands than the 100ha MLS proposed within the LEP. In particular, that Strategy recommended a 200ha MLS for the drinking water catchment.

Our view remains that the MLS within an E3 zone can be variable, but should ensure there is very limited, if any, scope for further subdivision and associated intensification of use or settlement. In accordance with this principle, we support the Rural and industrial Land Use Strategy recommendation of a 200hs MLS for the drinking water calciument (covered by the E3 zone in the LEP). Reducing the amount of potential subdivision of lots, and therefore new dwallings and associated infrastructure, can reduce the potential for these to impact on water quality, particularly where they may be in close proximity to, and place pressures on, ripartan areas.

We also recommend the zening of Travelling Stock Reserves (TSRs) as E3 at a minimum, particularly those identified has having conservation values. Mapping of TSRs, including identification of EECs and biodiversity conservation value rankings is available from <a href="http://gbwcmn.net.au/node/6">http://gbwcmn.net.au/node/6</a>

Similarly, we recommend that environmental conings (E2 preferably, or E3 where appropriate) be applied to other Crown Reserves (eg Public Recreation Reserves) containing remnant native vegetation within the LGA.

Version D (January 2015)

iPLAN PROJECTS Planning & Development Solutions

#### Planning Proposal to amend Planning Controls in the Drinking Water Catchments, Blayney Shire NSW

Pa38 3

We have also advised previously that if Council approves residential development near the Blayney Sewage Treatment Plant (STP) and residences are impacted by offensive odours from the STP, Council will be in broach of s129 of the *Protection of the Environment Operations. Act 1997* and may also be required to undertake expensive augmentation to its STP. We recommended that an adequate buffer be implemented via the LEP rather than being deferred to a future DOP. Whilst it remains preferable that this issue be addressed via appropriate zonings in the first instance, we do view the proposed LEP clause 6.9 *Davelopment in proximity to severage treatment plants and waste depots* as a positive step forward in addressing this issue.

#### Aboriginal Cultural Heritage

We have no further comments to make on the extent to which Aboriginal outfural heritage has been addressed by the LEP. We refer Council to our previous submissions (21 December 2009, 1 July 2010 and 20 December 2010) containing advice on planning and assessment for the protection of Aboriginal cultural heritage and encourage Council to implement this advice in future LEP reviews, DCPs and development assessment. However if requested by Council, DEH would be happy to continue to work with Council on this issue during finalisation of the LEP.

#### Flooding-related issues

No towns or urban centres (Blayney, Milithorpe, Carcoar, Lyndhurst, Mandurams, Neville, Newhidge and Barry) within the Blayney LGA have a valid Flood Study to determine flood-related planning matters.

In the absence of any specific flood studies, a recommendation has been made in Blayney to adopt a Flood Planning Area (included in the maps), possibly determined from anecdotal evidence and some historic flood marks. Although similar flood planning areas were discussed in the villages other than Blayney during preparation of the Strategy, the maps for the other villages have not been included in the draft LEP. It should be noted that the definitions and subclauses in the LEP Flood Clause cannot be applied in the absence of a Flood Map for villages other than Blayney. Council may need to take appropriate steps towards establishing flood-related controls when it is in a position to carry out the relevant studies.

Any specific questions that may be outstanding regarding flood planning matters should be directed to Siva Varathan, Senior Natural Resources Officer -- Floodplain Management, on (02) 6883 6503.

Should you require further information regarding this submission generally, please contact Erica Bargent on (02) 6933 6311.

Yours sincerely

ROBERT TAVLOR Manager, Environment and Conservation Programs Conservation and Regulation Division

Version D (January 2015)

PLAN PROJECTS

## MINUTES OF THE BLAYNEY SHIRE SPORTS COUNCIL MEETING HELD ON THURSDAY 20 NOVEMBER 2014, AT THE BLAYNEY COMMUNITY CENTRE

Meeting commenced at 5.30pm.

