

CentrePoint Major Project

The pool hall will be closed from mid-July 2019 to April 2020 for Stage 1 of the CentrePoint Sport and Leisure Pool Upgrade. The project has a total value of \$4.2 million funded by the Federal Government Building Better Regions Fund and Blayney Shire Council cash reserves. The contract was awarded to local company Hines Construction Pty Ltd.

Key features of the project include; renovation of toilets and change rooms, new pre/post shower area and raising the water level of all 3 pools to concourse level. Accessibility will be significantly improved through the installation of a new pool pod to the 25m pool, construction of a compliant access ramp to the middle pool and new unisex accessible toilet facilities which are also family change rooms.

Behind the scenes, the upgrade will include a complete upgrade of the plant room and all pipework, installation of a new, modern water disinfection/filtration plant and the ability to separate the temperature control for each of the 3 individual pools. This will mean lap swimmers can swim at the recommended 26° and the middle pool can enjoy water exercise and hydrotherapy up to a maximum 32°.

The warmer water in the middle pool will comfortably cater for water aerobics and Learn to Swim classes; helping to prevent chattering teeth from the cold during lessons. The new toddler pool incorporating an aqua slide tower will assist and encourage younger children to experience water in a safe and interactive environment. See below for a full list of what is included in the project.

The dry courts, gym and fitness classes will still be in operation with the gym launching extended hours access where members will be able to use the gym from 4:30am – 11:00pm all year round outside of staffed hours.