## PRESENT:

David Kingham (Chair, Blayney Shire Council), Grant Baker (Blayney Shire Council), Shane Oates (Blayney Shire Council), Trevor Jones (Harness Racing Club), Rosemary Reid (Senior Tennis) Jodi Spencer (Central West Dressage), Michael Tyrrell (Golf club), Matthew Lewis (Little Athletics), Peter Wakem (Swimming Club), Rodney Corbett (Junior Soccer) Adam Hornby (Senior League), Lisa Oborn, (Junior League), Karen Webster (Carcoar Pony Club), Hattie Harnett (Carcoar Pony Club) and Cheryl Rutherford (Junior Tennis).

## APOLOGIES:

Christine Smith (Heritage Schools), Rachel Ellem (Millthorpe Junior Soccer), Bryce Toohey (Rugby Union), Bob Stanbridge (Senior Cricket) and Helen Burton (Show Society).

**RESOLVED:** That the apologies be accepted.

## MINUTES PREVIOUS MEETING (as circulated)

**<u>RESOLVED</u>**: That the minutes of the previous meeting be accepted. (A Hornby/R Reid).

## **BUSINESS ARISING:**

Storage shed roller door at King George Oval has been replaced.

## CORRESPONDENCE:

As emailed.

## EVENT CALENDAR UPDATE:

- Blayney to Bathurst (B2B) 12 April 2015
- Central West Dressage
- Carcoar Pony Club

## **GRANT FUNDING UPDATE**

- Royal Agricultural Society Foundation is offering a Community Kitchen Grant. The Showground users will apply.
- Blayney Senior Tennis Club received financial assisting funding from Blayney Council.

## <u>REPORTS</u>

#### Senior Cricket:

Dakers Oval has damage to its synthetic surface and will cost \$2,000 to repair. The club will apply to the Financial Assistance Fund.

## Junior Cricket:

Replacing both ends of surface at Napier Oval and is also replacing the

# ATTACHMENT NO: 1 - BLAYNEY SHIRE SPORTS COUNCIL MINUTES 20/11/2014

surface at the High School. Club to liaise with Council to arrange for project management and delivery.

## Swimming Club:

Membership is going well.

## Junior Soccer:

AGM held recently. New President is Graeme Higham.

#### Little Athletics:

Going well. Membership is about 150.

## **Blayney Golf Club:**

Open tournament this weekend; have installed solar panels; looking at putting another bore down; junior program going well – about 20 each week.

#### Central West Dressage:

Pad to be put down soon.

#### Senior Tennis:

Going well

## Show Society:

Grant application for extension for extension to cattle pavilion unsuccessful. Can show committee go ahead with work? Grant will organise a "Pre D.A." meeting. A development application may not be needed.

## Harness Racing:

Refurbishment of toilets completed. Next meetings 22 February and late May; in process of gravelling track.

## Junior Tennis:

Club Championships 14 December. Graffiti on walls. If Council undertakes removal of graffiti, can they please inform Club contact.

#### Pony Club:

Intends putting yards in during January.

## **GENERAL BUSINESS**

Bryce Toohey has moved to Cowra and will no longer be part of the Sports Council.

**King George Oval:** Users of King George Oval to meet Thursday, 27 November at 5.30pm at the Community Centre to discuss kitchen upgrade.

- Little Athletics and Rugby Union are using the Southern door of the grandstand which is very heavy and hard to use.
- Adam asked that if there is any money left from grant for seats could it go towards upgrade of canteen.
- Kitchen upgrade to be placed on priority project list.
- Rugby League would like to obtain out of season access to Napier Oval.

They will discuss with Junior Cricket and then make joint request to Council.

• An Emergency helicopter landed while Little Athletics was in progress. Protocols are to be put in place.

**Centrepoint:** Request that starting blocks be repaired as part of shutdown. Timing clock also not operational.

Napier Oval: Toilets almost finished. Completion date due end of November.

**Showground:** If there are any excess chairs from Bathurst for King George Oval some can go to the showground.

**Blayney Sports Awards:** Inaugural awards presented this week. Sponsorship has been provided by Jim Newman and other local businesses. Recipients for October are: Lochie Hobby, Senior; Sophie Stammers, Junior; Gerry Davis, Veteran; Sue Webb, Volunteer; Blayney Public School Netball, Team award. Awards announced in Blayney Chronicle and 2BS. Next Sports Award meeting 11 December, 5.30pm at the Blayney Bowling Club.

#### NEXT MEETING

Thursday 19 February 2015.

Meeting closed at 6.55pm.

## MINUTES OF THE BLAYNEY SHIRE ACCESS ADVISORY COMMITTEE MEETING HELD ON THURSDAY 27 NOVEMBER 2014 AT THE BLAYNEY SHIRE COMMUNITY CENTRE

Meeting commenced at 5.50pm.

## PRESENT

Councillor Shane Oates, Jenny McMahon, Iris Dorsett and Mark Dicker

## **APOLOGIES**

Sharon Kearney and Tom Williams

## CONFIRMATION OF PREVIOUS MINUTES

The minutes of the previous meeting held on 21 August 2014 were confirmed to be a true and accurate record of that meeting (Jenny McMahon/Iris Dorsett).

## **DISCLOSURES OF INTEREST**

Nil.

## BUSINESS ARISING FROM PREVIOUS MEETING

## Commonwealth Bank Review of DA69/2014

Mark Dicker explained the reasons behind Council proceeding to grant land owners and development consent for the abovementioned application

#### Adelaide Street paving condition

Mark Dicker explained that Councils Infrastructure Services had undertaken a risk assessment for the paving condition of Adelaide Street Blayney during the week ending 30 October 2014. The condition of the paving was considered appropriate with a minor amount of pavers to be repaired and/or replaced.

Discussion then proceeded that it is not just the paved area of Adelaide Street Blayney also concrete condition particularly both sides of Adelaide Street from Hang Sing restaurant to the Heritage Park which requires assessment.

**RECOMMENDED:** That Council assess the condition of the footpath paving both sides of Adelaide Street Blayney from the Hang Sing restaurant to Heritage Park.

#### **GENERAL BUSINESS**

#### **Tour of Blayney**

Iris Dorsett advised that Councillors and Senior Council staff were provided with wheel chairs and went on a "tour of the town" approximately 3 years ago to raise awareness of the challenges that mobility devices can encounter in Blayney. **RECOMMENDED:** That another "tour of the town" is organised for early 2015.

## Access Maps

Councillor Shane Oates showed the access map on tablet device which has been developed using the google platform.

## **Disability Week – November 2014**

Chair Oates showed a draft press release to be issued for International Day of People with Disability (IDPwD). It was discussed to include more information in the press release including committee member names and contact details and circulate to the media.

**RECOMMENDED:** That the Chair amend the press release and arrange for release on Councils social media platforms, website and Blayney Chronicle.

## Liberty Swing

Jenny McMahon presented the committee a slide show regarding the Liberty Swing. The preferred location is Heritage Park Blayney.

Jenny's initial investigations have shown the cost of the swing would be \$17,000 plus GST (which is paid for by variety). Installation is estimated to be approximately \$10,000 to \$15,000 which would have to be raised as speciality installers are required.

It was discussed if a coalition including; Council, Cadia, Nestle, Blayney Wholesale Foods and charity organisations could be approached to contribute the \$15,000 between them for the required installation.

**RECOMMENDED:** That Council considers when preparing the 2015/16 budget allocating a contribution for the installation of Liberty Swing at Heritage Park Blayney.

#### **NEW BUSINESS**

## Napier Street Amenities

The Committee asked if the new facilities at Napier Street contained accessible facilities. Mark Dicker advised he was quite certain a unisex facility was incorporated into the new facility, but will confirm and advise.

• Millthorpe Church

The Committee raised if Council was providing financial assistance to the accessible ramp to be constructed at the Millthorpe Anglican Church. Mark Dicker advised he had no knowledge of this ramp or if Council was providing any funding.

## • Carrington Park Blayney – War Memorial Gates

The Committee discussed what an exceptional job Council has completed around the War Memorial Gates and staff should be congratulated.

## • Accessible Car Parks

The Committee raised if Council could assess the paint condition of accessible parks within the Shire and repaint those which are not sufficient.

## FUTURE AGENDA ITEMS

Nil

## NEXT MEETING

The next meeting of the Access Advisory Committee will be held on Thursday 12 February 2015 commencing at 5.45pm.

## MEETING CLOSE

The meeting closed at 7pm.

## MINUTES OF THE BLAYNEY SHIRE TOWNS AND VILLAGES <u>COMMITTEE MEETING</u> <u>HELD ON THURSDAY 11 DECEMBER 2014</u> <u>AT THE BLAYNEY SHIRE COMMUNITY CENTRE</u>

Meeting commenced at 6.02pm

## PRESENT

Penny May, Judy Belecky, Don Bell, Kerry Adams, Sally Ryan, Cecily Waters, Cathy Griffiths, Elizabeth Russ, Bill Burdett, Rebecca Price, Rebecca Ryan, Anastasia Webster-Hawes, Tim Weeks, and Anton Franze.

## APOLOGIES

**RECOMMENDED:** That the apologies received from Narelle Riley, Richard Bloomfield and Alvaro Marques be accepted. (Elizabeth Russ / Cathy Griffiths)

## FORSHADOWED G.B:

B2B Resignation of Blayney Representative T. Kearney.

#### DECLARATIONS OF INTEREST Nil.

## **CONFIRMATION OF MINUTES**

**RECOMMENDED:** That the minutes of the previous meeting held on 11 September 2014 be confirmed to be a true and accurate record of that meeting (Sally Ryan / Elizabeth Russ).

## MATTERS ARISING

Nil.

## 2015 WWI TROOP TRAIN RE-ENACTMENT

- No further update.
- To remain a future agenda item.

## VILLAGE PLANS UPDATE

- Report provided by GM on Village Plans and summary provided.
- Request that proposed trees be furnished to committees and
  - consultation occur with program.
- Committees to provide preferences/ideas on signs.
- Banners to be a consistent colour and banners with pictures be developed.
- Quotes will be sought on street banners and hanging.

Future agenda item: Year 2 Village Plan Budget.

## PROGRESS ON TOWNS & VILLAGES SIGNAGE

• Village signage concepts distributed.

**RECOMMENDATION:** That the Village Signage concepts be endorsed (Sally Ryan / Cathy Griffiths).

## **BLAYNEY IGA COMMUNITY CHEST**

 Application lodged on behalf of Community Halls to IGA Community Chest.

## GENERAL BUSINESS

<u>B2B</u>

- Report from Blayney Town Committee Representative on meeting with B2B representatives including small villages.
- No press releases, no neighbourhood consultation organisers' state people should refer to their website.
- Challenge is how we capitalise on event.
- Committee Representatives to consider how you can capitalise on event.

**RECOMMENDATION:** That Council engage the B2B organisers over lack of neighbourhood consultation; press releases/community awareness; toilet facilities and rubbish collection.

**Clarification to be sought associated with event:** Emergency Evaluation Plan for residents during event and how it is communicated to residents. That a detailed Event Management Plan and a designated warm up area with a Traffic Management Plan be furnished (Elizabeth Russ / Cecily Waters).

## Resignation of A. Kearney

**RECOMMENDATION:** That the resignation of A. Kearney be noted and that Anastasia Webster-Hawes be appointed as Blayney Town Committee delegate (Kerry Adams / Judy Belecky).

Carcoar Public School Principal

Report noted.

Neville Showground Trust

• Radiata Pines are dying in the showground.

Hobbys Yards Hall

 Bark chips dumped behind the hall. Not Council – committee is coordinating removal so as to discourage vermin or snakes.

#### Tallwood Hall

• Hall recladded.

# ATTACHMENT NO: 1 - BLAYNEY SHIRE TOWNS & VILLAGES COMMITTEE MEETING MINUTES
